

RENEWAL – ADDENDUM¹ (Walkthrough)

Business Requirements Document (BRD)

Prepared by: Business Project Services (BPS)

¹ As per eSDLC guidelines, any updates to the Business Requirements Document (BRD) after the walkthrough should be managed through controlled documentation to maintain clarity and traceability. Instead of revising and re-routing the entire BRD for approval, an Annex should be prepared to capture the specific changes or additions. This Annex must then be routed for sign-off to ensure formal acknowledgment of the updates. *Alternatively, if the changes or clarifications agreed upon during the walkthrough, the Minutes of Meeting (MOM) can serve as official documentation of those agreements.* This approach streamlines the approval process, reduces redundancy, and ensures that all stakeholders have a clear record of decisions without compromising compliance or governance standards.

Strictly Confidential and for Internal Use of BDO only

Revision Log

<i>Date</i>	<i>Version</i>	<i>Details</i>	<i>Author</i>
May 8, 2026	01	Addendum as a result of the discussion between BU, SA, and Sol Arch	Zean C. Ibay
May 11, 2026	01	Addendum sent to BU for review and sign-off	Zean C. Ibay
May 12, 2026	01.01	Added Rules/Criteria as per Berna's review	Zean C. Ibay

Purpose

The purpose of this Renewal BRD Addendum is to formally document and consolidate the additional business requirements, clarifications, and refinements identified and agreed upon during the Renewal workshops and walkthrough discussions (Part 1, Part 2, and Part 3).

This addendum serves as an extension of the approved BRD and aims to:

- Establish a controlled, standardized, and rule-based renewal framework
- Capture validated requirements addressing gaps in:
 - Decision logic
 - Automation boundaries
 - Role-based access and controls
 - Exception handling and routing
- Ensure that renewal processing is consistent, traceable, and auditable
- Support alignment between Business Units, Solution Architecture, and IT prior to design and implementation
- Maintain compliance with eSDLC governance standards, ensuring that all updates are properly documented without altering the baseline BRD

Scope

This addendum covers enhancements and updates to the Renewal process, specifically focusing on:

1. System-Controlled Validation and Eligibility
 - Introduction of in-system data sanitation and validation to ensure consistent eligibility determination
 - Implementation of rule-based classification of renewal records
2. Controlled Renewal Processing Framework
 - Clear separation between extraction, validation, and renewal decision stages
 - Enforcement of explicit business disposition prior to renewal progression
3. Rule-Based Automation and Decisioning
 - Use of configurable business rules to drive classification, routing, and workflow progression

- Introduction of a decision matrix to distinguish automated versus manual scenarios
- 4. Role-Based Governance and Access Controls
 - Definition of role-specific permissions to enforce segregation of duties
 - Restriction of critical actions (e.g., booking, placement, communication) to authorized roles
- 5. Exception Handling and Routing
 - Standardized identification and handling of exceptions
 - Routing of non-compliant or failed records to appropriate queues
- 6. Integration, Matching, and Data Handling
 - Incorporation of external data sources (e.g., LAMD reports) for matching and validation
 - Use of defined keys and rules to determine eligibility and proper routing
- 7. Monitoring, Visibility, and Reporting
 - Centralized renewal listing for monitoring renewal exposure and account status
 - Identification of KYC-related records for compliance visibility (non-blocking)
 - Identification and handling of NRNS (No Renew / No Submit) accounts
- 8. Workflow Progression and Control
 - Automation of workflow progression based on insurer responses and defined rules
 - Retention of manual control for final actions such as client confirmation, placement, and booking
- 9. Post-Renewal Evaluation
 - Rule-based evaluation of incentive eligibility after completion of renewal lifecycle events

This addendum is limited to capturing confirmed requirements and clarifications from the workshop and walkthrough sessions. Any future changes beyond this scope shall be subject to formal change management processes in accordance with project governance.

Table of New Business Requirements

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRRN.020		User	As a renewal processor, I want data sanitation to occur within the system after extraction or upload, so that renewal eligibility is determined consistently and not dependent on manual pre-cleaning. See Annex BRRN.020 – Sanitation Criteria (As Discussed in Meeting)	Expected Result: - Sanitation is system-controlled using the agreed criteria. Acceptance Criteria: - System performs validation, matching, and eligibility checks post-upload/extraction. - Records failing checks are flagged as exceptions. - Sanitation results are reportable and auditable.	Must Have
BRRN.023		User	I want the system to automatically classify renewal records into rule based buckets (i.e. Clean, Review, Exception), so that renewal work is prioritized, straight through cases are processed efficiently, and exceptions are controlled and isolated. See Annex BRRN.023 — Rule-Based Renewal Eligibility Determination	Expected Result: - Renewal records are automatically and immediately classified into rule-based buckets (Clean, Review, Exception) after sanitation and validation. - Classification is fully deterministic, explainable, and auditable, based strictly on defined system rules. - Bucket classification supports operational prioritization and straight-through processing while isolating non-compliant records. Acceptance Criteria: - System assigns bucket classification automatically without user intervention after validation. - Classification is based on: - Sanitation result - Matching outcome - Eligibility rules - Bucket assignment is: - Visible per record - Traceable with rule reference - Records dynamically move between buckets when:	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				○ Validation status changes ○ Exceptions are resolved 5. Manual reassignment: ○ Not allowed by default ○ Allowed only via controlled override with mandatory justification 6. All bucket assignments and changes are: ○ Logged with user/system trigger, timestamp, and rule reference 7. System prevents invalid classification: ○ Failed records must not be classified as Clean Negative Scenario: 1. If a renewal record fails sanitation, matching, eligibility, or other rule based checks, the system must not classify it as Clean and must automatically route it to Review or Exception; manual reclassification is not allowed and requires controlled override where applicable.	
BRRN.024		User	As an authorized user, I want the LAMD role limited to early validation only, so that booking, placement, and customer communications remain role-appropriate and controlled. Annex BRRN.024 — Business Rule Engine Triggering Actions	Expected Result: 1. LAMD actions are governance-safe. Acceptance Criteria: 1. LAMD permissions exclude booking, issuance, placement, and customer communication. 2. LAMD may perform validation and eligibility checks only. 3. All LAMD actions are logged and auditable.	Must Have
BRRN.028		User	I want the system to identify and view accounts that are due or upcoming for KYC review, so that compliance monitoring and follow up can be	Expected Result:	Must have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
			performed without blocking or interrupting the renewal process. See Annex BRRN.028 Scenario, Criteria, and Rules as per discussion	- Accounts that are due or approaching periodic KYC review (e.g., non-bank or time-bound KYC requirements) are clearly identifiable in the system. - KYC information is provided for visibility and reporting purposes only, supporting compliance monitoring. - Renewal processing and disposition remain independent of KYC status, unless governed by a separate compliance rule or BRD. - KYC identification supports tracking and follow-up, without introducing renewal delays or automation blocks. - Applicability is subject to product and regulatory KYC requirements (e.g., Bank or Non-Bank Clients, CLG, BBG, and applicable Motor cases). KYC identification is for visibility and monitoring only and does not block renewal. Acceptance Criteria: - The system can flag or tag accounts that are due or upcoming for KYC review based on defined KYC reference data or timelines. - KYC indicators are viewable in renewal listings or reports for monitoring and compliance awareness. - The presence of a KYC flag does not automatically block, stop, or reroute renewal processing. - KYC status is reportable and auditable, including visibility of when the KYC indicator was identified. - Any enforcement of KYC as a renewal gating condition is out of scope for this requirement and must be governed by a separate, explicitly approved compliance requirement.	
BRRN.029		User	The system shall ingest LAMD-provided reports and match paid-off loan records against RMEL policies to determine renewal eligibility and proper routing.	Expected Result: Paid-off or RMU-tagged accounts are excluded from standard renewal.	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
			See Annex BRRN.029 — Exception Handling and Routing	Acceptance Criteria: 1. PN is used as the primary matching key. 2. RMU-flagged accounts are tagged “Not for Renewal” or routed to Corporate RMU. 3. Matching and routing are logged with timestamp and data source.	
BRRN.030		User	The system shall automatically extract renewal candidates based on policy expiry date using configurable lead days (e.g., –140 days).	Expected Result: 1. Expiring policies are systematically and automatically extracted into the renewal population using configurable lead days. 2. Extraction is governance-controlled and does not trigger automatic renewal progression. Acceptance Criteria: 1. Extraction is based strictly on policy expiry date 2. Lead days Must be configurable (parameterized) and must not be hard-coded 3. Extraction does not initiate renewal workflow 4. System logs extraction date/time and Trigger mechanism 5. Extracted data is visible and reportable 6. System ensures no duplicate extractions for the same policy within the same cycle	Must Have
BRRN.033		User	The system shall allow renewal-identified accounts to follow the New Business flow when financial or structural changes require repricing or restructuring.	Expected Result: 1. Complex renewals are processed correctly without data loss. 2. Renewal accounts are clearly differentiated between “Renewal as-is” (no significant changes) and Renewal requiring proposal / new business flow. Acceptance Criteria: 1. The system shall evaluate renewal transactions for financial changes or structural changes 2. Accounts are clearly tagged (e.g. “For Proposal / New Business Path.”)	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				3. The system shall route accounts to proposal/new business flow when defined criteria are met. 4. Audit trail captures the conversion reason.	
BRRN.034		System	The system shall provide a configurable decision matrix defining which renewal scenarios are automated versus manual. See Annex BRRN.034 Sample Scenario	Expected Result: 1. Renewal decisions are consistent and explainable. 2. Renewal scenarios are consistently classified as either straight through (automated) or Exception/manual handling. Acceptance Criteria: 1. The system shall evaluate renewal transactions using a configurable decision matrix. Matrix references claims, endorsements, payment status, and timing. 2. Matrix outcomes map directly to disposition options. 3. Matrix updates and versions are auditable.	Must Have
BRRN.035		User	As a renewal user, I want the system to capture insurer responses (e.g., Approve / Renew As-Is, Reject, Revise) and automatically apply them to the renewal workflow, so that renewal status progression is accurate, controlled, and does not rely on manual re-encoding or interpretation. See Annex BRRN.035 Sample Scenario	Expected Result: 1. Insurer responses are captured once and used as the single source of truth for renewal progression. 2. Renewal workflow automatically progresses based on insurer response, subject to defined rules. 3. Client confirmation is required before final placement and booking, ensuring controlled completion. 4. Renewal progression is rule based, consistent, fully traceable and auditable 5. Exception scenarios are properly identified and outed for manual handling Acceptance Criteria: 1. The system shall capture insurer responses once and use them to drive renewal status updates.	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				- The system shall automatically update renewal status and trigger next workflow steps based on insurer response (e.g., approve / renew as-is → proceed) - The system shall ensure no manual re-encoding of insurer response and response is treated as the single source of truth. - The system shall require client confirmation (via Marketing/AO) before: Placement, Booking, Final renewal completion - The system shall distinguish between workflow progression (automated) and finalization (manual control via client confirmation) - The system shall route non-standard responses (e.g., reject, revise, mismatch) to manual / exception handling - The system shall ensure all progression rules are defined and decisions are applied consistently - The system shall log insurer response, status changes, and source and timestamp Negative Scenario: - Late, conflicting, or revised insurer responses prevent straight-through progression, block Renewal Advice or booking as applicable, and route the renewal to review or exception handling based on the latest valid insurer decision. - If the insurer response does not match the renewal record (e.g., reference number mismatch, policy number inconsistency, or ambiguous mapping): - The system must not progress the renewal workflow. - Renewal Advice (RA) generation and booking are blocked. - The renewal record is routed to Review / Exception handling. - Manual override, if allowed, must:	

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				i. Be explicitly initiated ii. Require mandatory remarks iii. Be fully logged for audit purposes	
BRRN.036		User	The system shall provide a centralized and customizable renewal listing that enables users to monitor renewal exposure, identify accounts requiring attention, and support escalation activities, so that renewals are proactively managed and not dependent on manual tracking. To provide a centralized, filterable renewal listing that enables proactive monitoring and identification of accounts requiring attention, supporting user-driven escalation and follow-up. See Annex BRRN.036 Sample Scenario	Expected Result: 1. Renewal accounts are visible, centralized, and up-to-date in a single listing. 2. Users can filter and generate renewal lists based on defined parameters (e.g., expiry, segment, status). 3. The system enables identification. (e.g. aging, overdue, high-risk renewals) 4. The system supports escalation by visibility, while actual escalation actions remain AO-driven. 5. All identification criteria are rule-based and defined. Acceptance Criteria: 1. The system shall provide a centralized renewal listing accessible to users. 2. The system shall allow users to filter and generate listings based on parameters such as Expiry window, Business segment / unit, Renewal status. 3. The system shall enable identification of renewal accounts that require attention (e.g., aging, overdue, high-risk) 4. The system shall display sufficient information to support monitoring and follow-up 5. The system shall allow users to act on identified accounts 6. The system shall support escalation by highlighting accounts requiring attention and/or not performing escalation automatically 7. The system shall log generation of renewal listings (if applicable) and user actions taken (where relevant).	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Negative Scenario: The system shall prevent or flag the following: 1. Renewal accounts not reflected in the centralized listing 2. Accounts incorrectly flagged or not flagged due to missing/incorrect criteria. 3. System automatically escalates without user intervention 4. Same criteria producing different outputs 5. No basis for why an account is flagged (missing rule reference) 6. Users unable to rely on system-generated listing for monitoring	
BRRN.037		User	I want the system to identify NRNS (No Renew / No Submit) accounts and trigger reminder or non-acceptance letters to manage lapse risk. See Annex BRRN.037 Sample Scenario	Expected Result: 1. NRNS accounts are actively followed up or closed. Acceptance Criteria: 1. NRNS is explicitly classified as No Renew / No Submit. 2. Reminder and non-acceptance rules are expiry-driven. 3. Letters and follow-ups are logged.	Must Have
BRRN.041			The system shall evaluate renewal transactions for incentive eligibility after successful placement, booking, and full payment confirmation, and assign an incentive eligibility indicator based on predefined, rule-based criteria, including applicable endorsements, so that incentive processing and reporting are accurate, consistent, and auditable.	Expected Result: 1. Incentive evaluation is fully aligned with renewal completion 2. Incentive is triggered only after: a. Client confirmation (via Marketing/AO) b. Placement and booking completion c. Payment rules satisfied (fully paid) 3. Eligible renewal transactions are clearly identified. Each qualified renewal transaction displays an incentive eligibility indicator 4. Incentive determination is consistent and rule-based. 5. Full auditability is maintained as all incentive decisions are logged and traceable. Acceptance Criteria:	Must have

			1. The system shall evaluate incentive eligibility only when all the following are met: • Renewal status = Booked / Placed • Client acceptance = Confirmed (via Marketing/AO) • Payment status = Fully Paid • No unmet payment rules exist 1. The system shall ensure incentive evaluation occurs after placement & booking. 2. Incentive is not triggered during: ○ Insurer response stage ○ Renewal processing stage ○ Pre-booking stages • The system shall evaluate renewal transactions against predefined incentive qualification rules (i.e. Policy attributes, Renewal details, Applicable endorsements) • The system shall assign an incentive eligibility indicator to the renewal transaction. Store the indicator after booking completion, full payment confirmation, and endorsement consideration 3. The system shall not assign incentive if payment is incomplete and/or payment rules are not satisfied. 4. The system shall assign incentive only when payment status = Fully Paid. 5. The system shall include applicable endorsements in incentive evaluation and ensures incentive eligibility reflects the final policy state at booking	
--	--	--	---	--

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				6. The system shall ensure incentive indicator is visible. (e.g In renewal transaction details, reports, downstream processes) 7. The system shall log incentive qualification result, timestamp, source renewal / transaction reference. 8. The system shall prevent or flag cases where: a. Incentive is assigned before: Booking, Full payment b. Renewal transaction is Cancelled after booking. Incentive indicator becomes invalid / subject to update c. Endorsements affecting eligibility are not considered d. Incentive is manually assigned without rule validation	
BRRN.042		User	As a renewal user, I want to be able to send request for Hold Cover to insurer/s and to record the Hold Cover confirmation details received from the insurer.	Expected Result: • Hold cover requests are successfully sent to the insurer and tracked within the system. • Insurer's hold cover confirmation is recorded accurately and is available for reference. Acceptance Criteria: 1. User can initiate a Hold Cover request with required details (i.e., insurer, coverage start date, duration, expiring policy number, remarks). 2. System captures the Hold Cover request date, requesting user, and insurer reference (if any). 3. User can record insurer's Hold Cover confirmation details (i.e., confirmation date, hold cover validity period, conditions, reference number).	

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				4. There should be an indicator once hold cover confirmation is recorded. 5. System prevents duplication of Hold Cover requests unless the previous hold cover has expired or is cancelled. 6. Audit trail logs for all Hold Cover requests and confirmation updates with user ID, date, and timestamp.	

Table of Updated Business Requirements

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRRN.001	BRRN.001	User	As a defined user, I want to be able to generate and send letters when certain criteria is met such as but not limited to: - No Advice Letter (NAL)	Expected Result / Acceptance Criteria: 1. System will have the facility to generate a list of eligible account for letter processing based on defined criteria	Must Have

			- Non-Renewal Letter - Renewal Advice Letter (RA)	(NRL)	2. User can view and select one or multiple accounts eligible for specific letter sending based defined criteria (i.e. NAL, NRL, RA). User can filter the list based on criteria such as but not limited to selected period, market segment, unit head, etc. 3. System generates the letter using the approved template. 4. Letters should be sent to defined recipients 5. The status of the account is updated to reflect that a specific has been generated and/or sent. 6. User receives confirmation that a was successfully generated and sent. 7. User received a notification for unsuccessfully generated or sent letters. Negative Scenario: 1. User is unable to generate a list of eligible accounts for letter processing. 2. Letter/s is not sent to the client after generation. 3. The system allows letter generation for ineligible accounts 4. The status of the account is not updated after letter issuance. 5. User does not receive confirmation of letter generation or sending. 6. User did not receive a notification for unsuccessfully generated or sent letters.
--	--	--	--	-------	---

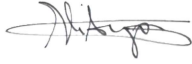

Approval

This document has been approved as the official Business Requirements Document.

Upon approval of this document, changes will be permitted until the conclusion of the service definition phase. Any changes made during service definition must be accompanied by a Minutes of the Meeting (MoM) document, signifying the change. Once the service build commences, any further changes will be subject to the project's change management process.

Annex

Annex BRRN.020 – Sanitation Criteria (As Discussed in Meeting)

1. Guiding Principles (from Discussion)

The sanitation criteria are defined with the following controls:

- System-driven validation after extraction or upload
- Configurable and parameter-based rules (not hardcoded)
- Controlled by authorized users only (not all users)
- Applied at policy level (primary level identified)
- Changes governed by effective/expiry dates
- Do not impact in-progress records
- Captured as detailed criteria outside the main BRD (Annex / reference)

2. Sanitation Criteria Definition (Based on Discussion)

2.1 Data Validation Criteria (Core Requirement)

Criteria ID	Criterion	Condition	System Behavior
SC-01	Data Completeness	Required fields present after extraction/upload	Pass validation
SC-02	Data Completeness	Missing key fields (e.g., policy info, identifiers)	Flag as Exception Record
SC-03	Matching Validation	Record matches expected format / structure	Proceed to eligibility
SC-04	Matching Failure	Record fails validation/matching	Route to Exception Report

2.2 Configurable Criteria / Parameter-Based Rules

Criteria ID	Criterion	Condition	System Behavior
SC-05	Configurable Rule Set	Criteria defined in system configuration	Used during sanitation
SC-06	Rule Update Control	Criteria updated by authorized group only	Changes logged
SC-07	Unauthorized Access	Non-authorized user attempts update	Denied access

2.3 Risk / Product-Based Filtering (Sample Criteria from BU)

Criteria ID	Criterion	Condition	System Behavior
SC-08	Risk Code Filtering	Risk code is renewable	Include in eligible pool
SC-09	Risk Code Filtering	Risk code is non-renewable (e.g., Bonds, CAR)	Exclude from renewal
SC-10	Insurer-Provided Criteria	Included in insurer renewable list	Allow continuation
SC-11	Unsupported Risk Code	Not defined in criteria	Route to manual review

2.4 Financial Threshold Criteria (Sample Scenario from Meeting)

Criteria ID	Criterion	Condition	System Behavior
SC-12	TSI Threshold	TSI ≤ 250M	Eligible for standard processing
SC-13	TSI Threshold	TSI > 250M	Route to TSU / proposal handling

Annex BRRN.023 Rule-Based Renewal Eligibility Determination

Scenario: System determines whether an extracted policy is eligible for renewal based on configurable business rules (sanitation / eligibility criteria).

Rule ID	Condition (Business Rule)	System Behavior
R23-01	Policy TSI ≤ 250M AND risk code is renewable	Mark as Eligible for Renewal
R23-02	Policy TSI > 250M	Route to TSU / Proposal Handling
R23-03	Risk code tagged as “Non-renewable” (e.g., Bonds, CAR)	Flag as Not Eligible (Exception)
R23-04	Missing mandatory data (e.g., reference no., insurer data)	Flag as Sanitation Failure
R23-05	Claims record exists requiring review	Mark as Requires Manual Evaluation

Annex BRRN.024 Business Rule Engine Triggering Actions

Scenario: Renewal processing proceeds only after explicit disposition / decision, even if criteria are satisfied.

Rule ID	Trigger Condition	System Action
R24-01	Eligible for renewal (standard case)	Tag as**“Renew As-Is Candidate”**
R24-02	High-value account (TSI > threshold)	Automatically assign to TSU queue
R24-03	Sanitation failure	Route to Exception Handling Queue
R24-04	Missing insurer confirmation	Hold status = Pending Insurer Validation
R24-05	Meets auto-classification rules	Assign Renewal Bucket (e.g., Auto / Manual / Proposal)

Annex BRRN.028 Scenario, Criteria, and Rules as per discussion

Scenario: Renewal processing proceeds only after explicit disposition / decision, even if criteria are satisfied.

Rule ID	Condition	System Behavior
R28-01	Policy classified as “Renewable”	Do NOT auto-renew

R28-02	Marketing disposition = “Renew”	Proceed to next stage (e.g., advice / booking prep)
R28-03	No disposition provided	Status remains Pending Decision
R28-04	Bulk selection completed	Allow bulk disposition (renew / not renew)
R28-05	Eligibility met but claims exist	Require manual override confirmation

KYC Determination Process (Renewal Stage)

Objective: Ensure that KYC verification is assessed as part of renewal decision-making, and no renewal proceeds without validated KYC status or explicit business override.

Step	Process Stage	Actor	System Action	Decision / Rule	Output
1	Extract Expiring Policies	System	Identify expiring accounts (no renewal triggered)	—	List of expiring policies
2	Apply Eligibility & Sanitation Rules	System	Evaluate policies using configured criteria	Based on BRRN.023/024 rules	Tagged records (Renewable / Exception / Review)
3	Trigger KYC Validation Check	System	Check KYC status (existing data/integration/manual record)	If KYC record exists	KYC Status retrieved
4	KYC Completeness Evaluation	System	Validate completeness of KYC fields	Required (e.g. client profile, documents, validity date)	KYC Status = Valid / Incomplete / Missing
5	KYC Expiry Check	System	Check KYC validity date	If expired	KYC Status = Expired
6	KYC Rule Classification	System	Classify based on KYC status	See rules below	KYC Category assigned
7	Routing / Action Trigger	System	Route record based on KYC category	No auto-renew allowed	Routed Queue
8	Business (Marketing) Disposition	Authorized User	Review and decide (renew / hold / not renew)	Mandatory explicit decision	Disposition recorded
9	Renewal Progression Control	System	Allow progression ONLY after disposition	No KYC bypass unless authorized override	Proceed / Stop
10	Audit Logging	System	Log all KYC checks and decisions	Full traceability	Audit trail

KYC Determination Rules (Derived from Discussion Principles)

Rule ID	Condition	System Behavior	Governance Control
KYC-01	KYC Complete and Valid	Mark as KYC Cleared	Eligible for renewal decision
KYC-02	KYC Missing	Route to KYC Completion Queue	Block renewal progression
KYC-03	KYC Incomplete (missing documents/details)	Flag as KYC Exception	Requires manual update

Rule ID	Condition	System Behavior	Governance Control
KYC-04	KYC Expired	Route to KYC Refresh Required	Renewal cannot proceed
KYC-05	High-risk / flagged account	Require Enhanced Due Diligence (EDD)	Mandatory escalation
KYC-06	KYC Cleared but business concern exists (e.g., claims)	Require Marketing review	No auto-renew

Annex BRRN.029 Exception Handling and Routing

Scenario: Policies failing rules or requiring special handling are routed and tracked systematically.

Rule ID	Condition	System Behavior
R29-01	Failed sanitation checks	Route to Exception Queue
R29-02	Missing key identifiers (e.g., reference no.)	Block further processing
R29-03	Conflicting data from insurer/file upload	Flag as Data Conflict Exception
R29-04	Rule mismatch or undefined category	Route to Manual Review Queue
R29-05	Exception unresolved beyond SLA	Trigger alert / escalation

Annex BRRN.034 Sample Scenario

Scenario	Trigger	System Behavior
Auto-renewal (Straight-through)	Approve / Renew As-Is	Automatically moves forward
Rejected / revised	Insurer response not approved	Stops or reroutes
Rule failure	Fails system validation rules	Routed to exception/manual
Unresolved endorsement	Pending endorsement issue	Renewal blocked

Annex BRRN.035 Sample Scenario

Scenario	Condition	System Behavior
Approve / Renew As-Is	Matches renewal record	Auto-progress to next step
Reject / Revise	Negative insurer response	Stop or reroute
Valid response captured	Single input source	Used directly (no re-encoding)
Response mismatch / issue	See negative scenarios	Prevent progression / route to review
All cases	Any status change	Fully logged and auditable

Scenario	Condition	Behavior
Rejected / Revised response	Insurer does not approve	Renewal is stopped or rerouted
Response mismatch	Response does not match renewal record	Prevent progression
Manual fallback	Automation not applicable	Manual push allowed (mentioned by Roda/Ma discussion)

Annex BRRN.036 Sample Scenario

Criteria Category	Criteria Description	Purpose / Usage	Behavior in System
Expiry-Based	Expiry window of policies	Identify upcoming renewals for monitoring	Used for filtering and listing generation
Status-Based	Renewal status (e.g., pending, in-progress)	Track current stage of renewal	Used to segment and monitor accounts
Segment / Unit-Based	Business segment or unit (e.g., IBG, Leasing)	Prioritize monitoring by business group	Used for filtering and grouping
Aging Indicator	Accounts requiring attention due to aging	Identify renewals not progressing on time	Flagged for follow-up
Overdue Indicator	Renewals past expected processing timeframe	Highlight delayed renewals	Flagged in listing for action
Risk Indicator	High-risk renewals	Prioritize critical accounts	Highlighted for monitoring
Portfolio Priority	Specific portfolios (e.g., IBG, Leasing)	Focus on sensitive portfolios	Used as escalation reference
Attention Flag	Accounts requiring attention (general)	Support user-driven escalation	Displayed in listing for action
User-Driven Action	Manual escalation by AO	Execute escalation outside system	System provides visibility only

Annex BRRN.037 Sample Scenario

1. NRNS Tagging & Identification Process

Step No.	Process Stage	Description	System Behavior
1	Policy Monitoring	System tracks policies approaching or reaching expiry	Expiry date is monitored
2	Renewal Activity Check	System checks if renewal action exists (submission / processing)	Detects absence of renewal activity
3	NRNS Identification	Accounts with no renewal or no submission are identified as NRNS	Flags account as NRNS candidate
4	Waiting / Buffer Period	Allow time before tagging as final NRNS (e.g., follow-up window)	Applies waiting period before triggering action
5	NRNS Tagging	Account is formally tagged as NRNS after conditions are met	NRNS status assigned in system
6	Trigger Follow-up Action	System triggers communication actions	Generates reminder or NAL

7	Business Handling	AO reviews and performs follow-up or closure	Manual follow-up / closure
8	Final Disposition	Account is either closed or updated based on outcome	Status updated (closed / no renewal)

3. NRNS Identification Criteria (From Discussion)

Criteria Type	Description	System Role	Notes
Expiry-Based	Policy has expired	Identify candidate accounts	Primary trigger
No Submission	No renewal submission made	Detect inactivity	Core NRNS condition
No Renewal Action	No renewal processing initiated	Validate inactivity	Reinforces NRNS classification
No Active Policy	No enforced/active policy exists	Identify non-renewed accounts	Example scenario raised
Waiting Period	Defined period before tagging as NRNS	Delay tagging	Criteria to be defined in ANNEX
Segment Variation	Different handling for CBG vs non-CBG	Apply segment logic	Mentioned in discussion

3. NRNS Scenarios (As Discussed)

Scenario No.	Scenario Description	Outcome
1	Policy expired with no renewal submission	Tagged as NRNS
2	Account has no renewal activity after expiry	Tagged as NRNS
3	Loan account with no submitted or active policy	Tagged as NRNS; may trigger NAL
4	Account pending but no response within waiting period	Tagged as NRNS after buffer period
5	Different segment handling (CBG vs non-CBG)	NRNS handling may vary

4. HC-Based Expiry and Letter Trigger Rules

Rule ID	Condition	System Behavior
R37-HC-01	Hold Cover (HC) is tagged by Marketing AO with defined duration (30 / 60 days)	System captures HC Start Date and HC End Date and uses HC End Date as basis for extension
R37-HC-02	No Hold Cover (HC) is tagged	System uses Original Policy Expiry Date as Effective Expiry Date
R37-HC-03	HC is present	System sets Effective Expiry Date = HC End Date
R37-HC-04	HC is not present	System sets Effective Expiry Date = Original Expiry Date
R37-HC-05	Current date is before Effective Expiry Date	System must NOT tag account as NRNS and must NOT trigger any letter
R37-HC-06	Account reaches Effective Expiry Date with no renewal completion	System tags account as Unrenewed / NRNS candidate

Rule ID	Condition	System Behavior
R37-HC-07	Account is Unrenewed AND Renewal Advice (RA) exists	System routes account to Operations and enables generation and sending of NAL (No Advice Letter)(<i>per BRRN.001 capability</i>)
R37-HC-08	Account is Unrenewed AND no Renewal Advice (RA) exists	System routes account to Marketing AO and enables generation and sending of NRL (Non-Renewal Letter)
R37-HC-09	Condition qualifies for NAL	System must prevent generation of NRL for the same account
R37-HC-10	Condition qualifies for NRL	System must prevent generation of NAL for the same account
R37-HC-11	NAL or NRL is generated and sent	System updates account status accordingly (e.g., "NAL Sent" or "NRL Sent") and logs action for audit
R37-HC-12	Any HC tagging, expiry evaluation, or letter triggering action occurs	System logs user, timestamp, and action details for traceability

RENEWAL – ADDENDUM (Workshop)

Business Requirements Document (BRD)

Prepared by: Business Project Services (BPS)

Revision Log

<i>Date</i>	<i>Version</i>	<i>Details</i>	<i>Author</i>
4/08/2026	1.0	Addendum to capture additional Renewal requirements identified during the Business Requirement Gap Discovery Workshop	Zean C. Ibay
04/10/2026	1.0	Discussion with BU to finalize BRD Addendum	Zean C. Ibay

Addendum¹: Business Requirements for Renewal

Purpose

The purpose of this Business Requirements Document (BRD) Addendum is to formally document and capture the new and updated business requirements identified during the requirements workshop conducted from March 19 to March 27, 2026. This addendum supplements the originally approved BRD and reflects refinements, clarifications, and additional requirements gathered through stakeholder discussions during the workshop.

This BRD Addendum also aims to evaluate the completeness and alignment of the newly captured requirements against the initially identified requirements, with the objective of identifying any gaps, inconsistencies, or unmet business needs. This addendum supports informed decision-making and ensures that all critical business objectives and requirements are adequately addressed.

Ultimately, this addendum serves as an extension of the original BRD and acts as a reference document to maintain requirement traceability, manage scope changes, and support subsequent phases of solution design, development, and implementation.

The Renewal Business Requirements Document (BRD) Addendum define a controlled, expiry-driven renewal framework designed to standardize renewal processing across BDO Insurance and Reinsurance Brokers, Inc. The document consolidates requirements validated during the March 2026 Renewal Gap Discovery Workshops and addresses critical governance gaps related to decision logic, automation boundaries, role control, and exception handling. Key enhancements include in-system sanitation and validation, mandatory unique reference number matching, rule-based bucket classification, standardized reminder and NRNS handling, controlled treatment of claims, endorsements, payments, and insurer decisions, and automatic progression to booking upon client acceptance of Renewal Advice. Collectively, these requirements reduce manual dependency, mitigate renewal lapse and compliance risk, and establish a scalable, audit-ready foundation to support ongoing Core Modernization initiatives while complying with eSDLC governance standards.

¹ As per eSDLC guidelines, any updates to the Business Requirements Document (BRD) after the walkthrough should be managed through controlled documentation to maintain clarity and traceability. Instead of revising and re-routing the entire BRD for approval, an Annex should be prepared to capture the specific changes or additions. This Annex must then be routed for sign-off to ensure formal acknowledgment of the updates. *Alternatively, if the changes or clarifications agreed upon during the walkthrough, the Minutes of Meeting (MOM) can serve as official documentation of those agreements.* This approach streamlines the approval process, reduces redundancy, and ensures that all stakeholders have a clear record of decisions without compromising compliance or governance standards.

Table of New Business Requirements

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRRN.020		User	As a renewal processor, I want data sanitation to occur within the system after extraction or upload, so that renewal eligibility is determined consistently and not dependent on manual pre-cleaning.	Expected Result: - Sanitation is system-controlled using the agreed criteria. Acceptance Criteria: - System performs validation, matching, and eligibility checks post-upload/extraction. - Records failing checks are flagged as exceptions. - Sanitation results are reportable and auditable.	Must Have
BRRN.021		User	As an authorized user, I want expiring accounts to be extracted (e.g. within the system and displayed on the screen/dashboard), with renewal processing starting only upon explicit user initiation, so that accounts do not renew prematurely and proper governance is maintained.	Expected Result: - Extraction does not automatically trigger renewal. Acceptance Criteria: - Extracted accounts do not progress to renewal without explicit user initiation. (i.e. CLG – Bulk, Non-Mortgage – Individual) - System records initiating user and timestamp. - Audit logs clearly distinguish extraction from renewal initiation.	Must Have
BRRN.022		User	As a renewal user, I want to have a unique reference number to be mandatory and used as the primary matching key, so that renewal records reliably link to the correct existing policies.	Expected Result: - Renewal records are correctly matched to policies. Acceptance Criteria: - Unique reference number is mandatory for renewal processing. - Records without valid unique reference number are routed to exception handling. - Matching outcome is visible per record. - System logs matching result and status.	Must Have
BRRN.023		User	I want the system to automatically classify renewal records into rule based buckets (i.e. Clean, Review, Exception), so	Expected Result:	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
			that renewal work is prioritized, straight through cases are processed efficiently, and exceptions are controlled and isolated.	1. Renewal records are system classified into actionable buckets immediately after sanitation and validation. 2. Clean cases are clearly distinguishable from those requiring review or exception handling. 3. Bucket classification supports prioritization, focus, and operational efficiency, reducing reliance on manual sorting. 4. Bucket outcomes are consistent, explainable, and auditable, driven by defined rules rather than user discretion. Acceptance Criteria: 1. The system automatically classifies renewal records into predefined buckets (Clean / Review / Exception) after sanitation and validation. 2. Bucket assignment is fully rule based, using defined criteria (e.g., sanitation results, matching outcome, eligibility indicators), and is visible to users. 3. Records may move between buckets dynamically when underlying conditions change (e.g., validation updates, resolved issues), based on rules. 4. Users can filter renewal listings by bucket and export results for monitoring and follow up. 5. Users cannot manually reassign buckets unless explicitly permitted through controlled override mechanisms governed by separate rules. 6. Bucket classification actions and changes are logged and traceable for audit purposes. Negative Scenario:	

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				1. If a renewal record fails sanitation, matching, eligibility, or other rule based checks, the system must not classify it as Clean and must automatically route it to Review or Exception; manual re classification is not allowed and requires controlled override where applicable.	
BRRN.024		User	As an authorized user, I want the LAMD role limited to early validation only, so that booking, placement, and customer communications remain role-appropriate and controlled.	Expected Result: 1. LAMD actions are governance-safe. Acceptance Criteria: 1. LAMD permissions exclude booking, issuance, placement, and customer communication. 2. LAMD may perform validation and eligibility checks only. 3. All LAMD actions are logged and auditable.	Must Have
BRRN.025		User	I want expiry-driven reminder letters generated for expiring policies that are not yet submitted at the defined follow-up checkpoint (e.g., +90 days), so that follow-ups are standardized and time-bound.	Expected Result: 1. NRNS exposure is actively managed. Acceptance Criteria: 1. System generates reminder letters at the defined checkpoint (e.g., +90 days before expiry). 2. Policies already submitted or in progress are excluded. 3. Reminder generation and recipients are logged.	Must Have
BRRN.026		User	As a Contact Center user, I want system access to renewal lists and the ability to update renewal statuses, so that follow-ups are done via system.	Expected Result: 1. Manual activities are lessened. 2. Follow-up activities are perform within the system thus eliminating reliance on manual activities. 3. Tracking will be via system. Acceptance Criteria: 1. Contact Center users can view renewal lists. 2. Contact Center users can add remarks to indicate status.	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				3. Contact Center users can upload documents from the Client. 4. All changes are logged with user and timestamp. 5. Access is role-restricted.	
BRRN.027		User	As a Renewal User, I want to view the full historical account record (i.e. policies, renewals, endorsements, payment history, and claims) during renewal review so that I can make an informed and auditable renewal decision.	Expected Result: 1. A complete, read-only account history is available during renewal. 2. Result can be extracted, printed as per role-based access. Acceptance Criteria: 1. Account history includes prior policies, renewals, endorsements, payment history, and claims. 2. History is sourced from the existing (mother) policy, not the extraction file. 3. History is viewable before disposition selection. 4. User cannot proceed to final disposition without accessing the history.	Must Have
BRRN.028		User	I want the system to identify and view accounts that are due or upcoming for KYC review, so that compliance monitoring and follow up can be performed without blocking or interrupting the renewal process.	Expected Result: 1. Accounts that are due or approaching periodic KYC review (e.g., non-bank or time-bound KYC requirements) are clearly identifiable in the system. 2. KYC information is provided for visibility and reporting purposes only, supporting compliance monitoring. 3. Renewal processing and disposition remain independent of KYC status, unless governed by a separate compliance rule or BRD. 4. KYC identification supports tracking and follow-up, without introducing renewal delays or automation blocks. 5. Applicability is subject to product and regulatory KYC requirements (e.g., Bank or Non-Bank Clients, CLG, BBG,	Must have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				and applicable Motor cases). KYC identification is for visibility and monitoring only and does not block renewal. Acceptance Criteria: 1. The system can flag or tag accounts that are due or upcoming for KYC review based on defined KYC reference data or timelines. 2. KYC indicators are viewable in renewal listings or reports for monitoring and compliance awareness. 3. The presence of a KYC flag does not automatically block, stop, or reroute renewal processing. 4. KYC status is reportable and auditable, including visibility of when the KYC indicator was identified. 5. Any enforcement of KYC as a renewal gating condition is out of scope for this requirement and must be governed by a separate, explicitly approved compliance requirement.	
BRRN.029		User	The system shall ingest LAMD-provided reports and match paid-off loan records against RMEL policies to determine renewal eligibility and proper routing.	Expected Result: 1. Paid-off or RMU-tagged accounts are excluded from standard renewal. Acceptance Criteria: 1. PN is used as the primary matching key. 2. RMU-flagged accounts are tagged "Not for Renewal" or routed to Corporate RMU. 3. Matching and routing are logged with timestamp and data source.	Must Have
BRRN.030		User	The system shall automatically extract renewal candidates based on policy expiry date using configurable lead days (e.g., -140 days).	Expected Result:	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				1. Expiring policies enter the renewal population at the correct time. Acceptance Criteria: 1. Extraction is expiry-based, not maturity-based. 2. Lead days are configurable (no hard-coding). 3. Extraction alone does not guarantee renewability.	
BRRN.031		User	I want the system to apply rule-based disposition automatically and isolate exceptions, so that straight-through renewals proceed without manual effort and manual handling is focused only on high-impact or non-standard cases.	Expected Result: 1. Eligible renewals that fully satisfy defined business rules proceed through straight through processing without manual intervention. 2. Renewals that fail one or more rule checks are automatically isolated as exceptions and prevented from proceeding without review. 3. Renewal disposition outcomes are consistent, explainable, and auditable, based on system defined rules rather than user judgment alone. 4. Manual effort is reserved only for exceptional, high impact, or non standard renewal scenarios. Acceptance Criteria: 1. The system automatically evaluates renewals using defined rule based criteria and assigns a disposition without manual input for eligible cases. 2. Renewals with claims, endorsements, missing or invalid PN, unresolved payment conditions, or other eligibility issues are automatically routed to an Exception / Manual Review path. 3. Straight through renewals do not require user action to progress once all rules are satisfied.	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				4. Any manual override of a system assigned disposition is explicitly initiated by an authorized user, and requires mandatory remarks explaining the reason. 5. All disposition decisions, exception routing, and overrides are logged with user, timestamp, and rationale to support audit and traceability. Negative Scenario: Renewals failing rule based checks are excluded from straight through processing and routed to exception handling, with manual overrides permitted only with mandatory remarks and full audit logging.	
BRRN.032		User	Endorsements occurring before or during renewal must be reflected on the mother (expiring) policy prior to renewal approval.	Expected Result: - Renewal computation reflects the latest policy state. Acceptance Criteria: - Endorsements are applied to the current policy. - Renewal is blocked if endorsement impact is unresolved. - System records endorsement-to-renewal linkage.	Must Have
BRRN.033		User	The system shall allow renewal-identified accounts to follow the New Business flow when financial or structural changes require repricing or restructuring.	Expected Result: - Complex renewals are processed correctly without data loss. Acceptance Criteria: - Accounts are clearly tagged (e.g. "For Proposal / New Business Path.") - Audit trail captures the conversion reason.	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRRN.034		System	The system shall provide a configurable decision matrix defining which renewal scenarios are automated versus manual.	Expected Result: - Renewal decisions are consistent and explainable. Acceptance Criteria: - Matrix references claims, endorsements, payment status, and timing. - Matrix outcomes map directly to disposition options. - Matrix updates and versions are auditable.	Must Have
BRRN.035		User	As a renewal user, I want the system to capture insurer responses (e.g., Approve / Renew As-Is, Reject, Revise) and automatically apply them to the renewal workflow, so that renewal status progression is accurate, controlled, and does not rely on manual re-encoding or interpretation.	Expected Result: - Insurer responses are captured once and treated as the single source of truth for renewal progression. - A “Renew As Is / Approved” insurer response automatically advances the renewal to the next applicable step (e.g., Renewal Advice generation or booking), subject to all other governing rules. - Renewal progression does not require manual re-encoding of insurer decisions. - Rejected or revised insurer responses explicitly stop or reroute the renewal as appropriate. - All insurer responses and resulting status changes are system logged, traceable, and auditable. Acceptance Criteria: - When the insurer response is Approve / Renew As Is and successfully matches the renewal record: - The system automatically updates the renewal status to the appropriate approved / ready state. - Renewal proceeds to the next applicable workflow step (e.g., RA generation, booking), without manual user action.	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				c. No policy terms, pricing, or structure are changed. d. The action is logged with timestamp, insurer response type, and source reference. Negative Scenario: - Late, conflicting, or revised insurer responses prevent straight-through progression, block Renewal Advice or booking as applicable, and route the renewal to review or exception handling based on the latest valid insurer decision. - If the insurer response does not match the renewal record (e.g., reference number mismatch, policy number inconsistency, or ambiguous mapping): - The system must not progress the renewal workflow. - Renewal Advice (RA) generation and booking are blocked. - The renewal record is routed to Review / Exception handling. - Manual override, if allowed, must: - Be explicitly initiated - Require mandatory remarks - Be fully logged for audit purposes	
BRRN.036		User	I want the system to generate customizable, centralized renewal listings (e.g., by unit, segment, UH, IBG, Leasing), expiry window, and current status, so that renewal exposure is clearly visible, proactively monitored, and escalated appropriately without relying on manual tracking.	Expected Result: Renewal exposure across all relevant segments and units is visible, current, and manageable from a centralized view.	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				2. Users can customize and generate renewal listings based on expiry windows and business segments to support monitoring and follow ups. 3. Renewal listings support timely escalation, particularly for IBG and Leasing portfolios. 4. Renewal status visibility enables informed operational and management decision making. Acceptance Criteria: 1. The system allows users to generate renewal listings filtered by as per defined criteria. (e.g. Current month, Prior month, Future or user specified month(s)) 2. Renewal listings can be customized by unit and segment (e.g., UH, IBG, Leasing). 3. Generated renewal lists display current renewal statuses. (e.g. Renewed, Unrenewed, Expired) 4. Renewal listings can be viewed on screen and extracted based on defined criteria. 5. IBG and Leasing renewal listings support escalation, providing sufficient visibility to identify aging, overdue, or high risk renewals. 6. Renewal listing data reflects the latest available system status and avoids reliance on offline or manually maintained files.	
BRRN.037		User	I want the system to identify NRNS (No Renew / No Submit) accounts and trigger reminder or non-acceptance letters to manage lapse risk.	Expected Result: 1. NRNS accounts are actively followed up or closed. Acceptance Criteria: 1. NRNS is explicitly classified as No Renew / No Submit. 2. Reminder and non-acceptance rules are expiry-driven. 3. Letters and follow-ups are logged.	Must Have

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRRN.038		User	The system shall enforce routing of renewal changes based on financial impact, ensuring proper approval and proposal handling.	Expected Result: - Financial impact is governed correctly. - The system automatically evaluates renewal changes to determine whether there is financial impact (e.g., changes in premium, sum insured, charges, or other monetary values). - Financial impact routing decisions are system driven, consistent, and auditable, without reliance on user discretion. Acceptance Criteria: - Financial impact check is mandatory. - Proposal path is enforced when impact exists. - Acceptance methods (e.g. email, signed RA, payment) are recorded.	Must Have
BRRN.039		User	The system shall support LAMD-driven matching and categorization for CBG Motor and Fire renewals, including straight-through processing and letter generation.	Expected Result: - Eligible accounts are processed efficiently; non-eligible are controlled. Acceptance Criteria: - PN matching is mandatory. - Straight-through renewals bypass manual review. - NRNS and no-renewal letters are generated as required.	Must Have
BRRN.040		User	I want the system to automatically proceed to placement and booking once the client has accepted the Renewal Advice (RA) and applicable payment rules are satisfied, so that the renewal process is completed without delay, duplicate handling, or manual re initiation, and the policy can be issued on time.	Expected Result: - Client acceptance of the Renewal Advice is captured and recognized by the system through approved acceptance inputs. - The renewal status is automatically updated based on acceptance and rule evaluation (e.g., from RA Sent / Awaiting Response to For Booking).	Must have.

BR ID	Source BRD ID	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				3. Placement, booking, and policy issuance proceed automatically once Client acceptance is confirmed, and no blocking exceptions or unmet payment rules exist. 4. The renewal progresses without manual resubmission, duplicate proposal creation, or separate user initiation. 5. Renewals that proceed to booking follow standard placement, booking, and issuance SLAs. Acceptance Criteria: 1. When client acceptance of the Renewal Advice is recorded, the system marks the renewal with the appropriate status (i.e. Accepted) 2. Upon acceptance and successful evaluation of payment rules, and provided there are no unresolved exceptions, the system automatically updates the renewal status accordingly. (i.e. For Placement and Booking) 3. The system logs client acceptance, payment rule evaluation outcome, status changes, timestamps, and trigger sources to support audit and traceability.	

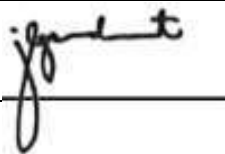

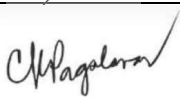

Approval

This document has been approved as the official Business Requirements Document.

Upon approval of this document, changes will be permitted until the conclusion of the service definition phase. Any changes made during service definition must be accompanied by a Minutes of the Meeting (MoM) document, signifying the change. Once the service build commences, any further changes will be subject to the project's change management process.

Renewal - Addendum¹

Business Requirements Document (BRD)

Prepared by: Zean C. Ibay

Strictly Confidential and for Internal Use of BDO only

¹ As per eSDLC guidelines, any updates to the Business Requirements Document (BRD) after the walkthrough should be managed through controlled documentation to maintain clarity and traceability. Instead of revising and re-routing the entire BRD for approval, an Annex should be prepared to capture the specific changes or additions. This Annex must then be routed for sign-off to ensure formal acknowledgment of the updates. *Alternatively, if the changes or clarifications agreed upon during the walkthrough, the Minutes of Meeting (MOM) can serve as official documentation of those agreements.* This approach streamlines the approval process, reduces redundancy, and ensures that all stakeholders have a clear record of decisions without compromising compliance or governance standards.

Revision Log

<i>Date</i>	<i>Version</i>	<i>Details</i>	<i>Author</i>
11/18/2025	1.0	Initial Version	Zean C. Ibay
12/16/2025	1.0	Finalize BRD Addendum	Zean C. Ibay

Purpose & Scope

This addendum to the BRD outlines enhancements and clarifications for the RMEL Phase 2 – Online Dispositioning system, specifically focusing on renewal processes for insurance policies. It details new and updated business requirements, acceptance criteria, and out-of-scope items to ensure compliance, traceability, and operational efficiency.

Key Changes and Additions in the Renewal Addendum

- System must allow generation and sending of NALs for expiring policies that do not require Renewal Advice (RA) or Not for Renewal Letter (NFR).
- More granular filter criteria, dynamic date range selection, and improved report generation and export options (including .xlsx and .pdf formats).
- Stronger audit trails for actions such as NAL/NFR/RA generation, sending, and changes to risk codes.
- Automatic tagging and exclusion of non-renewable risk codes, with corresponding NFR letters sent and logged.
- Batch generation and sending of RAs, with encryption and password protection, and batch uploads for dispositioned files.
- Enhanced scrollable views for assigned accounts, with real-time updates and comprehensive field visibility.
- Explicitly states that references to legacy systems (BDOIsys, EBIX, QPS) are now out-of-scope, but unique identifiers and reporting remain.
- The Addendum finalizes the requirements, clarifies negative scenarios, and sets stricter acceptance criteria for each requirement.

Updates

Table of Business Requirements

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRRN.001		User	System must allow the user to generate and send a No Advice Letter (NAL) to clients whose expiring policies do not require either a Renewal Advice (RA) or a Not for Renewal Letter (NFR) or Non-Renewal Letter (NRL), typically when no action or advice is needed regarding the expiring policy.	Expected Result / Acceptance Criteria: 1. User can select one or multiple accounts eligible for NAL. 2. System generates a No Advice Letter (NAL) for the selected account(s) using the approved template. 3. NAL is sent to the client's registered email address and saved in the system for audit purposes. 4. The status of the account is updated to reflect that an NAL has been issued. 5. User receives confirmation that the NAL was successfully generated and sent. Negative Scenario: 1. User is unable to generate an NAL for eligible accounts. 2. NAL is not sent to the client after generation. 3. The system allows NAL generation for ineligible accounts (e.g., accounts already issued an RA or NFR). 4. The status of the account is not updated after NAL issuance. 5. User does not receive confirmation of NAL generation or sending.	Must have.
BRRN.002	BRD 1.003.1 BRD 1.003.1.1 BRD 1.003.2 BRD 3.003.4.1.1	User	1. Generate the List of Expiring Accounts The system must allow users to select and change the date range (month, day, year) for generating the list of expiring accounts.	Expected Result: 1. Users can easily select any valid date range (month, day, year) using an intuitive interface, and modify their selection before generating the list. 2. The system updates the list dynamically based on the selected range. Acceptance Criteria: 1. User can select start and end dates, including month, day, and year. 2. Changing the date range immediately refreshes the displayed list. Invalid or incomplete date selections are prevented. 3. System displays a message if no accounts match the selected range.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Negative Scenario: 1. System fails to update the list when the date range is changed. Invalid dates can be selected, causing errors or empty results. 2. User cannot modify the date range after initial selection.	
BRRN.003	BRD 1.003.3 BRD 1.003.3.1 to 1.003.3.1.13		System provides filter criteria for generating the list, including all specified options, and allows filter management (apply, cancel, clear)	Expected Result: 1. Users can filter the list by any combination of criteria (e.g., Unit Head, Business Origin, Account Type, etc.), using single, multiple, all except, and all selections. 2. Filters can be applied, canceled, or cleared, and the list updates accordingly. Acceptance Criteria: 1. All filter fields are present and allow single/multiple/all except/all selections. 2. Applying filters instantly updates the list. Canceling or clearing filters restores the full list. 3. Filter selections are clearly indicated and easy to modify. 4. System prevents conflicting or invalid filter combinations. Negative Scenario: 1. Some filter fields are missing or do not support all selection types. 2. Applying filters does not update the list or causes errors. 3. Cancel/clear functions do not work or are confusing. 4. Invalid filter combinations are allowed, causing incorrect results.	Must have.
BRRN.004	BRD 1.003.4.1 BRD 1.003.4.1.1 to 1.003.4.1.24		System displays the generated list in a scrollable view with all required columns.	Expected Result: 1. The generated list of expiring accounts is displayed in a single, scrollable view. 2. All required columns are present, correctly labeled, and populated for each account. 3. Users can scroll to view all accounts and details without pagination.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Acceptance Criteria: 1. List is displayed in a scrollable grid or table. 2. All required columns (e.g., Invoice No., Reference No., Cover No., etc.) are present and populated. 3. Column headers are clear and match business definitions. 4. No data truncation or missing rows. 5. Scroll bar is visible and functional. 6. Users can resize or reorder columns if needed. Negative Scenario: 1. List is paginated or not scrollable. 2. Required columns are missing, mislabeled, or empty. 3. Data is truncated or incomplete. 4. Scroll bar is missing or does not work. 5. Users cannot view all accounts or details in one view.	
BRRN.005	1.003.4.1.2	User	System captures expired/expiring and unbooked accounts.	Expected Result: 1. All accounts that are expired, expiring within the selected date range, or unbooked are included in the generated list. 2. No relevant accounts are omitted. Acceptance Criteria: 1. System logic correctly identifies expired, expiring, and unbooked accounts. 2. All such accounts appear in the list when the relevant date range is selected. 3. No false positives or negatives in account inclusion. 4. Users can verify inclusion by cross-checking with source data. Negative Scenario: 1. Some expired/expiring or unbooked accounts are missing from the list. Accounts outside the date range are included.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				2. List contains duplicate or irrelevant accounts. Users cannot verify the completeness of the list.	
BRRN.006	BRD 1.003.4.1.3 BRD 1.003.4.1.4 BRD 2.003.1.6 BRD 2.006.1.2 BRD 2.007.4.1 BRD 3.003.4.5 BRD 3.006.1.5 BRD 4.003.1.6	User	System allows column filtering and search.	Expected Result: - Users can filter any column in the list and search for specific information (e.g., by keyword, reference number, client name, account name) using a search box or similar function. - Results update instantly and accurately. Acceptance Criteria: - Each column has a filter option (e.g., dropdown, text input). - Search box allows keyword or phrase search across all columns. Filtering/searching updates the list in real time. - Search results are highlighted or clearly indicated. - No performance issues with large lists. Negative Scenario: - Column filters are missing or non-functional. - Search box is absent or does not work. - Filtering/searching is slow, inaccurate, or incomplete. Results are not highlighted or are confusing. - Users cannot find specific information easily.	Must have.
BRRN.007	BRD 1.003.5 BRD 1.003.6 BRD 1.003.7	User	System allows download, save, and print in .xlsx format.	Expected Result: - Users can download, save, and print the generated list in Excel (.xlsx) format. - The exported file matches the displayed list, including all columns and filters. - Printouts are formatted for readability. Acceptance Criteria: - Download/save options export the current list view to .xlsx. - Exported file includes all columns and applied filters. - Print option produces a well-formatted, readable document. - No data loss or formatting errors in exported/printed files.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				5. Users can select print settings (e.g., orientation, scaling). Negative Scenario: 1. Download/save/print options are missing or do not work. 2. Exported file is incomplete, incorrectly formatted, or missing data. 3. Printouts are hard to read or missing information. 4. Users cannot customize print settings. 5. Exported files do not match the displayed list.	
BRRN.008	BRD 1.003.7.1 BRD 1.003.7.2		System provides print preview and settings.	Expected Result: 1. Users can preview the list before printing and customize print settings (e.g., page size, orientation, margins). 2. Preview matches the final printout. Acceptance Criteria: 1. Print preview displays the list exactly as it will appear when printed. 2. Users can adjust print settings and see changes in real time. 3. No discrepancies between preview and actual printout. Settings are easy to access and modify. Negative Scenario: 1. Print preview is missing or inaccurate. Print settings cannot be adjusted. 2. Actual printout does not match preview. 3. Users are unable to format the printout as needed.	Must have.
BRRN.009	BRD 1.003.7.3 BRD 1.003.7.3.1		System tags non-renewable risk codes, excludes them, maintains codes, and sends NFR letters.	Expected Result: 1. Non-renewable risk codes are automatically tagged as "Not for renewal" and excluded from assignment lists. 2. Maintenance interface allows adding/editing/removing risk codes. 3. Upon tagging, the system automatically sends a Not for Renewal Letter (NFR) to the client, with confirmation and audit trail.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Acceptance Criteria: 1. Non-renewable risk codes are tagged and excluded from assignment lists. 2. Maintenance interface for risk codes is available and secure. 3. NFR letters are generated and sent automatically upon tagging. System logs and confirms NFR delivery. 4. Users can audit changes to risk codes and NFR actions. Negative Scenario: 1. Non-renewable risk codes are not tagged/excluded. Maintenance interface is missing or insecure. 2. NFR letters are not sent or delivery is not confirmed. 3. No audit trail for risk code changes or NFR actions. 4. Assignment lists include non-renewable codes by mistake.	
BRRN.010	BRD 1.010.1 to BRD 1.010.7.1 BRD 2.009.1 to BRD 2.009.7.1 BRD 3.011.1 to BRD 3.011.7.1 BRD 4.09.1 to BRD 4.09.7	User	• Generate Renewal Advice (RA) • Ability to select accounts for RA generation (single, multiple, all, all except) • Generate RA for selected accounts • Prevent RA generation for locked accounts • Identify if RA is for first or second notice • View, preview, and close RA details • Download and save RA (single or batch) • Extract details for RA sending • Send RA in batch, with encryption and password protection	Expected Result: 1. Only authorized BDOI users (e.g., Marketing Team Lead, Marketing Account Officer, Processing Team Lead, Processing Officer) can access the "Generate Renewal Advice" module. 2. Users can select single, multiple, all except, or all expiring accounts for which to generate RA, as per BDOI's renewal workflow. 3. The system generates Renewal Advice (RA) for each selected account, using the latest BDOI-approved RA template. 4. Each RA clearly displays whether it is a "First Notice" or "Second Notice." 5. RA generation is disabled for accounts that are locked on the marketing side (i.e., after RA is generated or when workflow status is "locked"). 6. Users can preview, download, and save generated RAs (single or batch) in PDF format. 7. Before sending, each RA is encrypted and password-protected, following BDOI's data privacy and security policies. 8. Users can send RAs in batch, with audit logs for each send action.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				9. All actions (generation, download, send, failed attempts) are logged with user ID, timestamp, and affected account(s). 10. RA content includes all required policy details, renewal terms, premium, and BDOI contact information, in line with BDOI's regulatory and customer service standards. Negative Scenario: 1. A user without the correct BDOI role attempts to access the RA module and is denied access. 2. The user tries to generate RA for a locked account; the system disables the button and logs the attempt. 3. The user generates an RA, but the document does not indicate "First Notice" or "Second Notice." 4. The user downloads an RA, but the PDF is corrupted or missing required policy details. 5. The user attempts to send RAs in batch, but the system fails to encrypt or password-protect the files. 6. The system allows sending RAs to an email address outside BDOI's approved domains or without TLS, violating data privacy policy. 7. The audit log does not record a failed or successful RA generation/send action. 8. The system allows RA generation less than 30 days before expiry without warning, breaching BDOI's renewal notice policy. 9. The user cannot preview or close the RA preview due to a UI error. 10. The system allows saving or downloading RA to a restricted or non-existent location without error feedback.	
BRRN.011	BRD 2.003.1		System allows users to view all accounts assigned to them in a single, scrollable view. Any updates or endorsements made to an account are automatically reflected on the mother policy.	Expected Result: 1. Users can view all assigned accounts in one scrollable interface. 2. Any updates or endorsements made to an account are immediately reflected on the mother policy. Acceptance Criteria:	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				1. All accounts currently assigned to the user for disposition—regardless of status (active, expiring, expired, or previous years)—are visible in a single, scrollable list by default. 2. Updates/endorsements to any account are synchronized and reflected on the mother policy without delay. No data truncation or missing accounts. 3. Scroll bar is functional. 4. Filters may be applied to narrow the list, but the default view is comprehensive. Negative Scenario: 1. Users cannot view all assigned accounts, list is paginated or incomplete, scroll bar is missing or non-functional, updates/endorsements do not reflect on the mother policy, or changes are delayed or lost.	
BRRN.012	BRD 2.003.1.1		System allows users to select any account from the displayed list for further action or review.	Expected Result: 1. Users can select any account from the list for viewing or editing. Acceptance Criteria: 1. Selection mechanism (e.g., click, checkbox) is available and responsive. Selected account is highlighted and details are accessible. Negative Scenario: 1. Users cannot select an account, selection is unresponsive, or details do not load after selection.	Must have.
BRRN.013	BRD 2.003.1.2		System displays all renewal fields for the selected account, sourced from the generated expiring account list.	Expected Result: 1. Users can view all renewal-related fields for any selected account. Acceptance Criteria: 1. All renewal fields are visible, correctly labeled, and populated for the selected account. No missing or incomplete data.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Negative Scenario: 1. Renewal fields are missing, incomplete, or not displayed for the selected account.	
BRRN.014	BRD 2.003.1.3		System provides filtering options for each column in the account list, allowing users to narrow down results.	Expected Result: 1. Users can filter any column in the list to refine the displayed accounts. Acceptance Criteria: 1. Filter controls (e.g., dropdowns, text inputs) are available for each column. 2. Applying a filter updates the list instantly and accurately. Negative Scenario: 1. Filtering options are missing, non-functional, or do not update the list correctly.	
BRRN.015	BRD 2.003.1.4		System provides sorting options for the account list, allowing users to order accounts by any column.	Expected Result: 1. Users can sort the account list by any column (e.g., ascending/descending order). Acceptance Criteria: 1. Sorting controls are available and responsive. List updates immediately to reflect the chosen sort order. Negative Scenario: 1. Sorting options are missing, unresponsive, or do not update the list correctly.	Must have.
BRRN.016	BRD 2.003.1.5		System provides a search function that allows users to find specific information within the account list, similar to a Ctrl+F feature.	Expected Result: 1. Users can search for any keyword or phrase within the account list and instantly see matching results. Acceptance Criteria: 1. Search box is available and responsive. Search results are highlighted or filtered in real time.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				2. No performance issues with large lists. Negative Scenario: 1. Search function is missing, slow, inaccurate, or does not highlight/filter results correctly.	
BRRN.017	BRD 2.003.1.6		System allows users to search for a particular account using name or unique reference number.	Expected Result: 1. Users can locate any account using name or unique reference number. Acceptance Criteria: 1. Search fields for name and reference number are available and functional. 2. Search returns accurate and complete results. Negative Scenario: 1. Search fields are missing, non-functional, or return incomplete/inaccurate results.	Must have.
BRRN.018	BRD 3.004.1 BRD 3.004.1.1 BRD 3.004.1.2 BRD 4.004.1 BRD 4.004.1.1 BRD 4.004.1.2	System	Upload file(s) Select the source path Select the file(s) for upload System allows users to select a source path and upload one or more dispositioned files to update account details in the system.	Expected Result: 1. Dispositioning is performed outside the system, and the system's role is to accept a batch upload to update all details 2. Users select and upload dispositioned files. 3. System validates and processes the files, updating all relevant account details in bulk. 4. Confirmation and error feedback are provided. Audit trail is maintained. Acceptance Criteria: 1. Users can select/upload files. 2. System validates files, updates details accurately, provides feedback, and maintains audit logs. Negative Scenario: 1. Users cannot upload files, system accepts invalid data, updates are incomplete or incorrect, no feedback or audit trail.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRRN.019	BRD 1.009.3.1.6 BRD 2.008.3.1.6 BRD 3.010.3.1.6 BRD 4.008.3.1.6		The system must allow users to generate comprehensive reports on accounts and transactions relevant to their role. - Users should be able to define the report scope using flexible filters (such as invoice number, date range, unit, region, product, account type, status, and other relevant fields). - Reports must be viewable in a single, scrollable interface and include all necessary columns for business review (e.g., invoice number, account details, transaction status, renewal information, remarks). Users must have the ability to download, save, and print reports in standard formats (e.g., .xlsx, .pdf), with print preview and customizable print settings. Each report should also provide a summary section showing aggregate figures and key performance indicators.	Expected Result: - Users can generate, view, filter, and export detailed reports tailored to their needs. - Reports display all relevant data in a single, scrollable view. - Users can download, save, and print reports (e.g. xlsx and pdf formats). - Print preview and print settings are available. - A summary section is included in each report, showing totals and key metrics (as needed). Acceptance Criteria - The user can select and apply multiple filters (e.g. date, unit, region, etc.) to customize the report. - The generated report displays all selected data fields in a single, scrollable interface. - The user can export the report to .xlsx and .pdf formats without errors. - The user can access print preview and adjust print settings before printing. - The report includes a summary section with aggregate data (e.g., totals, counts, KPIs). - The system responds within acceptable performance standards (e.g., report generation within 20 seconds). Negative Scenario - The user is unable to generate a report due to missing or malfunctioning filter options. - The report displays incomplete or incorrect data, or is paginated instead of scrollable. - Exporting or saving the report fails, or the file is corrupted/unreadable. - Print preview or print settings are unavailable or do not function as intended. - The summary section is missing or displays inaccurate totals.	Must have.

BR ID	Source BRD #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				6. The system is slow or unresponsive during report generation. 1.	

Out-Of-Scope

- Requirements referencing BDOLsys, EBIX, or QPS (Quotation Processing System) are excluded. To ensure the long-term flexibility, maintainability, and scalability, the following requirements referencing to either BDOLsys or EBIX or QPS (Quotation Processing System) are considered out-of-scope. However, a unique reference or invoice number will still be generated for each transaction, and all necessary reports will continue to be produced as required. The removal of BDOLsys or EBIX or QPS-specific references does not affect the system's ability to track, report, and manage transactions using unique identifiers and standard reporting formats.

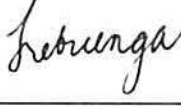

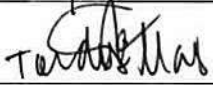

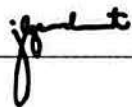

BR ID	Requirement Description
BRD 1.003.4.1.1.1	1.1 Expiring EBIX Invoice No.
	<i>Expiring Ebix invoice number should be present in the list</i>
BRD 1.003.4.1.1.3	1.3 BDOLsys Reference No.
	<i>BDOLsys Reference No. should be present in the list</i>
BRD 2.003.1.6	Search a particular account via name, QPS reference number, Ebix reference number
BRD 2.006.1.2	Search a particular account via name, QPS reference number, Ebix reference number
BRD 2.007.4.1	Search a particular account via name, QPS reference number, Ebix reference number
BRD 3.003.4.1.1	1.1 Expiring EBIX Invoice No.
	<i>User should be able to see a column with expiring Ebix invoice no. value</i>
BRD 3.003.4.1.3	1.3 BDOLsys Reference No.
	<i>User should be able to see a column with BDOLsys reference number value</i>
BRD 3.003.4.5	Search a particular account via name, QPS reference number, Ebix reference number
BRD 4.003.1.6	Search a particular account via name, QPS reference number, Ebix reference number

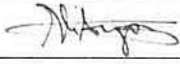

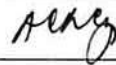

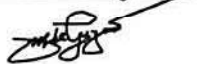

Business Requirements Document**Renewal Addendum****Approval****Approval**

This document has been approved as the official Business Requirements Document for the RMEL Phase 2 – Online Dispositioning request.

Upon approval of this document, changes will be permitted until the conclusion of the service definition phase. Any changes made during service definition must be accompanied by a Minutes of the Meeting (MoM) document, signifying the change. Once the service build commences, any further changes will be subject to the project's change management process.

Business Needs and Requirements

I. Executive Summary (What do you need?)

Currently, BDO Insurance and Broker System manage dispositions for expiring policies using spreadsheets. This process relies heavily on IT for policy extraction, bulk uploading of dispositioned accounts, and generation of text file for Renewal Advice. The Business Unit aims to enhance the process efficiency by automating workflows, minimizing external dependencies and manual intervention, and generating clear reports to track the renewal status of each policy.

II. Business Objective (Why do you need it?)

a. Business Goals

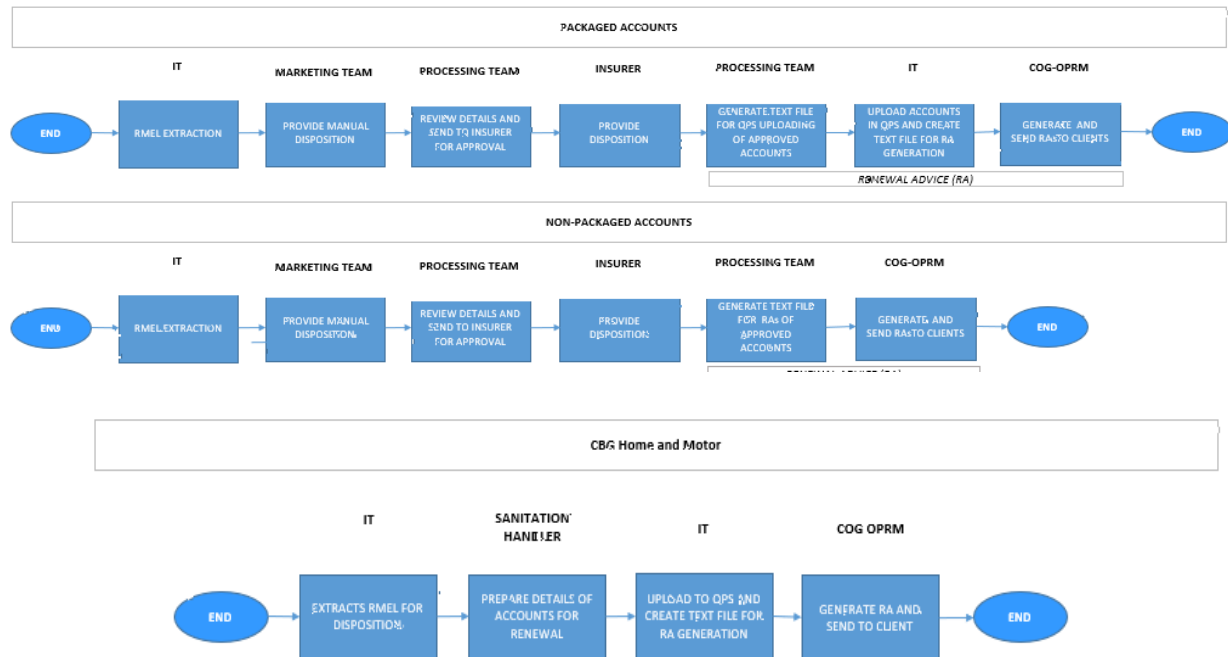

- ☐ Revenue
- ☐ Cost Savings
- ☐ Compliance/Regulatory Requirement *(attach the related law being addressed)*
- ☐ Customer Experience
- ☒ Others:
 1. To automate workflow processes to reduce manual tasks and improve efficiency
 2. To enable self-service capabilities for the Business Units to view the expiring policies, provide disposition and generate Renewal Advice.
 3. To reduce errors, cause by manual handling and integrating automated validation and standardize processing
 4. To develop a clear and comprehensive reporting and real-time monitoring system for statuses of the expiring policies

b. Benefits (Optional)

III. What is the current process? (Before)

- Heavily dependent on IT for RMEL extraction
- Disposition is manually done via a spreadsheet
- No workflow - communications are done via email
- Uploading to QPS and auto RMEL text file for RAs supports packaged accounts only. These are manually done by the Business Units for Non-packaged accounts and exception handling
- Manual monitoring of renewal account status

Note: For infrastructure projects, please indicate if there is no process change.

IV. What is the envisioned process? (After)

- Single process in handling packaged and non-packaged accounts
- BU can dynamically select the date range and extract the RMEL without IT dependency
- In System disposition with workflow (per stage)
- Export list of accounts per Insurer for approval
- Monitor the renewal status of each account
- IT will still provide the text file for RA generation but BU will be capable to generate Renewal Advice/s (RAs) as needed and save it to a designated folder

Note: For infrastructure projects, please indicate if there is no process change.

V. Table of Business Requirements

State key capabilities (ex: data encoding, file uploads, report generation, etc.) required by business for this request. Provide the business requirement of each key capability required in the table below. Map the key capabilities to the business requirements by matching their BRID (ex: Key capability 1 should match with all BRID1.#)

Business Key Capabilities:

User access accounts based on his/her role (i.e. Team Leaders can only view the accounts under his/her Team, etc.)

Business Requirements					
BR ID	Process Step	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
		A. As a Marketing Team Leader, I want to be able to...			
BRD 1.001.1		I. Log in as a Marketing Team Leader	a. Access the module/application using any BDO issued device	Result: User should be able to access the module/application using any BDO issued device and view all the accounts that were extracted Negative Scenario: User cannot access the module/application using any BDO issued device and view all the accounts that were extracted	must have
BRD 1.001.1.1			1. Log in with a Marketing Team Leader user profile	Result: User should be able to log in with a Marketing Team Leader user profile Negative Scenario: User cannot log in with a Marketing Team Leader user profile	must have
BRD 1.001.2.1			2. Receive the inactivity warning (15 minutes)	Result: User should be able to receive the inactivity warning after 15 minutes of inactivity Negative Scenario: User did not receive the inactivity warning after 15 minutes of inactivity	must have
BRD 1.001.3.1			3. Receive warning prior to system triggered log out (30 minutes)	Result: User should be able to receive warning 30 minutes prior to system triggered log out Negative Scenario: User did not receive warning 30 minutes prior to system triggered log out	must have
BRD 1.002.1		II. Open the Application in multiple tabs	a. Open the module/application in multiple tabs	Result: User should be able to open the module/application in multiple tabs Negative Scenario: User cannot open the module/application in multiple tabs	must have
BRD 1.003.1	1	III. Generate the List of Expiring Accounts	a. Select the date range of the List of Expiring Accounts	Result: User should be able to select the date range of the list of expiring accounts Negative Scenario: User cannot select the date range of the list of expiring accounts	must have

BRD 1.003.1.1	1		1. Select the month, day and year	Result: User should be able to select the month, day and year Negative Scenario: User cannot select the month, day and year	must have
BRD 1.003.2	1		b. Change the selected date range	Result: User should be able to change the selected date range Negative Scenario: User cannot change the selected date range	must have
BRD 1.003.3	1		c. Filter Criteria	Result: User should be able to filter criteria Negative Scenario: User cannot filter criteria	must have
BRD 1.003.3.1	1		1. Select single, multiple, select all except and all Unit Head from the drop-down	Result: User should be able to select single, multiple, select all except and all unit head from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Unit head from the drop-down	must have
BRD 1.003.3.1.2	1		2. Select single, multiple, select all except and all business Origin from the drop-down	Result: User should be able to select single, multiple, select all except and all business origin from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all business origin from the drop-down	must have
BRD 1.003.3.1.3	1		3. Select single, multiple, select all except and all account type from the drop-down	Result: User should be able to select single, multiple, select all except and all account type from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all account type from the drop-down	must have
BRD 1.003.3.1.4	1		4. Select single, multiple, select all except and all Region from the drop-down	Result: User should be able to select single, multiple, select all except and all Region from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Region from the drop-down	must have

BRD 1.003.3.1.5	1		5. Select single, multiple, select all except and all Area from the drop-down	Result: User should be able to select single, multiple, select all except and all area from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Area from the drop-down	must have
BRD 1.003.3.1.6	1		6. Select single, multiple, select all except and all Invoicing Branch from the drop-down	Result: User should be able to select single, multiple, select all except and all Invoicing branch from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all invoicing branch from the drop-down	must have
BRD 1.003.3.1.7	1		7. Select single, multiple, select all except and all Risk Code from the drop-down	Result: User should be able to select single, multiple, select all except and all Risk code from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Risk code from the drop-down	must have
BRD 1.003.3.1.8	1		8. Select single, multiple, select all except and all Market Segment from the drop-down	Result: User should be able to select single, multiple, select all except and all Market segment from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Market segment from the drop-down	must have
BRD 1.003.3.1.9	1		9. Select single, multiple, select all except and all Department Name from the drop-down	Result: User should be able to select single, multiple, select all except and all Department name from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Department name from the drop-down	must have
BRD 1.003.3.1.10	1		10. Select single, multiple, select all except and all account Officer from the drop-down	Result: User should be able to select single, multiple, select all except and all account officer from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all account officer from the drop-down	must have

BRD 1.003.3.1.11	1		11. Cancel the selected filter	Result: User should be able to cancel the selected filter Negative Scenario: User cannot cancel the selected filter	must have
BRD 1.003.3.1.12	1		12. Clear the selected filter	Result: User should be able to clear the selected filter Negative Scenario: User cannot clear the selected filter	must have
BRD 1.003.3.1.13	1		13. Apply filter criteria	Result: User should be able to apply filter criteria Negative Scenario: User cannot apply filter criteria	must have
BRD 1.003.4.1	1		d. View the generated List of Expiring Accounts (display all accounts in 1 view using a scroll bar)	Result: User should be able to view the generated list of expiring accounts (display all accounts in 1 view using a scroll bar) Negative Scenario: User cannot view the generated list of expiring accounts. Not all accounts are displayed in 1 view using a scroll bar	must have
BRD 1.003.4.1.1	1		1. View the generated List of Expiring accounts with below columns:	Result: User should be able to view the generated list of expiring accounts with the required details Negative Scenario: User cannot view the generated list of expiring accounts with the required details	must have
BRD 1.003.4.1.1.1	1		1.1 Expiring EBIX Invoice No.	Result: Expiring Ebix invoice number should be present in the list Negative Scenario: Expiring Ebix invoice number is not present in the list	must have
BRD 1.003.4.1.1.2	1		1.2 Renewal Reference No.	Result: Renewal Reference number should be present in the list Negative Scenario: Renewal Reference number is not present in the list	must have
BRD 1.003.4.1.1.3	1		1.3 BDOIsys Reference No.	Result: BDOIsys Reference No. should be present in the list Negative Scenario: BDOIsys Reference No. is not present in the list	must have

BRD 1.003.4.1.1. 4	1		1.4 Cover No.	Result: Cover No. should be present in the list Negative Scenario: Cover No. is not present in the list	must have
BRD 1.003.4.1.1. 5	1		1.5 Version No.	Result: Version No. should be present in the list Negative Scenario: Version No. is not present in the list	must have
BRD 1.003.4.1.1. 6	1		1.6 Invoicing Branch	Result: Invoicing Branch should be present in the list Negative Scenario: Invoicing Branch is not present in the list	must have
BRD 1.003.4.1.1. 7	1		1.7 Department Code	Result: Department Code should be present in the list Negative Scenario: Department Code is not present in the list	must have
BRD 1.003.4.1.1. 8	1		1.8 Department Name	Result: Department Name should be present in the list Negative Scenario: Department Name is not present in the list	must have
BRD 1.003.4.1.1. 9	1		1.9 Unit Head	Result: Unit Head should be present in the list Negative Scenario: Unit Head is not present in the list	must have
BRD 1.003.4.1.1. 10	1		1.10 Client Name	Result: Client Name should be present in the list Negative Scenario: Client Name is not present in the list	must have
BRD 1.003.4.1.1. 11	1		1.11 Assured's Name	Result: Assured's Name should be present in the list Negative Scenario: Assured's Name is not present in the list	must have
BRD 1.003.4.1.1. 12	1		1.12 Business Origin	Result: Business Origin should be present in the list Negative Scenario: Business Origin is not present in the list	must have

BRD 1.003.4.1.1. 13	1		1.13 Account Officer	Result: Account Officer should be present in the list Negative Scenario: Account Officer is not present in the list	must have
BRD 1.003.4.1.1. 14	1		1.14 Expiring Policy No.	Result: Expiring Policy No. should be present in the list Negative Scenario: Expiring Policy No. is not present in the list	must have
BRD 1.003.4.1.1. 15	1		1.15 Insurance Company	Result: Insurance Company should be present in the list Negative Scenario: Insurance Company is not present in the list	must have
BRD 1.003.4.1.1. 16	1		1.16 Risk Code	Result: Risk Code should be present in the list Negative Scenario: Risk Code is not present in the list	must have
BRD 1.003.4.1.1. 17	1		1.17 Risk Name	Result: Risk Name should be present in the list Negative Scenario: Risk Name is not present in the list	must have
BRD 1.003.4.1.1. 18	1		1.18 Risk Description	Result: Risk Description should be present in the list Negative Scenario: Risk Description is not present in the list	must have
BRD 1.003.4.1.1. 19	1		1.19 Renewal Stage/Status	Result: Renewal Stage/Status should be present in the list Negative Scenario: Renewal Stage/Status is not present in the list	must have
BRD 1.003.4.1.1. 20	1		1.20 Renewal Disposition	Result: Renewal Disposition should be present in the list Negative Scenario: Renewal Disposition is not present in the list	must have
BRD 1.003.4.1.1. 21	1		1.21 Disposition Remarks	Result: Disposition Remarks should be present in the list Negative Scenario: Disposition Remarks is not present in the list	must have

BRD 1.003.4.1.1.22	1		1.21 Number of Claims	Result: Number of Claims should be present in the list Negative Scenario: Number of Claims is not present in the list	must have
BRD 1.003.4.1.1.23	1		1.21 Status of Each claim	Result: Status of Claims should be present in the list Negative Scenario: Status of Claims is not present in the list	must have
BRD 1.003.4.1.1.24	1		1.21 Amount of Outstanding Premium	Result: Outstanding Premium should be present in the list Negative Scenario: Outstanding Premium is not present in the list	must have
BRD 1.003.4.1.2	1		2. Capture expired/expiring (within the identified date range) and unbooked account	Result: User should be able to capture expired/expiring (within the identified date range) and unbooked account Negative Scenario: User cannot should be able to capture expired/expiring (within the identified date range) and unbooked account	must have
BRD 1.003.4.1.3	1		3. Filter each column	Result: User should be able to filter each column Negative Scenario: User cannot filter each column	must have
BRD 1.003.4.1.4	1		4. Search specific information from the list (i.e. similar to control F function)	Result: User should be able to search specific information from the list (i.e. similar to control f function) Negative Scenario: User cannot search specific information from the list (i.e. similar to control f function)	must have
BRD 1.003.5	1		e. Download the generated list in a .xlsx format when needed	Result: User should be able to download the generated list in a .xlsx format when needed Negative Scenario: User cannot download the generated list in a .xlsx format when needed	must have

BRD 1.003.6	1		f. Save the generated list in a .xlsx format when needed	Result: User should be able to save the generated list in a .xlsx format when needed Negative Scenario: User cannot save the generated list in a .xlsx format when needed	must have
BRD 1.003.7	1		g. Print the generated list in a .xlsx format when needed	Result: User should be able to print the generated list in a .xlsx format when needed Negative Scenario: User cannot print the generated list in a .xlsx format when needed	must have
BRD 1.003.7.1	1		1. Print preview option	Result: User should be able to preview the list prior to printed Negative Scenario: User cannot preview the list prior to printed	must have
BRD 1.003.7.2	1		2. Print setting options	Result: User should be able to customize printing via the settings Negative Scenario: User cannot customize printing via the settings	must have
BRD 1.003.7.3	1		3. Automatically tag non-renewable risk codes as "Not for renewal" and should not be part of the list for assignment. There should be a maintenance for these risk codes.	Result: User should be able to automatically tag non-renewable risk codes as "Not for renewal" and exclude it in the list for assignment. There should be a maintenance for these risk codes. Negative Scenario: User cannot automatically tag non-renewable risk codes as "Not for renewal" and/or still part of the list for assignment. Risk codes not maintained.	must have
BRD 1.003.7.3.1	1		3.1. System should automatically send Not for Renewal Letter (NFR)	Result: NFR should be automatically sent to client upon tagging Negative Scenario: NFR was not automatically sent to client after tagging	must have
BRD 1.004.1	1	IV. View Account	a. View the complete renewal fields of the expiring account	Result: User should be able to view the complete renewal fields of the expiring account Negative Scenario: User cannot view the complete renewal fields of the expiring account	must have

BRD 1.004.1.1	1		1. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 1.004.1.2	1		2. View the complete renewal fields of the selected account from the generated expiring account list.	Result: User should be able to view the complete renewal fields of the selected account. Should reflect any updates done on the account. Negative Scenario: User cannot view the complete renewal fields of the selected account. Does not reflect any updates done on the account.	must have
BRD 1.004.1.3	1		3. Download the account details as needed in a .pdf or .xlsx format	Result: User should be able to download the account details as needed in a .pdf or .xlsx format Negative Scenario: User cannot download the account details as needed in a .pdf or .xlsx format	must have
BRD 1.004.1.4	1		4. Save the account details as needed	Result: User should be able to save the account details as needed Negative Scenario: User cannot save the account details as needed	must have
BRD 1.004.1.5	1		5. Print the account details as needed	Result: User should be able to print the account details as needed Negative Scenario: User cannot print the account details as needed	must have
BRD 1.004.1.5.1	1		5.1. Print preview option	Result: User should be able to preview the list prior to printed Negative Scenario: User cannot preview the list prior to printed	must have
BRD 1.004.1.5.2	1		5.2. Print setting options	Result: User should be able to customize printing via the settings Negative Scenario: User cannot customize printing via the settings	must have

BRD 1.005.1	1	V. Assign Accounts (For Non-CBG Only)	a. Assign account to Marketing Account Officers (AO)	Result: User should be able to assign account to Marketing Account Officers (AO) Negative Scenario: User cannot assign account to Marketing Account Officers (AO)	must have
BRD 1.005.1.1	1		1. Select account/s	Result: User should be able to select account/s Negative Scenario: User cannot select account/s	must have
BRD 1.005.1.1.1	1		1.1 Select single, multiple, select all except and all account/s	Result: User should be able to select single, multiple, select all except and all account/s Negative Scenario: User cannot select single, multiple, select all except and all account/s	must have
BRD 1.005.1.1.2	1		1.2 Unselect account/s	Result: User should be able to unselect account/s Negative Scenario: User cannot unselect account/s	must have
BRD 1.005.1.2	1		2. Select the name of the Marketing AO	Result: User should be able to select the name of the Marketing Account Officer (AO) Negative Scenario: User cannot select the name of the Marketing Account Officer (AO)	must have
BRD 1.005.1.2.1	1		2.1 Search the name or ID of the Marketing AO	Result: User should be able to search the name or id of the Marketing Account Officer (AO) Negative Scenario: User cannot search the name or id of the Marketing Account Officer (AO)	must have
BRD 1.005.1.2.2	1		2.2 Select the name of the Marketing AO from the drop-down List	Result: User should be able to select the name of the Marketing Account Officer (AO) from the drop-down list Negative Scenario: User cannot select the name of the Marketing Account Officer (AO) from the drop-down list	must have

BRD 1.005.1.2.3	1		3. Tag the account to the assigned Marketing AO	Result: User should be able to tag the account to the assigned Marketing Account Officer (AO) Negative Scenario: User cannot tag the account to the assigned Marketing Account Officer (AO)	must have
BRD 1.005.1.2.4	1		4. Push the account to the next workflow	Result: User should be able to push the account to the next workflow Negative Scenario: User cannot push the account to the next workflow	must have
BRD 1.005.2	1		b. Re-assign account to another Marketing Account Officers (AO)	Result: User should be able to re-assign account to another Marketing Account Officer (AO) Negative Scenario: User cannot re-assign account to another Marketing Account Officer (AO)	must have
BRD 1.006.1	1	VI. Transfer to account to other units	a. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 1.006.2	1		b. View details of the selected account	Result: User should be able to view details of the selected account. Should reflect any updates done on the account. Negative Scenario: User cannot view details of the selected account. Cannot reflect any updates done on the account.	must have
BRD 1.006.3	1		c. Select from the drop-down the Marketing unit where the account will be transferred to	Result: User should be able to select from the drop-down the Marketing Unit where the account will be transferred to Negative Scenario: User cannot select from the drop-down the Marketing Unit where the account will be transferred to	must have
BRD 1.006.4	1		d. Submit transfer request	Result: User should be able to submit transfer request Negative Scenario: User cannot submit transfer request	must have

BRD 1.006.5	1		e. Push the account to the next workflow	Result: User should be able to push the account to the next workflow Negative Scenario: User cannot push the account to the next workflow	must have
BRD 1.007.1	1	VII. Receive account transfer requests from other units	a. Receive notification on the transferred account/s from other unit	Result: User should be able to receive notification on the transferred account/s from other unit Negative Scenario: User cannot receive notification on the transferred account/s from another unit	must have
BRD 1.007.2	1		b. View flag on the transferred account/s	Result: User should be able to see flag on the transferred account/s Negative Scenario: User cannot see flag on the transferred account/s	must have
BRD 1.007.3	1		c. Accept transferred account/s	Result: User should be able to accept transferred account/s Negative Scenario: User cannot accept transferred account/s	must have
BRD 1.007.3.1	1		1. Add accepted accounts to the list of accounts for assignment to Marketing AO	Result: User should be able to see the accepted accounts to the list of accounts for assignment to Marketing AO Negative Scenario: User cannot see accepted accounts to the list of accounts for assignment to Marketing AO	must have
BRD 1.007.4	1		d. Decline transferred account/s	Result: User should be able to decline transferred account/s Negative Scenario: User cannot decline transferred account/s	must have
BRD 1.007.4.1	1		1. Add remarks	Result: User should be able to add remarks Negative Scenario: User cannot add remarks	must have
BRD 1.007.4.2	1		2. save remarks	Result: User should be able to save remarks Negative Scenario: User cannot save remarks	must have

BRD 1.007.5	1		e. Push the account to the next workflow	Result: User should be able to push the account to the next workflow Negative Scenario: User cannot push the account to the next workflow	must have
BRD 1.008.1	2	VIII. Review and Post Disposition Accounts (For Non-CBG only)	a. Review Accounts	Result: User should be able to review accounts Negative Scenario: User cannot review accounts	must have
BRD 1.008.1.1	2		1. View the list of all dispositioned accounts (display all accounts in 1 view using a scroll bar). Any updates/endorsement should reflect on the mother policy	Result: User should be able to view the list of dispositioned accounts (display all accounts in 1 view using a scroll bar). Any updates/endorsement should reflect on the mother policy Negative Scenario: User cannot view the list of dispositioned accounts or accounts not displayed in 1 view using a scroll bar. Updates/Endorsements does not reflect on the mother policy.	must have
BRD 1.008.1.2	2		2. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 1.008.1.3	2		3. View the complete renewal fields of the selected account	Result: User should be able to view the complete renewal fields of the selected account Negative Scenario: User cannot view the complete renewal fields of the selected account	must have
BRD 1.008.1.4	2		4. Automatically tag the status as "review in progress" when Accounts are not yet posted	Result: User should be able to see the status automatically tagged as "review in progress" when accounts are not yet posted Negative Scenario: User cannot see the status automatically tagged as "review in progress" when accounts are not yet posted	must have
BRD 1.008.2	2		b. Return account/s	Result: User should be able to return account/s Negative Scenario: User cannot return account/s	must have

BRD 1.008.2.1	2		1. Select single, multiple, all except and all account/s	Result: User should be able to select single, multiple, all except and all account/s Negative Scenario: User cannot select single, multiple, all except and all account/s	must have
BRD 1.008.2.2	2		2. Tag the status as returned	Result: User should be able to tag the status as returned Negative Scenario: User cannot tag the status as returned	must have
BRD 1.008.2.3	2		3. Add remarks	Result: User should be able to add remarks Negative Scenario: User cannot add remarks	must have
BRD 1.008.2.4	2		4. Save remarks	Result: User should be able to save remarks Negative Scenario: User cannot save remarks	must have
BRD 1.008.2.5	2		5. Return to the assigned Marketing AO	Result: User should be able to return to the assigned Marketing AO Negative Scenario: User cannot return to the assigned Marketing AO	must have
BRD 1.008.2.6	2		6. Automatically flag the returned account	Result: System to automatically flag the returned account Negative Scenario: System cannot automatically flag the returned account	must have
BRD 1.008.2.7	2		7. Push the account/s to the next workflow	Result: User should be able to push the account/s to the next workflow Negative Scenario: User cannot push the account/s to the next workflow	must have
BRD 1.008.3	2		c. Post account/s	Result: User should be able to post account/s Negative Scenario: User cannot post account/s	must have

BRD 1.008.3.1	2		1. Select single, multiple, all except and all account/s	Result: User should be able to select single, multiple, all except and all account/s Negative Scenario: User cannot select single, multiple, all except and all account/s	must have
BRD 1.008.3.2	2		2. Review the account details	Result: User should be able to post the account/s Negative Scenario: User cannot post the account/s	must have
BRD 1.008.3.3	2		3. Post the account/s	Result: User should be able to push the account/s to the next workflow Negative Scenario: User cannot push the account/s to the next workflow	must have
BRD 1.008.3.4	2		4. Push the account/s to the next workflow	Result: User should be able to push the account to the next workflow Negative Scenario: User cannot push the account to the next workflow	must have
BRD 1.009.1	1 to 6	IX. Generate Report Discussed - 11/20/2025	a. Select expiry date range for each report	Result: User should be able to select expiry date range for each report Negative Scenario: User cannot select expiry date range for each report	must have
BRD 1.009.1.1	1 to 6		1. Select month, day and year	Result: User should be able to select month, day and year Negative Scenario: User cannot select month, day and year	must have
BRD 1.009.1.2	1 to 6		2. Change the selected date range	Result: User should be able to change the selected date range Negative Scenario: User cannot change the selected date range	must have
BRD 1.009.2	1 to 6		b. Select single, multiple, all and all except criteria for each report	Result: User should be able to select single, multiple, all and all except criteria for each report Negative Scenario: User cannot select single, multiple, all and all except criteria for each report	must have

BRD 1.009.2.1	1 to 6		1. Select single, multiple, all except and all Unit Head from the drop-down list	Result: User should be able to select single, multiple, all except and all unit head from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all unit head from the drop-down list	must have
BRD 1.009.2.2	1 to 6		2. Search specific Unit Head from the drop-down list	Result: User should be able to search specific unit head from the drop-down list Negative Scenario: User cannot search specific unit head from the drop-down list	must have
BRD 1.009.2.3	1 to 6		3. Select single, multiple, all except and all Risk Code from the drop-down list	Result: User should be able to select single, multiple, all except and all risk code from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all risk code from the drop-down list	must have
BRD 1.009.2.4	1 to 6		4. Search specific Risk Code from the drop-down list	Result: User should be able to search specific risk code from the drop-down list Negative Scenario: User cannot search specific risk code from the drop-down list	must have
BRD 1.009.2.5	1 to 6		5. Select single, multiple, all except and all Insurance Company from the drop-down list	Result: User should be able to select single, multiple, all except and all insurance company from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all insurance company from the drop-down list	must have
BRD 1.009.2.6	1 to 6		6. Search specific Insurance Company from the drop-down list	Result: User should be able to search specific insurance company from the drop-down list Negative Scenario: User cannot search specific insurance company from the drop-down list	must have
BRD 1.009.2.7	1 to 6		7. Select single, multiple, all except and all Insurance Group from the drop-down list	Result: User should be able to select single, multiple, all except and all insurance group from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all insurance group from the drop-down list	must have

BRD 1.009.2.8	1 to 6		8. Search specific Insurance Group from the drop-down list	Result: User should be able to search specific insurance group from the drop-down list Negative Scenario: User cannot search specific insurance group from the drop-down list	must have
BRD 1.009.2.9	1 to 6		9. Select single, multiple, all except and all Business Origin from the drop-down list	Result: User should be able to select single, multiple, all except and all business origin from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all business origin from the drop-down list	must have
BRD 1.009.2.10	1 to 6		10. Search specific Business Origin from the drop-down list	Result: User should be able to search specific business origin from the drop-down list Negative Scenario: User cannot search specific business origin from the drop-down list	must have
BRD 1.009.2.11	1 to 6		11. Select single, multiple, all except and all Market Category from the drop-down list	Result: User should be able to select single, multiple, all except and all market category from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all market category from the drop-down list	must have
BRD 1.009.2.12	1 to 6		12. Search specific Market Category from the drop-down list	Result: User should be able to search specific market category from the drop-down list Negative Scenario: User cannot search specific market category from the drop-down list	must have
BRD 1.009.2.13	1 to 6		13. Select single, multiple, all except and all BDO Branch from the drop-down list	Result: User should be able to select single, multiple, all except and all BDO branch from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDO branch from the drop-down list	must have
BRD 1.009.2.14	1 to 6		14. Search specific BDO Branch from the drop-down list	Result: User should be able to search specific BDO branch from the drop-down list Negative Scenario: User cannot search specific BDO branch from the drop-down list	must have

BRD 1.009.2.15	1 to 6		15. Select single, multiple, all except and all BDO Area from the drop-down list	Result: User should be able to select single, multiple, all except and all BDO area from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDO area from the drop-down list	must have
BRD 1.009.2.16	1 to 6		16. Search specific BDO Area from the drop-down list	Result: User should be able to search specific BDO area from the drop-down list Negative Scenario: User cannot search specific BDO area from the drop-down list	must have
BRD 1.009.2.17	1 to 6		17. Select single, multiple, all except and all Region from the drop-down list	Result: User should be able to select single, multiple, all except and all region from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all region from the drop-down list	must have
BRD 1.009.2.18	1 to 6		18. Search specific Region from the drop-down list	Result: User should be able to search specific region from the drop-down list Negative Scenario: User cannot search specific region from the drop-down list	must have
BRD 1.009.2.19	1 to 6		19. Select single, multiple, all except and all Bank Officer from the drop-down list	Result: User should be able to select single, multiple, all except and all bank officer from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all bank officer from the drop-down list	must have
BRD 1.009.2.20	1 to 6		20. Search specific Bank Officer from the drop-down list	Result: User should be able to search specific bank officer from the drop-down list Negative Scenario: User cannot search specific bank officer from the drop-down list	must have
BRD 1.009.2.21	1 to 6		21. Select single, multiple, all except and all Bank Unit from the drop-down list	Result: User should be able to select single, multiple, all except and all bank unit from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all bank unit from the drop-down list	must have

BRD 1.009.2.22	1 to 6		22. Search specific Bank Unit from the drop-down list	Result: User should be able to search specific bank unit from the drop-down list Negative Scenario: User cannot search specific bank unit from the drop-down list	must have
BRD 1.009.2.23	1 to 6		23. Select single, multiple, all except and all Product Code from the drop-down list	Result: User should be able to select single, multiple, all except and all product code from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all product code from the drop-down list	must have
BRD 1.009.2.24	1 to 6		24. Search specific Product Code from the drop-down list	Result: User should be able to search specific product code from the drop-down list Negative Scenario: User cannot search specific product code from the drop-down list	must have
BRD 1.009.2.25	1 to 6		25. Select single, multiple, all except and all Account Type from the drop-down list	Result: User should be able to select single, multiple, all except and all account type from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all account type from the drop-down list	must have
BRD 1.009.2.26	1 to 6		26. Search specific Account Type drop-down list	Result: User should be able to search specific account type drop-down list Negative Scenario: User cannot search specific account type drop-down list	must have
BRD 1.009.2.27	1 to 6		27. Select single, multiple, all except and all BDOI Branch from the drop-down list	Result: User should be able to select single, multiple, all except and all BDOI branch from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDOI branch from the drop-down list	must have
BRD 1.009.2.28	1 to 6		28. Search specific BDOI Branch from the drop-down list	Result: User should be able to search specific BDOI branch from the drop-down list Negative Scenario: User cannot search specific BDOI branch from the drop-down list	must have

BRD 1.009.2.29	1 to 6		29. Select single, multiple, all except and all Location from the drop-down list	Result: User should be able to select single, multiple, all except and all location from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all location from the drop-down list	must have
BRD 1.009.2.30	1 to 6		30. Search specific Location from the drop-down list	Result: User should be able to search specific location from the drop-down list Negative Scenario: User cannot search specific location from the drop-down list	must have
BRD 1.009.2.31	1 to 6		31. Select single, multiple, all except and all Account Broker from the drop-down list	Result: User should be able to select single, multiple, all except and all account broker from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all account broker from the drop-down list	must have
BRD 1.009.2.32	1 to 6		32. Search specific Account Broker from the drop-down list	Result: User should be able to search specific account broker from the drop-down list Negative Scenario: User cannot search specific account broker from the drop-down list	must have
BRD 1.009.2.33	1 to 6		33. Select single, multiple, all except and all Business Type from the drop-down list	Result: User should be able to select single, multiple, all except and all business type from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all business type from the drop-down list	must have
BRD 1.009.2.34	1 to 6		34. Search specific Business Type from the drop-down list	Result: User should be able to search specific business type from the drop-down list Negative Scenario: User cannot search specific business type from the drop-down list	must have
BRD 1.009.2.35	1 to 6		35. Select single, multiple, all except and all Customer Segment from the drop-down list	Result: User should be able to select single, multiple, all except and all customer segment from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all customer segment from the drop-down list	must have

BRD 1.009.2.36	1 to 6		36. Search specific Customer Segment from the drop-down list	Result: User should be able to search specific customer segment from the drop-down list Negative Scenario: User cannot search specific customer segment from the drop-down list	must have
BRD 1.009.2.37	1 to 6		37. Select single, multiple, all except and all Specific Client from the drop-down list	Result: User should be able to select single, multiple, all except and all specific client from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all specific client from the drop-down list	must have
BRD 1.009.2.38	1 to 6		38. Search specific Client from the drop-down list	Result: User should be able to search specific Client from the drop-down list Negative Scenario: User cannot search specific Client from the drop-down list	must have
BRD 1.009.2.39	1 to 6		39. Select single, multiple, all except and all Renewal Status from the drop-down list	Result: User should be able to select single, multiple, all except and all renewal status from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all renewal status from the drop-down list	must have
BRD 1.009.2.40	1 to 6		40. Search specific Renewal Status from the drop-down list	Result: User should be able to search specific renewal status from the drop-down list Negative Scenario: User cannot search specific renewal status from the drop-down list	must have
BRD 1.009.3	1 to 6		c. Generate a report showing the overall status of the renewal accounts with the following information per invoice	Result: User should be able to generate a report showing the overall status of the renewal accounts with the following information per invoice Negative Scenario: User cannot generate a report showing the overall status of the renewal accounts with the following information per invoice	must have

BRD 1.009.3.1	1 to 6		1. Display the following information per invoice (display all accounts in 1 view using a scroll bar)	Result: User should be able to display the following information per invoice. Display all accounts in 1 view using a scroll bar Negative Scenario: User cannot display the following information per invoice. Cannot display all accounts in 1 view using a scroll bar	must have
BRD 1.009.3.1.1	1 to 6		5.1. Unit Head	Result: User should be able to see a column with the complete list of Unit Heads Negative Scenario: User cannot see a column with the complete list of Unit Heads	must have
BRD 1.009.3.1.2	1 to 6		5.2. Account Broker	Result: User should be able to see a column with the account broker value Negative Scenario: User cannot see a column with account broker value	must have
BRD 1.009.3.1.3	1 to 6		5.3. Business Origin	Result: User should be able to see a column with business origin value Negative Scenario: User cannot see a column with business origin value	must have
BRD 1.009.3.1.4	1 to 6		5.4. Bank Officer	Result: User should be able to see a column with bank officer value Negative Scenario: User cannot see a column with bank officer value	must have
BRD 1.009.3.1.5	1 to 6		5.5. Renewal Reference	Result: User should be able to see a column with renewal reference value Negative Scenario: User cannot see a column with renewal reference value	must have
BRD 1.009.3.1.6	1 to 6		5.6. Expiring Ebix Invoice No	Result: User should be able to see a column with expiring Ebix invoice no value Negative Scenario: User cannot see a column with expiring Ebix invoice no value	must have

BRD 1.009.3.1.7	1 to 6		5.7. Assured	Result: User should be able to see a column with assured value Negative Scenario: User cannot see a column with assured value	must have
BRD 1.009.3.1.8	1 to 6		5.8. Type of Risk	Result: User should be able to see a column with type of risk value Negative Scenario: User cannot see a column with type of risk value	must have
BRD 1.009.3.1.9	1 to 6		5.9. Expiring Invoice Inception Date	Result: User should be able to see a column with expiring invoice inception date value Negative Scenario: User cannot see a column with expiring invoice inception date value	must have
BRD 1.009.3.1.10	1 to 6		5.10. Expiring Invoice Expiry Date	Result: User should be able to see a column with expiring invoice expiry date value Negative Scenario: User cannot see a column with expiring invoice expiry date value	must have
BRD 1.009.3.1.11	1 to 6		5.11. Renewal Reference Inception Date	Result: User should be able to see a column with renewal reference inception date value Negative Scenario: User cannot see a column with renewal reference inception date value	must have
BRD 1.009.3.1.12	1 to 6		5.12. Renewal Reference Expiry Date	Result: User should be able to see a column with renewal reference expiry date value Negative Scenario: User cannot see a column with renewal reference expiry date value	must have
BRD 1.009.3.1.13	1 to 6		5.13. Expiring Invoice Policy Number	Result: User should be able to see a column with expiring invoice policy number value Negative Scenario: User cannot see a column with expiring invoice policy number value	must have

BRD 1.009.3.1.14	1 to 6		5.14. Account Type	Result: User should be able to see a column with the complete list of account type Negative Scenario: User cannot see a column with the complete list of account type	must have
BRD 1.009.3.1.15	1 to 6		5.15. Basic Premium	Result: User should be able to see a column with basic premium value Negative Scenario: User cannot see a column with basic premium value	must have
BRD 1.009.3.1.16	1 to 6		5.16. Gross Premium	Result: User should be able to see a column with gross premium value Negative Scenario: User cannot see a column with gross premium value	must have
BRD 1.009.3.1.17	1 to 6		5.17. Premium Rate	Result: User should be able to see a column with premium rate value Negative Scenario: User cannot see a column with premium rate value	must have
BRD 1.009.3.1.18	1 to 6		5.18. Commission Rate	Result: User should be able to see a column with commission rate value Negative Scenario: User cannot see a column with commission rate value	must have
BRD 1.009.3.1.19	1 to 6		5.19. Total Sum Insured	Result: User should be able to see a column with total sum insured value Negative Scenario: User cannot see a column with total sum insured value	must have
BRD 1.009.3.1.20	1 to 6		5.20. Risk Description	Result: User should be able to see a column with risk description value Negative Scenario: User cannot see a column with risk description value	must have
BRD 1.009.3.1.21	1 to 6		5.21. Location of Risk	Result: User should be able to see a column with location of risk value Negative Scenario: User cannot see a column with location of risk value	must have

BRD 1.009.3.1.22	1 to 6		5.22. Address	Result: User should be able to see a column with address value Negative Scenario: User cannot see a column with address value	must have
BRD 1.009.3.1.23	1 to 6		5.23. Contact No(S).	Result: User should be able to see a column with contact number value Negative Scenario: User cannot see a column with contact number value	must have
BRD 1.009.3.1.24	1 to 6		5.24. Email Address	Result: User should be able to see a column with email address value Negative Scenario: User cannot email address value	must have
BRD 1.009.3.1.25	1 to 6		5.25. Region	Result: User should be able to see a column with region value Negative Scenario: User cannot see a column with region value	must have
BRD 1.009.3.1.26	1 to 6		5.26. Area	Result: User should be able to see a column with area value Negative Scenario: User cannot see a column with area value	must have
BRD 1.009.3.1.27	1 to 6		5.27. Branch	Result: User should be able to see a column with branch value Negative Scenario: User cannot see a column with branch value	must have
BRD 1.009.3.1.28	1 to 6		5.28. Insurer	Result: User should be able to see a column with insurer value Negative Scenario: User cannot see a column with insurer value	must have
BRD 1.009.3.1.29	1 to 6		5.29. Location	Result: User should be able to see a column with location value Negative Scenario: User cannot see a column with location value	must have

BRD 1.009.3.1.30	1 to 6		5.30. Mortgaged To BDO	Result: User should be able to see a column with Mortgaged To BDO value Negative Scenario: User cannot see a column with Mortgaged To BDO value	must have
BRD 1.009.3.1.31	1 to 6		5.31. Mortgagee Bank	Result: User should be able to see a column with mortgagee bank value Negative Scenario: User cannot see a column with mortgagee bank value	must have
BRD 1.009.3.1.32	1 to 6		5.32. PN Number	Result: User should be able to see a column with PN number value Negative Scenario: User cannot see a column with PN number value	must have
BRD 1.009.3.1.33	1 to 6		5.33. Hold Cover (HC)	Result: User should be able to see a column with hold cover (HC) value Negative Scenario: User cannot see a column with hold cover (HC) value	must have
BRD 1.009.3.1.34	1 to 6		5.34. HC End Date	Result: User should be able to see a column with HC end date value Negative Scenario: User cannot see a column with HC end date value	must have
BRD 1.009.3.1.35	1 to 6		5.35. Renewal Status	Result: User should be able to see a column with renewal status value Negative Scenario: User cannot see a column with renewal status value	must have
BRD 1.009.3.1.36	1 to 6		5.36. Reason for "Not For Renewal"	Result: User should be able to see a column with reason for not for renewal value Negative Scenario: User cannot see a column with reason for not for renewal value	must have
BRD 1.009.3.1.37	1 to 6		5.37. Remarks Of Acct Officer	Result: User should be able to see a column with remarks of acct officer value Negative Scenario: User cannot see a column with remarks of acct officer value	must have

BRD 1.009.3.2	1 to 6		2. Display a summary	Result: User should be able to display a summary Negative Scenario: User cannot display a summary	must have
BRD 1.009.3.2.1	1 to 6		2.1. Total No. of Booked	Result: User should be able to see the total no. of booked value Negative Scenario: User cannot see the total no. of booked value	must have
BRD 1.009.3.2.2	1 to 6		2.2. Total No. of Canceled	Result: User should be able to see the total no. of canceled value Negative Scenario: User cannot see the total no. of canceled value	must have
BRD 1.009.3.2.3	1 to 6		2.3. Total No. of Renewal - For Placement	Result: User should be able to see the total no. of renewal - for placement value Negative Scenario: User cannot see the total no. of renewal - for placement value	must have
BRD 1.009.3.2.4	1 to 6		2.4. Total No. of Renewal - For Proposal	Result: User should be able to see the total no. of renewal - for proposal value Negative Scenario: User cannot see total no. of renewal - for proposal value	must have
BRD 1.009.3.2.5	1 to 6		2.5. Total No. of Renewal - For ARF	Result: User should be able to see the total no. of renewal - for arf value Negative Scenario: User cannot see the total no. of renewal - for arf value	must have
BRD 1.009.3.2.6	1 to 6		2.6. Total No. of RA Processed	Result: User should be able to see the total no. of ra processed value Negative Scenario: User cannot see the total no. of ra processed value	must have
BRD 1.009.3.2.7	1 to 6		2.7. Total No. of Renewal - For RA Processing	Result: User should be able to see the total no. of renewal - for ra processing value Negative Scenario: User cannot see the total no. of renewal - for ra processing value	must have

BRD 1.009.3.2.8	1 to 6		2.8. Total No. of Renew to TSU	Result: User should be able to see the total no. of renew to TSU value Negative Scenario: User cannot see the total no. of renew to TSU value	must have
BRD 1.009.3.2.9	1 to 6		2.9. Total No. of Returned to Marketing	Result: User should be able to see the total no. of returned to marketing value Negative Scenario: User cannot see the total no. of returned to marketing value	must have
BRD 1.009.3.2.10	1 to 6		2.10. Total No. of Awaiting Marketing TL Approval (For Renewal)	Result: User should be able to see the total no. of awaiting marketing TL approval (for renewal) value Negative Scenario: User cannot see total no. of awaiting marketing TL approval (for renewal) value	must have
BRD 1.009.3.2.11	1 to 6		2.11. Total No. of Awaiting Marketing TL Approval (For Quotation)	Result: User should be able to see the total no. of awaiting marketing TL approval (for quotation) value Negative Scenario: User cannot see the total no. of awaiting marketing TL approval (for quotation) value	must have
BRD 1.009.3.2.12	1 to 6		2.12. Total No. of Awaiting Marketing TL Approval (Not For Renewal)	Result: User should be able to see the no. of awaiting marketing TL approval (not for renewal) value Negative Scenario: User cannot see the no. of awaiting marketing TL approval (not for renewal) value	must have
BRD 1.009.3.2.13	1 to 6		2.13. Total No. of Awaiting Marketing TL Approval (Lost Business)	Result: User should be able to see the no. of awaiting marketing TL approval (lost business) value Negative Scenario: User cannot see the no. of awaiting marketing TL approval (lost business) value	must have
BRD 1.009.3.2.14	1 to 6		2.14. Total No. of Disapproved Accounts	Result: User should be able to see the total no. of disapproved accounts value Negative Scenario: User cannot see the total no. of disapproved accounts value	must have

BRD 1.009.3.2.15	1 to 6		2.15. Total No. of Not For Renewal Accounts	Result: User should be able to see the total no. of not for renewal accounts value Negative Scenario: User cannot see the total no. of not for renewal accounts value	must have
BRD 1.009.3.2.16	1 to 6		2.16. Total No. of Mortgaged for Lost Business	Result: User should be able to see the total no. of mortgaged lost business value Negative Scenario: User cannot see the total no. of mortgaged lost business value	must have
BRD 1.009.3.2.17	1 to 6		2.17. Total No. of Unrenewed Mortgaged For Proposal	Result: User should be able to see the total no. of unrenewed mortgaged for proposal value Negative Scenario: User cannot see the total no. of unrenewed mortgaged for proposal value	must have
BRD 1.009.3.2.18	1 to 6		2.18. Total No. of Unrenewed Mortgaged Transferred to Other Unit	Result: User should be able to see the total no. of unrenewed mortgaged transferred to other unit value Negative Scenario: User cannot see the total no. of unrenewed mortgaged transferred to other unit value	must have
BRD 1.009.3.2.19	1 to 6		2.19. Total No. of Mortgaged Loan Fully Paid	Result: User should be able to see the total no. of mortgaged loan fully paid value Negative Scenario: User cannot see the total no. of mortgaged loan fully paid value	must have
BRD 1.009.3.2.20	1 to 6		2.20. Unrenewed Mortgaged Awaiting Confirmation	Result: User should be able to see the unrenewed mortgaged awaiting confirmation value Negative Scenario: User cannot see the unrenewed mortgaged awaiting confirmation value	must have
BRD 1.009.3.2.21	1 to 6		2.21. Total No. of Mortgaged Booked under New Invoice No.	Result: User should be able to see the total no. of mortgaged booked under new invoice no. value Negative Scenario: User cannot see the total no. of mortgaged booked under new invoice no. value	must have

BRD 1.009.3.2.22	1 to 6		2.22. Total No. of Unrenewed Mortgaged with No Disposition	Result: User should be able to see the total no. of unrenewed mortgaged no disposition value Negative Scenario: User cannot see the total no. of unrenewed mortgaged no disposition value	must have
BRD 1.009.3.2.23	1 to 6		2.23. Total No. of Unrenewed Mortgaged to Other Bank	Result: User should be able to see the total no. of unrenewed mortgaged to other bank value Negative Scenario: User cannot see the total no. of unrenewed mortgaged to other bank value	must have
BRD 1.009.3.2.24	1 to 6		2.24. Total No. of Non- Mortgaged Lost Business	Result: User should be able to see the total no. of non- mortgaged lost business value Negative Scenario: User cannot see the total no. of non- mortgaged lost business value	must have
BRD 1.009.3.2.25	1 to 6		2.25. Total No. of Unrenewed Non- Mortgaged for Proposal	Result: User should be able to see the total no. of unrenewed non- mortgaged for proposal value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged for proposal value	must have
BRD 1.009.3.2.26	1 to 6		2.26. Total No. of Unrenewed Non- Mortgaged Transferred to Other Unit	Result: User should be able to see the total no. of unrenewed non- mortgaged transferred to other unit value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged transferred to other unit value	must have
BRD 1.009.3.2.27	1 to 6		2.27. Total No. of Non- Mortgaged Loan Fully Paid	Result: User should be able to see the total no. of non- mortgaged loan fully paid value Negative Scenario: User cannot see the total no. of non- mortgaged loan fully paid value	must have

BRD 1.009.3.2.28	1 to 6		2.28. Total No. of Unrenewed Non- Mortgaged Awaiting Confirmation from Client	Result: User should be able to see the total no. of unrenewed non- mortgaged awaiting confirmation from client value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged awaiting confirmation from client value	must have
BRD 1.009.3.2.29	1 to 6		2.29. Total No. of Non- Mortgaged Booked under Invoice No.	Result: User should be able to see the total no. of non- mortgaged booked under invoice no. value Negative Scenario: User cannot see the total no. of non- mortgaged booked under invoice no. value	must have
BRD 1.009.3.2.30	1 to 6		2.30. Total No. of Unrenewed Non- Mortgaged with No Disposition	Result: User should be able to see the total no. of unrenewed non- mortgaged no disposition value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged no disposition value	must have
BRD 1.009.3.2.31	1 to 6		2.31. Total No. of Unrenewed Non- Mortgaged to Other Bank	Result: User should be able to see the total no. of unrenewed non- mortgaged to other bank value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged to other bank value	must have
BRD 1.009.3.2.32	1 to 6		2.32. Total No. of Non- Renewable Accounts	Result: User should be able to see the total no. of non-renewable accounts value Negative Scenario: User cannot see the total no. of non-renewable accounts value	must have
BRD 1.009.3.2.33	1 to 6		2.33. Total No. of No Disposition	Result: User should be able to see the total no. of no disposition value Negative Scenario: User cannot see the total no. of no disposition value	must have
BRD 1.009.3.2.34	1 to 6		2.34. Total No. of Accounts	Result: User should be able to see the total no. of accounts value Negative Scenario: User cannot see the total no. of accounts value	must have

BRD 1.009.4	1 to 6		d. Download report	Result: User should not experience issue/s in downloading the report Negative Scenario: User experienced issue/s in downloading the report	must have
BRD 1.009.4.1	1 to 6		1. Download in a .xlsx format	Result: User should be able to download in a .xlsx format Negative Scenario: User cannot download in a .xlsx format	must have
BRD 1.009.4.2	1 to 6		2. Download in a .pdf format	Result: User should be able to download in a .pdf format Negative Scenario: User cannot download in a .pdf format	must have
BRD 1.009.5	1 to 6		e. Save the report in the desired location	Result: User should be able to save report in the desired location Negative Scenario: User cannot save report in the desired location	must have
BRD 1.009.5.1	1 to 6		1. Save in a .xlsx format	Result: User should be able to save in a .xlsx format Negative Scenario: User cannot save in a .xlsx format	must have
BRD 1.009.5.2	1 to 6		2. Save in a .pdf format	Result: User should be able to save in a .pdf format Negative Scenario: User cannot save in a .pdf format	must have
BRD 1.009.6	1 to 6		f. Print report	Result: User should be able to print report Negative Scenario: User cannot print report	must have
BRD 1.009.7	1 to 6		g. View the assigned accounts per Marketing AO in a dashboard	Result: User should be able to view the assigned accounts per Marketing AO in a dashboard Negative Scenario: User cannot view the assigned accounts per Marketing AO in a dashboard	must have

BRD 1.010.1	5	X. Generate Renewal Advice (RA) Start here - next meeting 11/26/2025	a. Select single, multiple, all except and all accounts	Result: User should be able to select single, multiple, all except and all accounts Negative Scenario: User cannot select single, multiple, all except and all accounts	must have
BRD 1.010.2	5		b. Generate RA for the selected account/s	Result: User should be able to generate ra for the selected account/s Negative Scenario: User cannot generate ra for the selected account/s	must have
BRD 1.010.2.1	5		1. Disable RA generation on locked accounts (account should be locked on the marketing side when the RA is generated)	Result: User should be able to not generate RA on locked accounts Negative Scenario: User can RA generate on locked accounts	must have
BRD 1.010.2.2	5		2. With visible identifier if the generated RA is for first notice or second notice	Result: User should be able to have a visible identifier if the generated RA is for first notice or second notice Negative Scenario: User has no visible identifier if the generated RA is for first notice or second notice	must have
BRD 1.010.3	5		c. View the generated RA	Result: User should be able to view the generated RA Negative Scenario: User cannot view the generated RA	must have
BRD 1.010.3.1	5		1. Select RA	Result: User should be able to select RA Negative Scenario: User cannot select RA	must have
BRD 1.010.3.2	5		2. Preview the details of the RA	Result: User should be able to preview the details of the RA Negative Scenario: User cannot preview the details of the RA	must have
BRD 1.010.3.3	5		3. Close the preview	Result: User should be able to close the preview screen Negative Scenario: User cannot close the preview screen	must have

BRD 1.010.4	5		d. Download the generated RA	Result: User should be able to download the generated RA Negative Scenario: User cannot download the generated RA	must have
BRD 1.010.4.1	5		1. Select single or multiple RA/s	Result: User should be able to select single or multiple RA/s Negative Scenario: User cannot select single or multiple RA/s	must have
BRD 1.010.4.2	5		2. Download single or multiple RA/s	Result: User should be able to download single or multiple RA/s Negative Scenario: User cannot download single or multiple RA/s	must have
BRD 1.010.5	5		e. Save the generated RA/s	Result: User should be able to save the generated RA/s Negative Scenario: User cannot save the generated RA/s	must have
BRD 1.010.5.1	5		1. Select single or multiple RA/s	Result: User should be able to select single or multiple RA/s Negative Scenario: User cannot select single or multiple RA/s	must have
BRD 1.010.5.2	5		2. Select the desired location	Result: User should be able to select the desired location Negative Scenario: User cannot select the desired location	must have
BRD 1.010.6	6		f. Extract the details required for RA sending	Result: User should be able to extract required details for RA sending Negative Scenario: User cannot extract details for RA sending	must have
BRD 1.010.7	6		g. Send RA in batch	Result: User should be able to send RAs in batch Negative Scenario: User cannot send RAs in batch	must have
BRD	6		1. Encrypt and add password prior	Result: RA should be encrypted and with password	Must

1.010.7.1			to sending Type text here	Negative Scenario: RA is not encrypted and/or no password	have
BRD 1.011.1	1	XI. Over ride Accounts	a. Override Accounts with Outstanding balance		
BRD 1.011.1.1	1		1. See flag on accounts with outstanding balance	Result: User should be able to see flag accounts with outstanding balance Negative Scenario: User cannot see flags accounts with outstanding balance	must have
BRD 1.011.1.2	1		2. Select single or multiple accounts with outstanding balance	Result: User should be able to select single or multiple accounts with outstanding balance Negative Scenario: User cannot select single or multiple accounts with outstanding balance	must have
BRD 1.011.1.3	1		3. Override single or multiple accounts with outstanding balance	Result: User should be able to override single or multiple accounts with outstanding balance Negative Scenario: User cannot override single or multiple accounts with outstanding balance	must have
		B. As a Marketing Account Officer (AO)/Admin, I want to be able to...			
BRD 2.001.1		I. Log in as a Marketing Account Officer (AO)/Admin	a. Access the module/application using any BDO issued device	Result: User should be able to access the module/application using any BDO issued device Negative Scenario: User cannot access the module/application using any BDO issued device	must have
BRD 2.001.1.1			1. Log in with a Marketing Account Officer user profile	Result: User should be able to log in with a Marketing Account Officer user profile Negative Scenario: User cannot log in with a Marketing Account Officer user profile	must have
BRD 2.001.1.2			2. Receive the inactivity warning (15 minutes)	Result: User should be able to receive the inactivity warning after 15 minutes of inactivity Negative Scenario: User did receive the inactivity warning after 15 minutes of inactivity	must have

BRD 2.001.1.3			3. Receive warning prior to system triggered log out (30 minutes)	Result: User should be able to receive warning 30 minutes prior to system triggered log out Negative Scenario: User did not receive warning 30 minutes prior to system triggered log out	must have
BRD 2.002.1		II. Open the Application in multiple tabs	a. Open the application in multiple tabs	Result: User should be able to open the application in multiple tabs Negative Scenario: User cannot open the application in multiple tabs	must have
BRD 2.003.1	2	III. View Accounts for Disposition	a. View all accounts assigned to me (display all accounts in 1 view using a scroll bar). Any updates/endorsement should reflect on the mother policy	Result: User should be able to view all of the assigned accounts. Display all accounts in 1 view using a scroll bar. Any updates/endorsement should reflect on the mother policy Negative Scenario: User cannot view all assigned accounts. Cannot display all accounts in 1 view using a scroll bar. Cannot reflect any updates done on the account. Updates/endorsement does not reflect on the mother policy	must have
BRD 2.003.1.1	2		1. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 2.003.1.2	2		2. View the complete renewal fields of the selected account from the generated expiring account list	Result: User should be able to view the complete renewal fields of the selected account from the generated expiring account list Negative Scenario: User cannot view the complete renewal fields of the selected account from the generated expiring account list	must have
BRD 2.003.1.3	2		3. Option to filter each column of the list	Result: User should be able to have the option to filter each column of the list Negative Scenario: User does not have the option to filter each column of the list	must have
BRD 2.003.1.4	2		4. Option to sort the list	Result: User have the option to sort the list Negative Scenario: User does not have the option to sort the list	must have

BRD 2.003.1.5	2		5. Search specific information from the list (i.e. similar to control F function)	Result: User should be able to search specific information from the list (i.e. similar to control f function) Negative Scenario: User cannot search specific information from the list (i.e. similar to control f function)	must have
BRD 2.003.1.6	2		6. Search a particular account via name, QPS reference number, Ebix reference number	Result: User should be able to search a particular account via name, QPS reference number, Ebix reference number Negative Scenario: User cannot search a particular account via name, QPS reference number, Ebix reference number	must have
BRD 2.003.2	2		b. Save the account details as needed	Result: User should be able to save the account details as needed Negative Scenario: User cannot save the account details as needed	must have
BRD 2.003.3	2		C. Print the account details as needed	Result: User should be able to print the account details as needed Negative Scenario: User cannot print the account details as needed	must have
BRD 2.003.3.1	2		1. Print preview option	Result: User should be able to have the print preview option Negative Scenario: User does not have the print preview option	must have
BRD 2.003.3.2	2		2. Print setting options	Result: User should be able to have print setting options Negative Scenario: User does not have print setting options	must have
BRD 2.004.1	2	IV. Provide Disposition	a. Select a particular account from my list	Result: User should be able to select a particular account from my list Negative Scenario: User cannot select a particular account from my list	must have

BRD 2.004.2	2		b. View the complete renewal details of the account. Any updates/endorsement should reflect on the mother policy	Result: User should be able to view the complete renewal details of the account. Any updates/endorsement should reflect on the mother policy. Negative Scenario: User cannot view the complete renewal details of the account. The mother policy does not reflect updates/endorsements done on the account.	must have
BRD 2.004.3	2		c. Provide disposition by selecting any of the following from the drop-down:	Result: User should be able to provide disposition by selecting from the drop-down Negative Scenario: User cannot provide disposition by selecting from the drop-down	must have
BRD 2.004.3.1	2		1. For Renewal	Result: User should be able to select "For Renewal " from the drop-down Negative Scenario: User cannot select "For Renewal" from the drop-down	must have
BRD 2.004.3.2	2		2. Not for Renewal	Result: User should be able to select "Not for Renewal " from the drop-down Negative Scenario: User cannot select "Not for Renewal" from the drop-down	must have
BRD 2.004.3.3	2		3. For Quotation	Result: User should be able to select "For Quotation" from the drop-down Negative Scenario: User cannot select "For Quotation" from the drop-down	must have
BRD 2.004.3.4	2		4. For Proposal	Result: User should be able to select "For Proposal" from the drop-down Negative Scenario: User cannot select "For Proposal" from the drop-down	must have
BRD 2.004.3.5	2		5. Lost Business	Result: User should be able to select "Lost Business" from the drop-down Negative Scenario: User cannot select "Lost Business" from the drop-down	must have

BRD 2.004.4	2		d. Select reason for non-renewal from the drop-down list	Result: User should be able to select reason for non-renewal from the drop-down list Negative Scenario: User cannot select reason for non-renewal from the drop-down list	must have
BRD 2.004.4.1	2		1. Remedial Management Unit (RMU)	Result: User should be able to select "Remedial Management Unit (RMU)" from the drop-down Negative Scenario: User cannot select "Remedial Management Unit (RMU)" from the drop-down	must have
BRD 2.004.4.2	2		2. With submitted policy	Result: User should be able to select "With submitted policy" from the drop-down Negative Scenario: User cannot select "With submitted policy" from the drop-down	must have
BRD 2.004.4.3	2		3. Loan fully paid	Result: User should be able to select "Loan fully paid" from the drop-down Negative Scenario: User cannot select "Loan fully paid" from the drop-down	must have
BRD 2.004.4.4	2		4. Direct to Insurer	Result: User should be able to select "Direct to Insurer" from the drop-down Negative Scenario: User cannot select "Direct to Insurer" from the drop-down	must have
BRD 2.004.4.5	2		5. Total Loss Claim	Result: User should be able to select "Total Loss Claim" from the drop-down Negative Scenario: User cannot select "Total Loss Claim" from the drop-down	must have
BRD 2.004.4.6	2		6. Unit Sold	Result: User should be able to select "Unit Sold" from the drop-down Negative Scenario: User cannot select "Unit Sold" from the drop-down	must have

BRD 2.004.4.7	2		7. Canceled Policy	Result: User should be able to select "Canceled Policy" from the drop-down Negative Scenario: User cannot select "Canceled Policy" from the drop-down	must have
BRD 2.004.4.8	2		8. Transfer to Another Marketing Unit	Result: User should be able to select "Transfer to Another Marketing Unit" from the drop-down Negative Scenario: User cannot select "Transfer to Another Marketing Unit" from the drop-down	must have
BRD 2.004.4.9	2		9. Non-renewable Accounts	Result: User should be able to select "Non-renewable Accounts" from the drop-down Negative Scenario: User cannot select "Non-renewable Accounts" from the drop-down	must have
BRD 2.004.4.10	2		10. Booked to New Invoice	Result: User should be able to select "Booked to New Invoice" from the drop-down Negative Scenario: User cannot select "Booked to New Invoice" from the drop-down	must have
BRD 2.004.5	2		e. Update necessary details	Result: User should be able to update necessary details Negative Scenario: User cannot update necessary details	must have
BRD 2.004.5.1	2		1. Easily view mandatory details	Result: User should be able to easily view mandatory details Negative Scenario: User cannot easily view mandatory details	must have
BRD 2.004.5.2	2		2. Receive prompts to supply missing mandatory details. The system should not allow me to push the account to the next workflow if there are missing mandatory fields	Result: User should be able to receive prompts to supply missing mandatory details. The system should not allow user to push the account to the next workflow if there are missing mandatory fields Negative Scenario: User does not receive prompts to supply missing mandatory details. The system allows user to push the account to the next workflow if there are missing mandatory fields	must have

BRD 2.004.5.3	2		3. Save updated details	Result: User should be able to save updated details Negative Scenario: User cannot save updated details	must have
BRD 2.004.6	2		f. Add remarks (max number of characters = 200)	Result: User should be able to add remarks (max number of characters = 200) Negative Scenario: User cannot add remarks (max number of characters = 200)	must have
BRD 2.004.7	2		g. Save remarks	Result: User should be able to save remarks Negative Scenario: User cannot save remarks	must have
BRD 2.004.8	2		h. Push the account to the next workflow	Result: User should be able to push the account to the next workflow Negative Scenario: User cannot push the account to the next workflow	must have
BRD 2.004.9	2		i. Disable disposition and editing on locked accounts (account should be locked on the marketing side once RA is generated)	Result: User should be able to provide disposition and edit locked accounts Negative Scenario: User can provide disposition and edit locked accounts	must have
BRD 2.004.10	2		j. Edit disposition on accounts tagged as "Not for Renewal" (i.e. account was initially tagged as "Not for Renewal" then client later on decided to renew, etc.)	Result: User should be able to edit disposition on accounts that are initially tagged as "Not for Renewal" Negative Scenario: User cannot edit disposition on accounts that are initially tagged as "Not for Renewal"	must have
BRD 2.005.1	2	V. Transfer account to other units Resume here	a. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 2.005.2	2		b. View details of the selected account	Result: User should be able to view details of the selected account Negative Scenario: User cannot view details of the selected account	must have

BRD 2.005.3	2		c. Select from the drop-down the Marketing unit where the account will be transferred to	Result: User should be able to select from the drop-down the marketing unit where the account will be transferred to Negative Scenario: User cannot select from the drop-down the marketing unit where the account will be transferred to	must have
BRD 2.005.3.1	2		1. Add remarks	Result: User should be able to add remarks Negative Scenario: User cannot add remarks	must have
BRD 2.005.3.2	2		2. Save remarks	Result: User should be able to save remarks Negative Scenario: User cannot save remarks	must have
BRD 2.005.4	2		d. Submit transfer request	Result: User should be able to submit transfer request Negative Scenario: User cannot submit transfer request	must have
BRD 2.005.5	2		e. Push the account to the next workflow	Result: User should be able to push the account to the next workflow Negative Scenario: User cannot push the account to the next workflow	must have
BRD 2.006.1	2	VI. View the list of Dispositioned accounts	a. View the list of my dispositioned accounts with renewal status (display all accounts in 1 view using a scroll bar).	Result: User should be able to view the list of dispositioned accounts with renewal status. Display all accounts in 1 view using a scroll bar. Negative Scenario: User cannot view the list of my dispositioned accounts with renewal status. Cannot display all accounts in 1 view using a scroll bar. Updates/endorsement should reflect on the mother policy	must have
BRD 2.006.1.1	2		1. View complete list including the renewal status of each accounts	Result: User should be able to view complete list including the renewal status each account Negative Scenario: User cannot view complete list including the renewal status each account	must have

BRD 2.006.1.1.1	2		1.1. Easily identify accounts with endorsements and claims (i.e. flag, etc.)	Result: User should be able to easily identify accounts with endorsements and claims Negative Scenario: User cannot easily identify accounts with endorsements and claims	must have
BRD 2.006.1.1.2	2		1.2. Take effect the latest endorsement details to the mother policy	Result: User should be able to see the latest endorsement details to the mother policy Negative Scenario: User cannot see the latest endorsement details to the mother policy	must have
BRD 2.006.1.2	2		2. Search a particular account via name, QPS reference number, Ebix reference number	Result: User should be able to search a particular account via name, QPS reference number, Ebix reference number Negative Scenario: User cannot search a particular account via name, QPS reference number, Ebix reference number	must have
BRD 2.006.1.3	2		3. Select Specific account	Result: User should be able to select specific account Negative Scenario: User cannot select specific account	must have
BRD 2.006.1.4	2		4. View the complete renewal details of the selected account including the renewal status	Result: User should be able to view the complete renewal details of the selected account including the renewal status Negative Scenario: User cannot view the complete renewal details of the selected account including the renewal status	must have
BRD 2.006.1.5	2		5. Add remarks on specific account (max number of characters = 200)	Result: User should be able to add remarks on specific account (max number of characters = 200) Negative Scenario: User cannot add remarks on specific account (max number of characters = 200)	must have
BRD 2.006.1.5.1	2		5.1. Capture Date and Time stamp	Result: Date and time stamp should be captured Negative Scenario: Date and time stamp is not captured	must have

BRD 2.006.1.5.2	2		5.2. Capture user id of the processor who added remarks	Result: User id of the processor who added remarks should be able to captured Negative Scenario: User id of the processor who added remarks is not captured	must have
BRD 2.006.1.5.3	2		5.3. Add remarks on accounts that are not yet closed (there should be an indicator whether an account is still open or close i.e. padlock, etc.)	Result: User should be able to add remarks on accounts that are not yet closed (there should be able to an indicator whether an account is still open or close i.e. padlock, etc.) Negative Scenario: User cannot add remarks on accounts that are not yet closed (there should be able to an indicator whether an account is still open or close i.e. padlock, etc.)	must have
BRD 2.006.1.6	2		6. Save remarks	Result: User should be able to save remarks Negative Scenario: User cannot save remarks	must have
BRD 2.007.1	2	VII. Update the Returned Accounts	a. Receive notification on returned account/s	Result: User should be able to receive notification on returned account/s Negative Scenario: User cannot receive notification on returned account/s	must have
BRD 2.007.2	2		b. Easily identify returned accounts from the list (i.e red flag, etc.)	Result: User should be able to easily identify returned accounts from the list (i.e red flag, etc.) Negative Scenario: User cannot easily identify returned accounts from the list (i.e red flag, etc.)	must have
BRD 2.007.3	2		c. Review remarks on returned account/s	Result: User should be able to review remarks on returned account/s Negative Scenario: User cannot review remarks on returned account/s	must have
BRD 2.007.4	2		d. Update returned accounts	Result: User should be able to update returned accounts Negative Scenario: User cannot update returned accounts	must have

BRD 2.007.4.1	2		1. Search a particular account via name, QPS reference number, Ebix reference number	Result: User should be able to search a particular account via name, QPS reference number, Ebix reference number Negative Scenario: User cannot search a particular account via name, QPS reference number, Ebix reference number	must have
BRD 2.007.4.2	2		2. Select specific account	Result: User should be able to select specific account Negative Scenario: User cannot select specific account	must have
BRD 2.007.4.3	2		3. Edit details on specific account	Result: User should be able to edit details on specific account Negative Scenario: User cannot edit details on specific account	must have
BRD 2.007.4.4	2		4. Add remarks	Result: User should be able to add remarks Negative Scenario: User cannot add remarks	must have
BRD 2.007.4.5	2		5. Save remarks	Result: User should be able to should be able to save remarks Negative Scenario: User cannot save remarks	must have
BRD 2.007.4.6	2		6. Cancel editing	Result: User should be able to cancel editing Negative Scenario: User cannot cancel editing	must have
BRD 2.007.4.7	2		7. Save the Updated details	Result: User should be able to save the updated details Negative Scenario: User cannot save the updated details	must have
BRD 2.007.5	2		e. Push the account to the next workflow	Result: User should be able to push the account to the next workflow Negative Scenario: User cannot push the account to the next workflow	must have

BRD 2.008.1	1 to 6	VIII. Generate Report	a. Select expiry date range for each report	Result: User should be able to select expiry date range for each report Negative Scenario: User cannot select expiry date range for each report	must have
BRD 2.008.1.1	1 to 6		1. Select month, day and year	Result: User should be able to select month, day and year Negative Scenario: User cannot select month, day and year	must have
BRD 2.008.1.2	1 to 6		2. Change the selected date range	Result: User should be able to change the selected date range Negative Scenario: User cannot change the selected date range	must have
BRD 2.008.2	1 to 6		b. Select single, multiple, all and all except criteria for each report	Result: User should be able to select single, multiple, all and all except criteria for each report Negative Scenario: User cannot select single, multiple, all and all except criteria for each report	must have
BRD 2.008.2.1	1 to 6		1. Select single, multiple, all except and all Unit Head from the drop-down list	Result: User should be able to select single, multiple, all except and all unit head from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all unit head from the drop-down list	must have
BRD 2.008.2.2	1 to 6		2. Search specific Unit Head from the drop-down list	Result: User should be able to search specific unit head from the drop-down list Negative Scenario: User cannot search specific unit head from the drop-down list	must have
BRD 2.008.2.3	1 to 6		3. Select single, multiple, all except and all Risk Code from the drop-down list	Result: User should be able to select single, multiple, all except and all risk code from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all risk code from the drop-down list	must have

BRD 2.008.2.4	1 to 6		4. Search specific Risk Code from the drop-down list	Result: User should be able to search specific risk code from the drop-down list Negative Scenario: User cannot search specific risk code from the drop-down list	must have
BRD 2.008.2.5	1 to 6		5. Select single, multiple, all except and all Insurance Company from the drop-down list	Result: User should be able to select single, multiple, all except and all insurance company from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all insurance company from the drop-down list	must have
BRD 2.008.2.6	1 to 6		6. Search specific Insurance Company from the drop-down list	Result: User should be able to search specific insurance company from the drop-down list Negative Scenario: User cannot search specific insurance company from the drop-down list	must have
BRD 2.008.2.7	1 to 6		7. Select single, multiple, all except and all Insurance Group from the drop-down list	Result: User should be able to select single, multiple, all except and all insurance group from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all insurance group from the drop-down list	must have
BRD 2.008.2.8	1 to 6		8. Search specific Insurance Group from the drop-down list	Result: User should be able to search specific insurance group from the drop-down list Negative Scenario: User cannot search specific insurance group from the drop-down list	must have
BRD 2.008.2.9	1 to 6		9. Select single, multiple, all except and all Business Origin from the drop-down list	Result: User should be able to select single, multiple, all except and all business origin from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all business origin from the drop-down list	must have
BRD 2.008.2.10	1 to 6		10. Search specific Business Origin from the drop-down list	Result: User should be able to search specific business origin from the drop-down list Negative Scenario: User cannot search specific business origin from the drop-down list	must have

BRD 2.008.2.11	1 to 6		11. Select single, multiple, all except and all Market Category from the drop-down list	Result: User should be able to select single, multiple, all except and all market category from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all market category from the drop-down list	must have
BRD 2.008.2.12	1 to 6		12. Search specific Market Category from the drop-down list	Result: User should be able to search specific market category from the drop-down list Negative Scenario: User cannot search specific market category from the drop-down list	must have
BRD 2.008.2.13	1 to 6		13. Select single, multiple, all except and all BDO Branch from the drop-down list	Result: User should be able to select single, multiple, all except and all BDO branch from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDO branch from the drop-down list	must have
BRD 2.008.2.14	1 to 6		14. Search specific BDO Branch from the drop-down list	Result: User should be able to search specific BDO branch from the drop-down list Negative Scenario: User cannot search specific BDO branch from the drop-down list	must have
BRD 2.008.2.15	1 to 6		15. Select single, multiple, all except and all BDO Area from the drop-down list	Result: User should be able to select single, multiple, all except and all BDO Area from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDO area from the drop-down list	must have
BRD 2.008.2.16	1 to 6		16. Search specific BDO Area from the drop-down list	Result: User should be able to search specific BDO Area from the drop-down list Negative Scenario: User cannot search specific BDO Area from the drop-down list	must have
BRD 2.008.2.17	1 to 6		17. Select single, multiple, all except and all Region from the drop-down list	Result: User should be able to select single, multiple, all except and all Region from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all Region from the drop-down list	must have

BRD 2.008.2.18	1 to 6		18. Search specific Region from the drop-down list	Result: User should be able to search specific region from the drop-down list Negative Scenario: User cannot search specific region from the drop-down list	must have
BRD 2.008.2.19	1 to 6		19. Select single, multiple, all except and all Bank Officer from the drop-down list	Result: User should be able to select single, multiple, all except and all bank officer from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all bank officer from the drop-down list	must have
BRD 2.008.2.20	1 to 6		20. Search specific Bank Officer from the drop-down list	Result: User should be able to search specific bank officer from the drop-down list Negative Scenario: User cannot search specific bank officer from the drop-down list	must have
BRD 2.008.2.21	1 to 6		21. Select single, multiple, all except and all Bank Unit from the drop-down list	Result: User should be able to select single, multiple, all except and all bank unit from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all bank unit from the drop-down list	must have
BRD 2.008.2.22	1 to 6		22. Search specific Bank Unit from the drop-down list	Result: User should be able to search specific bank unit from the drop-down list Negative Scenario: User cannot search specific bank unit from the drop-down list	must have
BRD 2.008.2.23	1 to 6		23. Select single, multiple, all except and all Product Code from the drop-down list	Result: User should be able to select single, multiple, all except and all product code from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all product code from the drop-down list	must have
BRD 2.008.2.24	1 to 6		24. Search specific Product Code from the drop-down list	Result: User should be able to search specific product code from the drop-down list Negative Scenario: User cannot search specific product code from the drop-down list	must have

BRD 2.008.2.25	1 to 6		25. Select single, multiple, all except and all Account Type from the drop-down list	Result: User should be able to select single, multiple, all except and all account type from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all account type from the drop-down list	must have
BRD 2.008.2.26	1 to 6		26. Search specific Account Type drop-down list	Result: User should be able to search specific account type drop-down list Negative Scenario: User cannot search specific account type drop-down list	must have
BRD 2.008.2.27	1 to 6		27. Select single, multiple, all except and all BDOI Branch from the drop-down list	Result: User should be able to select single, multiple, all except and all BDOI branch from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDOI branch from the drop-down list	must have
BRD 2.008.2.28	1 to 6		28. Search specific BDOI Branch from the drop-down list	Result: User should be able to search specific BDOI branch from the drop-down list Negative Scenario: User cannot search specific BDOI branch from the drop-down list	must have
BRD 2.008.2.29	1 to 6		29. Select single, multiple, all except and all Location from the drop-down list	Result: User should be able to select single, multiple, all except and all location from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all location from the drop-down list	must have
BRD 2.008.2.30	1 to 6		30. Search specific Location from the drop-down list	Result: User should be able to search specific location from the drop-down list Negative Scenario: User cannot search specific location from the drop-down list	must have
BRD 2.008.2.31	1 to 6		31. Select single, multiple, all except and all Account Broker from the drop-down list	Result: User should be able to select single, multiple, all except and all account broker from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all account broker from the drop-down list	must have

BRD 2.008.2.32	1 to 6		32. Search specific Account Broker from the drop-down list	Result: User should be able to search specific account Broker from the drop-down list Negative Scenario: User cannot search specific account Broker from the drop-down list	must have
BRD 2.008.2.33	1 to 6		33. Select single, multiple, all except and all Business Type from the drop-down list	Result: User should be able to select single, multiple, all except and all business type from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all business type from the drop-down list	must have
BRD 2.008.2.34	1 to 6		34. Search specific Business Type from the drop-down list	Result: User should be able to search specific business type from the drop-down list Negative Scenario: User cannot search specific business type from the drop-down list	must have
BRD 2.008.2.35	1 to 6		35. Select single, multiple, all except and all Customer Segment from the drop-down list	Result: User should be able to select single, multiple, all except and all customer segment from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all customer segment from the drop-down list	must have
BRD 2.008.2.36	1 to 6		36. Search specific Customer Segment from the drop-down list	Result: User should be able to search specific customer segment from the drop-down list Negative Scenario: User cannot search specific customer segment from the drop-down list	must have
BRD 2.008.2.37	1 to 6		37. Select single, multiple, all except and all Specific Client from the drop-down list	Result: User should be able to select single, multiple, all except and all specific client from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all specific client from the drop-down list	must have
BRD 2.008.2.38	1 to 6		38. Search specific Client from the drop-down list	Result: User should be able to search specific Client from the drop-down list Negative Scenario: User cannot search specific Client from the drop-down list	must have

BRD 2.008.2.39	1 to 6		39. Select single, multiple, all except and all Renewal Status from the drop-down list	Result: User should be able to select single, multiple, all except and all renewal status from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all renewal status from the drop-down list	must have
BRD 2.008.2.40	1 to 6		40. Search specific Renewal Status from the drop-down list	Result: User should be able to search specific renewal status from the drop-down list Negative Scenario: User cannot search specific renewal status from the drop-down list	must have
BRD 2.008.3	1 to 6		c. Generate a report showing the overall status of the renewal accounts with the following information per invoice	Result: User should be able to generate a report showing the overall status of the renewal accounts with the following information per invoice Negative Scenario: User cannot generate a report showing the overall status of the renewal accounts with the following information per invoice	must have
BRD 2.008.3.1	1 to 6		1. Display the following information per invoice (display all accounts in 1 view using a scroll bar)	Result: User should be able to display the following information per invoice. Display all accounts in 1 view using scroll bar Negative Scenario: User cannot display the following information per invoice. Cannot display all accounts in 1 view using scroll bar	must have
BRD 2.008.3.1.1	1 to 6		1.1. Unit Head	Result: User should be able to see a column with the complete list of Unit Heads Negative Scenario: User cannot see a column with the complete list of Unit Heads	must have
BRD 2.008.3.1.2	1 to 6		1.2. Account Broker	Result: User should be able to see a column with the account broker value Negative Scenario: User cannot see a column with account broker value	must have
BRD 2.008.3.1.3	1 to 6		1.3. Business Origin	Result: User should be able to User should be able to see a column with business origin value Negative Scenario: User cannot see a column with business origin value	must have

BRD 2.008.3.1.4	1 to 6		1.4. Bank Officer	Result: User should be able to see a column with bank officer value Negative Scenario: User cannot see a column with bank officer value	must have
BRD 2.008.3.1.5	1 to 6		1.5. Renewal Reference	Result: User should be able to see a column with renewal reference value Negative Scenario: User cannot see a column with renewal reference value	must have
BRD 2.008.3.1.6	1 to 6		1.6. Expiring Ebix Invoice No	Result: User should be able to see a column with expiring Ebix invoice no value Negative Scenario: User cannot see a column with expiring Ebix invoice no value	must have
BRD 2.008.3.1.7	1 to 6		1.7. Assured	Result: User should be able to see a column with assured value Negative Scenario: User cannot see a column with assured value	must have
BRD 2.008.3.1.8	1 to 6		1.8. Type of Risk	Result: User should be able to see a column with type of risk value Negative Scenario: User cannot see a column with type of risk value	must have
BRD 2.008.3.1.9	1 to 6		1.9. Expiring Invoice Inception Date	Result: User should be able to see a column with expiring invoice inception date value Negative Scenario: User cannot see a column with expiring invoice inception date value	must have
BRD 2.008.3.1.10	1 to 6		1.10. Expiring Invoice Expiry Date	Result: User should be able to see a column with expiring invoice expiry date value Negative Scenario: User cannot see a column with expiring invoice expiry date value	must have

BRD 2.008.3.1.11	1 to 6		1.11. Renewal Reference Inception Date	Result: User should be able to see a column with renewal reference inception date value Negative Scenario: User cannot see a column with renewal reference inception date value	must have
BRD 2.008.3.1.12	1 to 6		1.12. Renewal Reference Expiry Date	Result: User should be able to see a column with renewal reference expiry date value Negative Scenario: User cannot see a column with renewal reference expiry date value	must have
BRD 2.008.3.1.13	1 to 6		1.13. Expiring Invoice Policy Number	Result: User should be able to see a column with expiring invoice policy number value Negative Scenario: User cannot see a column with expiring invoice policy number value	must have
BRD 2.008.3.1.14	1 to 6		1.14. Account Type	Result: User should be able to see a column with the complete list of account type Negative Scenario: User cannot see a column with the complete list of account type	must have
BRD 2.008.3.1.15	1 to 6		1.15. Basic Premium	Result: User should be able to see a column with basic premium value Negative Scenario: User cannot see a column with basic premium value	must have
BRD 2.008.3.1.16	1 to 6		1.16. Gross Premium	Result: User should be able to see a column with gross premium value Negative Scenario: User cannot see a column with gross premium value	must have
BRD 2.008.3.1.17	1 to 6		1.17. Premium Rate	Result: User should be able to see a column with premium rate value Negative Scenario: User cannot see a column with premium rate value	must have

BRD 2.008.3.1.18	1 to 6		1.18. Commission Rate	Result: User should be able to see a column with commission rate value Negative Scenario: User cannot see a column with commission rate value	must have
BRD 2.008.3.1.19	1 to 6		1.19. Total Sum Insured	Result: User should be able to see a column with total sum insured value Negative Scenario: User cannot see a column with total sum insured value	must have
BRD 2.008.3.1.20	1 to 6		1.20. Risk Description	Result: User should be able to see a column with risk description value Negative Scenario: User cannot see a column with risk description value	must have
BRD 2.008.3.1.21	1 to 6		1.21. Location Of Risk	Result: User should be able to see a column with location of risk value Negative Scenario: User cannot see a column with location of risk value	must have
BRD 2.008.3.1.22	1 to 6		1.22. Address	Result: User should be able to see a column with address value Negative Scenario: User cannot see a column with address value	must have
BRD 2.008.3.1.23	1 to 6		1.23. Contact No(S).	Result: User should be able to see a column with contact number value Negative Scenario: User cannot see a column with contact number value	must have
BRD 2.008.3.1.24	1 to 6		1.24. Email Address	Result: User should be able to see a column with email address value Negative Scenario: User cannot see email address value	must have
BRD 2.008.3.1.25	1 to 6		1.25. Region	Result: User should be able to see a column with region value Negative Scenario: User cannot see a column with region value	must have

BRD 2.008.3.1.126	1 to 6		1.26. Area	Result: User should be able to see a column with area value Negative Scenario: User cannot see a column with area value	must have
BRD 2.008.3.1.127	1 to 6		1.27. Branch	Result: User should be able to see a column with branch value Negative Scenario: User cannot see a column with branch value	must have
BRD 2.008.3.1.128	1 to 6		1.28. Insurer	Result: User should be able to see a column with insurer value Negative Scenario: User cannot see a column with insurer value	must have
BRD 2.008.3.1.129	1 to 6		1.29. Location	Result: User should be able to see a column with location value Negative Scenario: User cannot see a column with location value	must have
BRD 2.008.3.1.130	1 to 6		1.30. Mortgaged To BDO	Result: User should be able to see a column with Mortgaged To BDO value Negative Scenario: User cannot see a column with Mortgaged To BDO value	must have
BRD 2.008.3.1.131	1 to 6		1.31. Mortgagee Bank	Result: User should be able to see a column with mortgagee bank value Negative Scenario: User cannot see a column with mortgagee bank value	must have
BRD 2.008.3.1.132	1 to 6		1.32. PN Number	Result: User should be able to see a column with PN number value Negative Scenario: User cannot see a column with PN number value	must have
BRD 2.008.3.1.133	1 to 6		1.33. Hold Cover (HC)	Result: User should be able to see a column with hold cover (HC) value Negative Scenario: User cannot see a column with hold cover (HC) value	must have

BRD 2.008.3.1.34	1 to 6		1.34. HC End Date	Result: User should be able to see a column with HC end date value Negative Scenario: User cannot see a column with HC end date value	must have
BRD 2.008.3.1.35	1 to 6		1.35. Renewal Status	Result: User should be able to see a column with renewal status value Negative Scenario: User cannot see a column with renewal status value	must have
BRD 2.008.3.1.36	1 to 6		1.36. Reason for "Not For Renewal"	Result: User should be able to see a column with reason for not for renewal value Negative Scenario: User cannot see a column with reason for not for renewal value	must have
BRD 2.008.3.1.37	1 to 6		1.37. Remarks Of Acct Officer	Result: User should be able to see a column with remarks of acct officer value Negative Scenario: User cannot see a column with remarks of acct officer value	must have
BRD 2.008.3.2	1 to 6		2. Display a summary	Result: User should be able to display a summary Negative Scenario: User cannot display a summary	must have
BRD 2.008.3.2.1	1 to 6		2.1. Total No. of Booked	Result: User should be able to see the total no. of booked value Negative Scenario: User cannot see the total no. of booked value	must have
BRD 2.008.3.2.2	1 to 6		2.2. Total No. of Can celled	Result: User should be able to see the total no. of canceled value Negative Scenario: User cannot see the total no. of canceled value	must have
BRD 2.008.3.2.3	1 to 6		2.3. Total No. of Renewal - For Placement	Result: User should be able to see the total no. of renewal - for placement value Negative Scenario: User cannot see the total no. of renewal - for placement value	must have

BRD 2.008.3.2.4	1 to 6		2.4. Total No. of Renewal - For Proposal	Result: User should be able to see the total no. of renewal - for proposal value Negative Scenario: User cannot see total no. of renewal - for proposal value	must have
BRD 2.008.3.2.5	1 to 6		2.5. Total No. of Renewal - For ARF	Result: User should be able to see the total no. of renewal - for ARF value Negative Scenario: User cannot see the total no. of renewal - for ARF value	must have
BRD 2.008.3.2.6	1 to 6		2.6. Total No. of RA Processed	Result: User should be able to see the total no. of ra processed value Negative Scenario: User cannot see the total no. of ra processed value	must have
BRD 2.008.3.2.7	1 to 6		2.7. Total No. of Renewal - For RA Processing	Result: User should be able to see the total no. of renewal - for RA processing value Negative Scenario: User cannot see the total no. of renewal - for RA processing value	must have
BRD 2.008.3.2.8	1 to 6		2.8. Total No. of Renew to TSU	Result: User should be able to see the total no. of renew to TSU value Negative Scenario: User cannot see the total no. of renew to TSU value	must have
BRD 2.008.3.2.9	1 to 6		2.9. Total No. of Returned to Marketing	Result: User should be able to see the total no. of returned to marketing value Negative Scenario: User cannot see the total no. of returned to marketing value	must have
BRD 2.008.3.2.10	1 to 6		2.10. Total No. of Awaiting Marketing TL Approval (For Renewal)	Result: User should be able to see the total no. of awaiting marketing TL approval (for renewal) value Negative Scenario: User cannot total no. of awaiting marketing TL approval (for renewal) value	must have

BRD 2.008.3.2.11	1 to 6		2.11. Total No. of Awaiting Marketing TL Approval (For Quotation)	Result: User should be able to see the total no. of awaiting marketing TL approval (for quotation) value Negative Scenario: User cannot see the total no. of awaiting marketing TL approval (for quotation) value	must have
BRD 2.008.3.2.12	1 to 6		2.12. Total No. of Awaiting Marketing TL Approval (Not For Renewal)	Result: User should be able to see the no. of awaiting marketing TL approval (not for renewal) value Negative Scenario: User cannot see the no. of awaiting marketing TL approval (not for renewal) value	must have
BRD 2.008.3.2.13	1 to 6		2.13. Total No. of Awaiting Marketing TL Approval (Lost Business)	Result: User should be able to see the no. of awaiting marketing TL approval (lost business) value Negative Scenario: User cannot see the no. of awaiting marketing TL approval (lost business) value	must have
BRD 2.008.3.2.14	1 to 6		2.14. Total No. of Disapproved Accounts	Result: User should be able to see the total no. of disapproved accounts value Negative Scenario: User cannot see the total no. of disapproved accounts value	must have
BRD 2.008.3.2.15	1 to 6		2.15. Total No. of Not For Renewal Accounts	Result: User should be able to see the total no. of not for renewal accounts value Negative Scenario: User cannot see the total no. of not for renewal accounts value	must have
BRD 2.008.3.2.16	1 to 6		2.16. Total No. of Mortgaged Lost Business	Result: User should be able to see the total no. of mortgaged lost business value Negative Scenario: User cannot see the total no. of mortgaged lost business value	must have
BRD 2.008.3.2.17	1 to 6		2.17. Total No. of Unrenewed Mortgaged For Proposal	Result: User should be able to see the total no. of unrenewed mortgaged for proposal value Negative Scenario: User cannot see the total no. of unrenewed mortgaged for proposal value	must have

BRD 2.008.3.2.18	1 to 6		2.18. Total No. of Unrenewed Mortgaged Transferred to Other Unit	Result: User should be able to see the total no. of unrenewed mortgaged transferred to Other unit value Negative Scenario: User cannot see the total no. of unrenewed mortgaged transferred to other unit value	must have
BRD 2.008.3.2.19	1 to 6		2.19. Total No. of Mortgaged Loan Fully Paid	Result: User should be able to see the total no. of mortgaged loan fully paid value Negative Scenario: User cannot see the total no. of mortgaged loan fully paid value	must have
BRD 2.008.3.2.20	1 to 6		2.20. Unrenewed Mortgaged Awaiting Confirmation	Result: User should be able to see the unrenewed mortgaged awaiting confirmation value Negative Scenario: User cannot see the unrenewed mortgaged awaiting confirmation value	must have
BRD 2.008.3.2.21	1 to 6		2.21. Total No. of Mortgaged Booked under New Invoice No.	Result: User should be able to see the total no. of mortgaged booked under new invoice no. value Negative Scenario: User cannot see the total no. of mortgaged booked under new invoice no. value	must have
BRD 2.008.3.2.22	1 to 6		2.22. Total No. of Unrenewed Mortgaged with No Disposition	Result: User should be able to see the total no. of unrenewed mortgaged no disposition value Negative Scenario: User cannot see the total no. of unrenewed mortgaged no disposition value	must have
BRD 2.008.3.2.23	1 to 6		2.23. Total No. of Unrenewed Mortgaged to Other Bank	Result: User should be able to see the total no. of unrenewed mortgaged to Other bank value Negative Scenario: User cannot see the total no. of unrenewed mortgaged to Other bank value	must have
BRD 2.008.3.2.24	1 to 6		2.24. Total No. of Non- Mortgaged Lost Business	Result: User should be able to see the total no. of non- mortgaged lost business value Negative Scenario: User cannot see the total no. of non- mortgaged lost business value	must have

BRD 2.008.3.2.25	1 to 6		2.25. Total No. of Unrenewed Non- Mortgaged For Proposal	Result: User should be able to see the total no. of unrenewed non- mortgaged for proposal value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged for proposal value	must have
BRD 2.008.3.2.26	1 to 6		2.26. Total No. of Unrenewed Non- Mortgaged Transferred To Other Unit	Result: User should be able to see the total no. of unrenewed non- mortgaged transferred to other unit value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged transferred to other unit value	must have
BRD 2.008.3.2.27	1 to 6		2.27. Total No. of Non- Mortgaged Loan Fully Paid	Result: User should be able to see the total no. of non- mortgaged loan fully paid value Negative Scenario: User cannot see the total no. of non- mortgaged loan fully paid value	must have
BRD 2.008.3.2.28	1 to 6		2.28. Total No. of Unrenewed Non- Mortgaged Awaiting Confirmation from Client	Result: User should be able to see the total no. of unrenewed non- mortgaged awaiting confirmation from client value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged awaiting confirmation from client value	must have
BRD 2.008.3.2.29	1 to 6		2.29. Total No. of Non- Mortgaged Booked under Invoice No.	Result: User should be able to see the total no. of non- mortgaged booked under invoice no. value Negative Scenario: User cannot see the total no. of non- mortgaged booked under invoice no. value	must have
BRD 2.008.3.2.30	1 to 6		2.30. Total No. of Unrenewed Non- Mortgaged with No Disposition	Result: User should be able to see the total no. of unrenewed non- mortgaged no disposition value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged no disposition value	must have

BRD 2.008.3.2.31	1 to 6		2.31. Total No. of Unrenewed Non- Mortgaged to Other Bank	Result: User should be able to see the total no. of unrenewed non- mortgaged to other bank value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged to other bank value	must have
BRD 2.008.3.2.32	1 to 6		2.32. Total No. of Non- renewable Accounts	Result: User should be able to see the total no. of non-renewable accounts value Negative Scenario: User cannot see the total no. of non-renewable accounts value	must have
BRD 2.008.3.2.33	1 to 6		2.33. Total No. of No Disposition	Result: User should be able to see the total no. of no disposition value Negative Scenario: User cannot see the total no. of no disposition value	must have
BRD 2.008.3.2.34	1 to 6		2.34. Total No. of Accounts	Result: User should be able to see the total no. of accounts value Negative Scenario: User cannot see the total no. of accounts value	must have
BRD 2.008.4	1 to 6		d. Download report	Result: User should not experience issue/s in downloading the report Negative Scenario: User experienced issue/s in see the download report value	must have
BRD 2.008.4.1	1 to 6		1. Download in a .xlsx format	Result: User should be able to download in a .xlsx format Negative Scenario: User cannot download in a .xlsx format	must have
BRD 2.008.4.2	1 to 6		2. Download in a .pdf format	Result: User should be able to download in a .pdf format Negative Scenario: User cannot download in a .pdf format	must have
BRD 2.008.5	1 to 6		e. Save report in the desired location	Result: User should be able to save report in the desired location Negative Scenario: User cannot save report in the desired location	must have

BRD 2.008.5.1	1 to 6		1. Save in a .xlsx format	Result: User should be able to save in a .xlsx format Negative Scenario: User cannot save in a .xlsx format	must have
BRD 2.008.5.2	1 to 6		2. Save in a .pdf format	Result: User should be able to save in a .pdf format Negative Scenario: User cannot save in a .pdf format	must have
BRD 2.008.6	1 to 6		f. Print report	Result: User should be able to print report Negative Scenario: User cannot print report	must have
BRD 2.009.1	6	IX. Generate Renewal Advice (RA)	a. Select single, multiple, all except and all accounts	Result: User should be able to select single, multiple, all except and all accounts Negative Scenario: User cannot select single, multiple, all except and all accounts	must have
BRD 2.009.2	6		b. Generate RA for the selected account/s	Result: User should be able to generate RA for the selected account/s Negative Scenario: User cannot generate RA for the selected account/s	must have
BRD 2.009.2.1	6		1. Disable RA generation on locked accounts (account should be locked on the marketing side when the RA is generated)	Result: User should be able to not generate RA on locked accounts Negative Scenario: User can RA generate on locked accounts	must have
BRD 2.009.2.2	6		2. With visible identifier if the generated RA is for first notice or second notice	Result: User should have a visible identifier if the generated RA is for first notice or second notice Negative Scenario: User has no visible identifier if the generated RA is for first notice or second notice	must have
BRD 2.009.3	6		c. View the generated RA	Result: User should be able to view the generated RA Negative Scenario: User cannot view the generated RA	must have
BRD 2.009.3.1	6		1. Select RA	Result: User should be able to select RA Negative Scenario: User cannot select RA	must have

BRD 2.009.3.2	6		2. Preview the details of the RA	Result: User should be able to preview the details of the RA Negative Scenario: User cannot preview the details of the RA	must have
BRD 2.009.3.3	6		3. Close the preview	Result: User should be able to close the preview screen Negative Scenario: User cannot close the preview screen	must have
BRD 2.009.4	6		d. Download the generated RA	Result: User should be able to download the generated RA Negative Scenario: User cannot download the generated RA	must have
BRD 2.009.4.1	6		1. Select single or multiple RA/s	Result: User should be able to select single or multiple RA/s Negative Scenario: User cannot select single or multiple RA/s	must have
BRD 2.009.4.2	6		2. Download single or multiple RA/s	Result: User should be able to download single or multiple RA/s Negative Scenario: User cannot download single or multiple RA/s	must have
BRD 2.009.5	6		e. Save the generated RA/s	Result: User should be able to save the generated RA/s Negative Scenario: User cannot save the generated RA/s	must have
BRD 2.009.5.1	6		1. Select single or multiple RA/s	Result: User should be able to select single or multiple RA/s Negative Scenario: User cannot select single or multiple RA/s	must have
BRD 2.009.5.2	6		2. Select the desired location	Result: User should be able to select the desired location Negative Scenario: User cannot select the desired location	must have

BRD 2.009.6	5		f. Extract the details required for RA sending	Result: User should be able to extract required details for RA sending Negative Scenario: User cannot extract details for RA sending	must have
BRD 2.009.7	6		g. Send RA in batch	Result: User should be able to send RAs in batch Negative Scenario: User cannot send RAs in batch	must have
BRD 2.009.7.1	6		1. Encrypt and add password prior to sending	Result: RA should be encrypted and with password Negative Scenario: RA is not encrypted and/or no password	Must have
C. As a Processing Team Leader, I want to be able to ...					
BRD 3.001.1		I. Log in as a Processing Team Leader	a. Access the module/application using any BDO issued device	Result: User should be able to access the module/application using any BDO issued device Negative Scenario: User cannot access the module/application using any BDO issued device	must have
BRD 3.001.1.1			1. Log in with a Processing Team Leader user profile	Result: User should be able to log in with a Processing Team Leader user profile Negative Scenario: User cannot log in with a Processing Team Leader user profile	must have
BRD 3.001.1.2			2. Receive the inactivity warning (15 minutes)	Result: User should be able to receive the inactivity warning after 15 minutes of inactivity Negative Scenario: User did not receive the inactivity warning after 15 minutes of inactivity	must have
BRD 3.001.1.3			3. Receive warning prior to system triggered log out (30 minutes)	Result: User should be able to receive warning 30 minutes prior to system triggered log out Negative Scenario: User did not receive warning 30 minutes prior to system triggered log out	must have
BRD 3.002.1	3	II. Open the Application in multiple tabs	a. Open the application in multiple tabs	Result: User should be able to open the application in multiple tabs Negative Scenario: User cannot open the application in multiple tabs	must have

BRD 3.003.1	3	III. Generate list of Accounts for Processing	a. Select the date range of the List of Expiring Accounts	Result: User should be able to select the date range of the list of expiring accounts Negative Scenario: User cannot select the date range of the list of expiring accounts	must have
BRD 3.003.1.1	3		1. Select the month, day and year	Result: User should be able to select the month, day and year Negative Scenario: User cannot select the month, day and year	must have
BRD 3.003.2	3		b. Change the selected date range	Result: User should be able to change the selected date range Negative Scenario: User cannot change the selected date range	must have
BRD 3.003.3	3		c. Filter Criteria	Result: User should be able to filter criteria Negative Scenario: User cannot filter criteria	must have
BRD 3.003.3.1	3		1. Select single, multiple, select all except and all Unit Head from the drop-down	Result: User should be able to select single, multiple, select all except and all Unit head from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Unit head from the drop-down	must have
BRD 3.003.3.2	3		2. Select single, multiple, select all except and all business Origin from the drop-down	Result: User should be able to select single, multiple, select all except and all business origin from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all business origin from the drop-down	must have
BRD 3.003.3.3	3		3. Select single, multiple, select all except and all account type from the drop-down	Result: User should be able to select single, multiple, select all except and all account type from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all account type from the drop-down	must have

BRD 3.003.3.4	3		4. Select single, multiple, select all except and all Region from the drop-down	Result: User should be able to select single, multiple, select all except and all Region from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Region from the drop-down	must have
BRD 3.003.3.5	3		5. Select single, multiple, select all except and all Area from the drop-down	Result: User should be able to select single, multiple, select all except and all Area from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all Area from the drop-down	must have
BRD 3.003.3.6	3		6. Select single, multiple, select all except and all Invoicing Branch from the drop-down	Result: User should be able to select single, multiple, select all except and all invoicing branch from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all invoicing branch from the drop-down	must have
BRD 3.003.3.7	3		7. Select single, multiple, select all except and all Risk Code from the drop-down	Result: User should be able to select single, multiple, select all except and all risk code from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all risk code from the drop-down	must have
BRD 3.003.3.8	3		8. Select single, multiple, select all except and all Market Segment from the drop-down	Result: User should be able to select single, multiple, select all except and all market segment from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all market segment from the drop-down	must have
BRD 3.003.3.9	3		9. Select single, multiple, select all except and all Department Name from the drop-down	Result: User should be able to select single, multiple, select all except and all department name from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all department name from the drop-down	must have

BRD 3.003.3.10	3		10. Select single, multiple, select all except and all account Officer from the drop-down	Result: User should be able to select single, multiple, select all except and all account officer from the drop-down Negative Scenario: User cannot select single, multiple, select all except and all account officer from the drop-down	must have
BRD 3.003.3.11	3		11. Cancel the selected filter	Result: User should be able to cancel the selected filter Negative Scenario: User cannot cancel the selected filter	must have
BRD 3.003.3.12	3		12. Clear the selected filter	Result: User should be able to clear the selected filter Negative Scenario: User cannot clear the selected filter	must have
BRD 3.003.3.13	3		13. Apply filter criteria	Result: User should be able to apply filter criteria Negative Scenario: User cannot apply filter criteria	must have
BRD 3.003.4	3		d. View the generated List of Expiring Accounts for Processing (display all accounts using scroll bars). Any updates/endorsement should reflect on the mother policy	Result: User should be able to view the generated list of expiring accounts for processing (display all accounts using scroll bars). Any updates/endorsement should reflect on the mother policy Negative Scenario: User cannot view the generated list of expiring accounts for processing (display all accounts using scroll bars). Updates/endorsements does reflect on the mother policy	must have
BRD 3.003.4.1	3		1. View the generated List of Expiring accounts with below column per invoice:	Result: User should be able to view the generated list of expiring accounts details per invoice Negative Scenario: User cannot view the generated list of expiring accounts details per invoice	must have
BRD 3.003.4.1.1	3		1.1 Expiring EBIX Invoice No.	Result: User should be able to see a column with expiring Ebix invoice no. value Negative Scenario: User cannot see a column with expiring Ebix invoice no. value	must have

BRD 3.003.4.1.2	3		1.2 Renewal Reference No.	Result: User should be able to see a column with renewal reference number value Negative Scenario: User cannot see a column with renewal reference number	must have
BRD 3.003.4.1.3	3		1.3 BDOIsys Reference No.	Result: User should be able to see a column with BDOIsys reference number value Negative Scenario: User cannot see a column with BDOIsys reference number value	must have
BRD 3.003.4.1.4	3		1.4 Cover No.	Result: User should be able to see a column with cover number value Negative Scenario: User cannot see a column with cover number value	must have
BRD 3.003.4.1.5	3		1.5 Version No.	Result: User should be able to see a column with version number value Negative Scenario: User cannot see a column with version number value	must have
BRD 3.003.4.1.6	3		1.6 Invoicing Branch	Result: User should be able to see a column with invoicing branch value Negative Scenario: User cannot see a column with invoicing branch value	must have
BRD 3.003.4.1.7	3		1.7 Department Code	Result: User should be able to see a column with department code value Negative Scenario: User cannot see a column with department code value	must have
BRD 3.003.4.1.8	3		1.2 Department Name	Result: User should be able to see a column with department name value Negative Scenario: User cannot see a column with department name value	must have
BRD 3.003.4.1.9	3		1.3 Unit Head	Result: User should be able to see a column with unit head value Negative Scenario: User cannot see a column with unit head value	must have

BRD 3.003.4.1.10	3		1.4 Client Name	Result: User should be able to see a column with client name value Negative Scenario: User cannot see a column with client name value	must have
BRD 3.003.4.1.11	3		1.5 Assured's Name	Result: User should be able to see a column with assured's name value Negative Scenario: User cannot see a column with assured's name value	must have
BRD 3.003.4.1.12	3		1.6 Business Origin	Result: User should be able to see a column with business origin value Negative Scenario: User cannot see a column with business origin value	must have
BRD 3.003.4.1.13	3		1.7 Account Officer	Result: User should be able to see a column with account officer value Negative Scenario: User cannot see a column with account officer value	must have
BRD 3.003.4.1.14	3		1.8 Expiring Policy No.	Result: User should be able to see a column with expiring policy number value Negative Scenario: User cannot see a column with expiring policy number value	must have
BRD 3.003.4.1.15	3		1.9 Insurance Company	Result: User should be able to see a column with insurance company value Negative Scenario: User cannot see a column with insurance company value	must have
BRD 3.003.4.1.16	3		1.10 Risk Code	Result: User should be able to see a column with risk code value Negative Scenario: User cannot see a column with risk code value	must have
BRD 3.003.4.1.17	3		1.11 Risk Name	Result: User should be able to see a column with risk name value Negative Scenario: User cannot see a column with risk name value	must have

BRD 3.003.4.1.18	3		1.12 Risk Description	Result: User should be able to see a column with risk description value Negative Scenario: User cannot see a column with risk description value	must have
BRD 3.003.4.1.19	3		1.13 Renewal Stage/Status	Result: User should be able to see a column with renewal stage/status value Negative Scenario: User cannot see a column with renewal stage/status value	must have
BRD 3.003.4.1.20	3		1.14 Renewal Disposition	Result: User should be able to see a column with renewal disposition value Negative Scenario: User cannot see a column with renewal disposition value	must have
BRD 3.003.4.1.21	3		1.15 Disposition Remarks	Result: User should be able to see a column with disposition remarks value Negative Scenario: User cannot see a column with disposition remarks value	must have
BRD 3.003.4.2	3		2. Should capture expired/expiring (within the identified date range) and unrenewed account	Result: User should be able to capture expired/expiring (within the identified date range) and unbooked account Negative Scenario: User cannot should be able to capture expired/expiring (within the identified date range) and unbooked account	must have
BRD 3.003.4.3	3		3. Filter each column	Result: User should be able to filter each column Negative Scenario: User cannot filter each column	must have
BRD 3.003.4.4	3		4. Search specific information from the list (i.e. similar to control F function)	Result: User should be able to search specific information from the list (i.e. similar to control f function) Negative Scenario: User cannot search specific information from the list (i.e. similar to control f function)	must have

BRD 3.003.4.5	3		5. Search a particular account via name, QPS reference number, Ebix reference number	Result: User should be able to search a particular account via name, QPS reference number, Ebix reference number Negative Scenario: User cannot search a particular account via name, QPS reference number, Ebix reference number	must have
BRD 3.003.5	3		e. Download the generated list in a .xlsx format when needed	Result: User should be able to download the generated list in a .xlsx format when needed Negative Scenario: User cannot download the generated list in a .xlsx format when needed	must have
BRD 3.003.6	3		f. Save the generated list in a .xlsx format when needed	Result: User should be able to save the generated list in a .xlsx format when needed Negative Scenario: User cannot save the generated list in a .xlsx format when needed	must have
BRD 3.003.7	3		g. Print the generated list in a .xlsx format when needed	Result: User should be able to print the generated list in a .xlsx format when needed Negative Scenario: User cannot print the generated list in a .xlsx format when needed	must have
BRD 3.003.7.1	3		1. Print preview option	Result: User should be able to print preview option Negative Scenario: User cannot print preview option	must have
BRD 3.003.7.2	3		2. Print setting options	Result: User should be able to have print setting options Negative Scenario: User does not have print setting options	must have
BRD 3.004.1	3	IV. Upload Dispositioned file	a. Upload file/s	Result: User should be able to upload file/s Negative Scenario: User cannot upload file/s	must have
BRD 3.004.1.1	3		1. Select the source path	Result: User should be able to select the source path Negative Scenario: User cannot select the	must have

				source path	
BRD 3.004.1.2	3		2. Select the file/s for upload	Result: User should be able to select the file/s for upload Negative Scenario: User cannot select the file/s for upload	must have
BRD 3.004.2	3		b. Upload single or multiple files	Result: User should be able to upload single or multiple files Negative Scenario: User cannot upload single or multiple files	must have
BRD 3.004.3	3		c. Push the uploaded account to the list of accounts for Processing	Result: User should be able to push the uploaded account to the list of accounts for processing Negative Scenario: User cannot push the uploaded account to the list of accounts for processing	must have
BRD 3.004.3.1	3		1. Capture the account/s on the uploaded file as part of the generated list of accounts for processing	Result: User should be able to capture the account/s on the uploaded file as part of the generated list of accounts for processing Negative Scenario: User cannot capture the account/s on the uploaded file as part of the generated list of accounts for processing	must have
BRD 3.004.4	3		d. Automatically tag accounts as "Not for renewal" with reason "Non-renewable Accounts" if it is not part of the uploaded dispositioned file and should not be part of the list for processing.	Result: System should automatically identify expiring accounts not listed in the dispositioned file by tagging them as "Not for Renewal" with reason "Non-renewable Accounts". These accounts should not be included in the list for processing. Negative Scenario: System cannot automatically identify expiring accounts not listed in the dispositioned file or cannot tag them as "Not for Renewal" with reason "Non-renewable Accounts" or these accounts are included in the list for processing	Must have

BRD 3.004.5			e. Edit disposition on accounts tagged as “Not for Renewal” (i.e. account was initially tagged as “Not for Renewal” then client later on decided to renew, etc.)	Result: User should be able to edit disposition on accounts that are initially tagged as “Not for Renewal” Negative Scenario: User cannot edit disposition on accounts that are initially tagged as “Not for Renewal”	must have
BRD 3.005.1	3	V. Assign Accounts	a. Assign account to Processing Office (PO)	Result: User should be able to assign account to processing office (PO) Negative Scenario: User cannot assign account to processing office (PO)	must have
BRD 3.005.1.1	3		1. Select account/s	Result: User should be able to select account/s Negative Scenario: User cannot select account/s	must have
BRD 3.005.1.1.1	3		1.1 Select single, multiple, select all except and all account/s	Result: User should be able to select single, multiple, select all except and all account/s Negative Scenario: User cannot select single, multiple, select all except and all account/s	must have
BRD 3.005.1.1.2	3		1.2 Unselect account/s	Result: User should be able to unselect account/accounts Negative Scenario: User cannot unselect account/accounts	must have
BRD 3.005.1.2	3		2. Select the name of the Processing Officer (PO)	Result: User should be able to select the name of the processing officer (PO) Negative Scenario: User cannot select the name of the processing officer (PO)	must have
BRD 3.005.1.2.1	3		2.1 Search the name of the Processing Officer (PO)	Result: User should be able to search the name of the processing officer (PO) Negative Scenario: User cannot search the name of the processing officer (PO)	must have
BRD 3.005.1.2.2	3		2.2 Select the ID of the Processing Officer (PO) from the drop-down List	Result: User should be able to select the ID of the Processing Officer (PO) from the drop-down list Negative Scenario: User cannot select the ID of the Processing Officer (PO) from the drop-down list	must have

BRD 3.005.1.3	3		3. Tag the account to the assigned Processing Officer (PO)	Result: User should be able to tag the account to the assigned Processing Officer (PO) Negative Scenario: User cannot tag the account to the assigned Processing Officer (PO)	must have
BRD 3.005.1.4	3		4. Tag the account to myself	Result: User should be able to tag the account to self Negative Scenario: User cannot tag the account to self	must have
BRD 3.005.1.5	3		5. Push the account to the next workflow	Result: User should be able to push the account to the next workflow Negative Scenario: User cannot push the account to the next workflow	must have
BRD 3.005.1.6	3		b. Re-assign account to another Processing Officer (PO)	Result: User should be able to re-assign account to another Processing Officer (PO) Negative Scenario: User cannot re-assign account to another Processing Officer (AO)	must have
BRD 3.006.1	3	VI. View accounts for processing	a. View all accounts assigned to me (display all accounts in 1 view using a scroll bar)	Result: User should be able to view all accounts assigned to me. Display all accounts in 1 view using a scroll bar Negative Scenario: User cannot view all accounts assigned to me. Cannot display all accounts in 1 view using a scroll bar	must have
BRD 3.006.1.1	3		1. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 3.006.1.2	3		2. View the complete renewal fields of the selected account from the generated expiring account list. Any updates/endorsement should reflect on the mother policy	Result: User should be able to view the complete renewal fields of the selected account from the generated expiring account list. Any updates/endorsement should reflect on the mother policy Negative Scenario: User cannot view the complete renewal fields of the selected account from the generated expiring account list. Updates/endorsement does not reflect on the mother policy	must have

BRD 3.006.1.3	3		3. Option to filter each column of the list	Result: User should be able to have an option to filter each column of the list Negative Scenario: User cannot option to filter each column of the list	must have
BRD 3.006.1.4	3		4. Option to sort the list	Result: User should be able to have an option to sort the list Negative Scenario: User cannot option to sort the list	must have
BRD 3.006.1.5	3		5. Search specific information from the list (i.e. similar to control F function)	Result: User should be able to search specific information from the list (i.e. similar to control f function) Negative Scenario: User cannot search specific information from the list (i.e. similar to control f function)	must have
BRD 3.006.1.6	3		6. Search a particular account via name, QPS reference number, Ebix reference number	Result: User should be able to search a particular account via name, QPS reference number, Ebix reference number Negative Scenario: User cannot search a particular account via name, QPS reference number, Ebix reference number	must have
BRD 3.006.2	3		b. Save the account details as needed	Result: User should be able to save the account details as needed Negative Scenario: User cannot save the account details as needed	must have
BRD 3.006.3	3		C. Print the account details as needed	Result: User should be able to print the account details as needed Negative Scenario: User cannot print the account details as needed	must have
BRD 3.006.3.1	3		1. Print preview option	Result: User should be able to print preview option Negative Scenario: User cannot print preview option	must have
BRD 3.006.3.2	3		2. Print setting options	Result: User should be able to print setting options Negative Scenario: User cannot print setting options	must have

BRD 3.007.1	3	VII. Update Data on an account	a. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 3.007.2	3		b. View specific details of the selected account. Any updates/endorsement should reflect on the mother policy	Result: User should be able to view specific details of the selected account. Any updates/endorsement should reflect on the mother policy Negative Scenario: User cannot view specific details of the selected account. Updates/endorsement does not reflect on the mother policy	must have
BRD 3.007.3	3		c. Update necessary details	Result: User should be able to update necessary details Negative Scenario: User cannot update necessary details	must have
BRD 3.007.3.1	3		1. Easily view mandatory details	Result: User should be able to easily view mandatory details Negative Scenario: User cannot easily view mandatory details	must have
BRD 3.007.3.2	3		2. Receive prompts to supply missing mandatory details. The system should not allow me to push the account to the next workflow if there are missing mandatory fields	Result: User should be able to receive prompts to supply missing mandatory details. The system should not allow user to push the account to the next workflow if there are missing mandatory fields Negative Scenario: User does not receive prompts to supply missing mandatory details. The system allows user to push the account to the next workflow if there are missing mandatory fields	must have
BRD 3.007.3.3	3		3. Save updated details	Result: User should be able to save updated details Negative Scenario: User cannot save updated details	must have
BRD 3.007.3.4	3		4. Disable editing on locked accounts (account should be locked when placement is completed)	Result: User should be able to not edit locked accounts Negative Scenario: User can edit locked accounts	must have

BRD 3.008.1	3	VIII. Review Computations	a. Review computations per account	Result: User should be able to review computations per account Negative Scenario: User cannot review computations per account	must have
BRD 3.008.1.1	3		1.View all calculated fields	Result: User should be able to view all calculated fields Negative Scenario: User cannot view all calculated fields	must have
BRD 3.008.2	3		b. Return account/s	Result: User should be able to return account/s Negative Scenario: User cannot return account/s	must have
BRD 3.008.2.1	3		1. Select single, multiple, all except and all account/s	Result: User should be able to select single, multiple, all except and all account/s Negative Scenario: User cannot select single, multiple, all except and all account/s	must have
BRD 3.008.2.2	3		2. Tag the status as returned	Result: User should be able to tag the status as returned Negative Scenario: User cannot tag the status as returned	must have
BRD 3.008.2.3	3		3. Add remarks	Result: User should be able to add remarks Negative Scenario: User cannot add remarks	must have
BRD 3.008.2.4	3		4. Save remarks	Result: User should be able to save remarks Negative Scenario: User cannot save remarks	must have
BRD 3.008.2.5	3		5. Return to the assigned Marketing TL	Result: User should be able to return to the assigned Marketing AO or Marketing TL Negative Scenario: User cannot return to the assigned marketing AO or Marketing TL	must have

BRD 3.008.2.6	3		6. Flag the returned account	Result: Account is automatically flagged once returned Negative Scenario: Account is not automatically flagged once returned	must have
BRD 3.008.2.7	3		7. Push the account/s to the next workflow	Result: User should be able to push the account/s to the next workflow Negative Scenario: User cannot push the account/s to the next workflow	must have
BRD 3.009.1	3	IX. Extract Accounts for renewal per Insurer	a. View the list of "For renewal" accounts per Insurer (display all accounts in 1 view using a scroll bar)	Result: User should be able to view the list of for renewal accounts per. Display all accounts in 1 view using a scroll bar insurer Negative Scenario: User cannot view the list of for renewal accounts per insurer. Cannot display all accounts in 1 view using a scroll bar	must have
BRD 3.009.1.1	3		1. Select date range	Result: User should be able to select date range Negative Scenario: User cannot select date range	must have
BRD 3.009.1.2	3		2. Select the name of the Insurer from the drop-down	Result: User should be able to select the name of the insurer per rom the drop-down Negative Scenario: User cannot select the name of the insurer per rom the drop-down	must have
BRD 3.009.1.3	3		3. Search the name of specific Insurer	Result: User should be able to search the name of specific insurer Negative Scenario: User cannot search the name of specific insurer	must have
BRD 3.009.1.4	3		4. View the following columns:	Result: User should be able to view the details Negative Scenario: User cannot view the details	must have
BRD 3.009.1.4.1	3		4.1. Insurance Company	Result: User should be able to see a column with insurance company value Negative Scenario: User cannot see a column with insurance company value	must have

BRD 3.009.1.4.2	3		4.2. Invoice No	Result: User should be able to see a column with invoice no value Negative Scenario: User cannot see a column with invoice no value	must have
BRD 3.009.1.4.3	3		4.3. Assured Name	Result: User should be able to see a column with assured name value Negative Scenario: User cannot see a column with assured name value	must have
BRD 3.009.1.4.4	3		4.4. Risk Code	Result: User should be able to see a column with risk code value Negative Scenario: User cannot see a column with risk code value	must have
BRD 3.009.1.4.5	3		4.5. Inception Date	Result: User should be able to see a column with inception date value Negative Scenario: User cannot see a column with inception date value	must have
BRD 3.009.1.4.6	3		4.6. Expiry Date	Result: User should be able to see a column with expiry date value Negative Scenario: User cannot see a column with expiry date value	must have
BRD 3.009.1.4.7	3		4.7. Sum Insured	Result: User should be able to see a column with sum insured value Negative Scenario: User cannot see a column with sum insured value	must have
BRD 3.009.1.4.8	3		4.8. Premium Amount	Result: User should be able to see a column with premium amount value Negative Scenario: User cannot see a column with premium amount value	must have
BRD 3.009.1.4.9	3		4.9. Commission Rate	Result: User should be able to see a column with commission rate value Negative Scenario: User cannot see a column with commission rate value	must have

BRD 3.009.1.4.10	3		4.10. AR Client (Unpaid Balance)	Result: User should be able to see a column with AR client (unpaid balance) value Negative Scenario: User cannot see a column with AR client (unpaid balance) value	must have
BRD 3.009.1.4.11	3		4.11. Is Mortgaged (Yes or No)	Result: User should be able to see a column with Is mortgaged (yes or no) value Negative Scenario: User cannot see a column with Is mortgaged (yes or no) value	must have
BRD 3.009.1.4.12	3		4.12. Premium Rate (breakdown per cover)	Result: User should be able to see a column with premium rate value Negative Scenario: User see a column with premium rate value	must have
BRD 3.009.1.4.13	3		4.13. Policy No	Result: User should be able to see a column with policy number value Negative Scenario: User cannot see a column with policy number value	must have
BRD 3.009.1.4.14	3		4.14. Risk Description	Result: User should be able to see a column with risk description value Negative Scenario: User cannot see a column with risk description value	must have
BRD 3.009.1.4.15	3		4.15. Encoder Name (User Who Booked The Account)	Result: User should be able to see a column with encoder name (user who booked the account) value Negative Scenario: User cannot see a column with encoder name (user who booked the account) value	must have
BRD 3.009.1.4.16	3		4.16. Unit Head	Result: User should be able to see a column with Unit Head value Negative Scenario: User cannot see a column with Unit Head value	must have

BRD 3.009.1.4.17	3		4.17. Business Origin	Result: User should be able to see a column with business origin value Negative Scenario: User cannot see a column with business origin value	must have
BRD 3.009.1.4.18	3		4.18. Account Type	Result: User should be able to see a column with account type value Negative Scenario: User cannot see a column with account type value	must have
BRD 3.009.1.4.19	3		4.19. Region	Result: User should be able to see a column with region value Negative Scenario: User cannot see a column with region value	must have
BRD 3.009.1.4.20	3		4.20. Area	Result: User should be able to see a column with area value Negative Scenario: User cannot see a column with area value	must have
BRD 3.009.1.4.21	3		4.21. Branch	Result: User should be able to see a column with branch value Negative Scenario: User cannot see a column with branch value	must have
BRD 3.009.1.4.22	3		4.22. Account Officer Name	Result: User should be able to see a column with account officer name value Negative Scenario: User cannot see a column with account officer name value	must have
BRD 3.009.1.4.23	3		4.23. Remarks	Result: User should be able to see a column with remarks value Negative Scenario: User cannot see a column with remarks value	must have
BRD 3.009.1.4.24	3		4.24. Bodily Injury and Property Damage for Motor Accounts (BIPD)	Result: User should be able to see a column with Bodily Injury and Property Damage for Motor Accounts value Negative Scenario: User cannot see a column with Bodily Injury and Property Damage for Motor Accounts value	must have

BRD 3.009.1.4.25	3		4.25. Seating capacity for Motor	Result: User should be able to see a column with Seating Capacity value Negative Scenario: User cannot see a column with Seating Capacity value	must have
BRD 3.009.1.4.26	3		4.26. Auto Personal Accident for Motor	Result: User should be able to see a column with Auto Personal Accident for Motor value Negative Scenario: User cannot see a column with Auto Personal Accident for Motor value	must have
BRD 3.009.1.4.27	3		4.27. Sum Insured (breakdown per cover)	Result: User should be able to see a column with Sum Insured (breakdown per cover) value Negative Scenario: User see a column with Sum Insured value. Not breakdown per cover	must have
BRD 3.009.1.4.28	3		4.28. Packaged/Non-Packaged description	Result: User should be able to see a column with packaged/non-packaged description value Negative Scenario: User see a column with packaged/non-packaged description value	must have
BRD 3.009.2	3		b. Download the generated list in a .xlsx format when needed	Result: User should be able to download the generated list in a .xlsx format when needed Negative Scenario: User cannot download the generated list in a .xlsx format when needed	must have
BRD 3.009.3	3		c. Save the generated list in a .xlsx format when needed	Result: User should be able to save the generated list in a .xlsx format when needed Negative Scenario: User cannot save the generated list in a .xlsx format when needed	must have
BRD 3.009.4	3		d. Print the generated list in a .xlsx format when needed	Result: User should be able to print the generated list in a .xlsx format when needed Negative Scenario: User cannot print the generated list in a .xlsx format when needed	must have

BRD 3.009.4.1	3		1. Print preview option	Result: User should be able to have a print preview option Negative Scenario: User does not have a print preview option	must have
BRD 3.009.4.2	3		2. Print setting options	Result: User should be able to have print setting options Negative Scenario: User does not have print setting options	must have
BRD 3.009.5	3		e. Send the file to Insurer/s	Result: User should be able to send the file to insurer/s Negative Scenario: User cannot send the file to insurer/s	must have
BRD 3.009.5.1	3		1. Encrypt and add password on the file	Result: User should be able to encrypt the file and add password. Negative Scenario: User cannot encrypt the file and add password.	must have
BRD 3.009.6	4		f. Received dispositioned file from Insurer	Result: User should be able to received dispositioned file from insurer Negative Scenario: User cannot receive dispositioned file from insurer	must have
BRD 3.009.6.1	4		1. Download and view the file	Result: User should be able to download and view the file Negative Scenario: User cannot download and view the file	must have
BRD 3.009.6.2	4		2. Update account	Result: User should be able to update account Negative Scenario: User cannot update account	must have
BRD 3.010.1	1 to 6	X. Generate Report	a. Select expiry date range for each report	Result: User should be able to select expiry date range for each report Negative Scenario: User cannot select expiry date range for each report	must have

BRD 3.010.1.1	1 to 6		1. Select month, day and year	Result: User should be able to select month, day and year Negative Scenario: User cannot select month, day and year	must have
BRD 3.010.1.2	1 to 6		2. Change the selected date range	Result: User should be able to change the selected date range Negative Scenario: User cannot change the selected date range	must have
BRD 3.010.2	1 to 6		b. Select single, multiple, all and all except criteria for each report	Result: User should be able to select single, multiple, all and all except criteria for each report Negative Scenario: User cannot select single, multiple, all and all except criteria for each report	must have
BRD 3.010.2.1	1 to 6		1. Select single, multiple, all except and all Unit Head from the drop-down list	Result: User should be able to select single, multiple, all except and all unit head from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all unit head from the drop-down list	must have
BRD 3.010.2.2	1 to 6		2. Search specific Unit Head from the drop-down list	Result: User should be able to search specific unit head from the drop-down list Negative Scenario: User cannot search specific unit head from the drop-down list	must have
BRD 3.010.2.3	1 to 6		3. Select single, multiple, all except and all Risk Code from the drop-down list	Result: User should be able to select single, multiple, all except and all risk code from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all risk code from the drop-down list	must have
BRD 3.010.2.4	1 to 6		4. Search specific Risk Code from the drop-down list	Result: User should be able to search specific risk code from the drop-down list Negative Scenario: User cannot search specific risk code from the drop-down list	must have

BRD 3.010.2.5	1 to 6		5. Select single, multiple, all except and all Insurance Company from the drop-down list	Result: User should be able to select single, multiple, all except and all insurance company from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all Insurance Company from the drop-down list	must have
BRD 3.010.2.6	1 to 6		6. Search specific Insurance Company from the drop-down list	Result: User should be able to search specific insurance company from the drop-down list Negative Scenario: User cannot search specific Insurance Company from the drop-down list	must have
BRD 3.010.2.7	1 to 6		7. Select single, multiple, all except and all Insurance Group from the drop-down list	Result: User should be able to select single, multiple, all except and all Insurance Group from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all Insurance Group from the drop-down list	must have
BRD 3.010.2.8	1 to 6		8. Search specific Insurance Group from the drop-down list	Result: User should be able to search specific Insurance Group from the drop-down list Negative Scenario: User cannot search specific Insurance Group from the drop-down list	must have
BRD 3.010.2.9	1 to 6		9. Select single, multiple, all except and all Business Origin from the drop-down list	Result: User should be able to select single, multiple, all except and all business origin from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all business origin from the drop-down list	must have
BRD 3.010.2.10	1 to 6		10. Search specific Business Origin from the drop-down list	Result: User should be able to search specific business origin from the drop-down list Negative Scenario: User cannot search specific business origin from the drop-down list	must have
BRD 3.010.2.11	1 to 6		11. Select single, multiple, all except and all Market Category from the drop-down list	Result: User should be able to select single, multiple, all except and all market category from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all market category from the drop-down list	must have

BRD 3.010.2.12	1 to 6		12. Search specific Market Category from the drop-down list	Result: User should be able to search specific market category from the drop-down list Negative Scenario: User cannot search specific market category from the drop-down list	must have
BRD 3.010.2.13	1 to 6		13. Select single, multiple, all except and all BDO Branch from the drop-down list	Result: User should be able to select single, multiple, all except and all BDO branch from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDO branch from the drop-down list	must have
BRD 3.010.2.14	1 to 6		14. Search specific BDO Branch from the drop-down list	Result: User should be able to search specific BDO branch from the drop-down list Negative Scenario: User cannot search specific BDO branch from the drop-down list	must have
BRD 3.010.2.15	1 to 6		15. Select single, multiple, all except and all BDO Area from the drop-down list	Result: User should be able to select single, multiple, all except and all BDO area from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDO area from the drop-down list	must have
BRD 3.010.2.16	1 to 6		16. Search specific BDO Area from the drop-down list	Result: User should be able to search specific BDO area from the drop-down list Negative Scenario: User cannot search specific BDO area from the drop-down list	must have
BRD 3.010.2.17	1 to 6		17. Select single, multiple, all except and all Region from the drop-down list	Result: User should be able to select single, multiple, all except and all region from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all region from the drop-down list	must have
BRD 3.010.2.18	1 to 6		18. Search specific Region from the drop-down list	Result: User should be able to search specific region from the drop-down list Negative Scenario: User cannot search specific region from the drop-down list	must have

BRD 3.010.2.19	1 to 6		19. Select single, multiple, all except and all Bank Officer from the drop-down list	Result: User should be able to select single, multiple, all except and all bank officer from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all bank officer from the drop-down list	must have
BRD 3.010.2.20	1 to 6		20. Search specific Bank Officer from the drop-down list	Result: User should be able to search specific bank officer from the drop-down list Negative Scenario: User cannot search specific bank officer from the drop-down list	must have
BRD 3.010.2.21	1 to 6		21. Select single, multiple, all except and all Bank Unit from the drop-down list	Result: User should be able to select single, multiple, all except and all bank unit from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all bank unit from the drop-down list	must have
BRD 3.010.2.22	1 to 6		22. Search specific Bank Unit from the drop-down list	Result: User should be able to search specific bank unit from the drop-down list Negative Scenario: User cannot search specific bank unit from the drop-down list	must have
BRD 3.010.2.23	1 to 6		23. Select single, multiple, all except and all Product Code from the drop-down list	Result: User should be able to select single, multiple, all except and all product code from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all product code from the drop-down list	must have
BRD 3.010.2.24	1 to 6		24. Search specific Product Code from the drop-down list	Result: User should be able to search specific product code from the drop-down list Negative Scenario: User cannot search specific product code from the drop-down list	must have
BRD 3.010.2.25	1 to 6		25. Select single, multiple, all except and all Account Type from the drop-down list	Result: User should be able to select single, multiple, all except and all account type from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all account type from the drop-down list	must have

BRD 3.010.2.26	1 to 6		26. Search specific Account Type drop-down list	Result: User should be able to search specific account type drop-down list Negative Scenario: User cannot search specific account type drop-down list	must have
BRD 3.010.2.27	1 to 6		27. Select single, multiple, all except and all BDOI Branch from the drop-down list	Result: User should be able to select single, multiple, all except and all BDOI branch from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDOI branch from the drop-down list	must have
BRD 3.010.2.28	1 to 6		28. Search specific BDOI Branch from the drop-down list	Result: User should be able to search specific BDOI branch from the drop-down list Negative Scenario: User cannot search specific BDOI branch from the drop-down list	must have
BRD 3.010.2.29	1 to 6		29. Select single, multiple, all except and all Location from the drop-down list	Result: User should be able to select single, multiple, all except and all location from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all location from the drop-down list	must have
BRD 3.010.2.30	1 to 6		30. Search specific Location from the drop-down list	Result: User should be able to search specific location from the drop-down list Negative Scenario: User cannot search specific location from the drop-down list	must have
BRD 3.010.2.31	1 to 6		31. Select single, multiple, all except and all Account Broker from the drop-down list	Result: User should be able to select single, multiple, all except and all account broker from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all account broker from the drop-down list	must have
BRD 3.010.2.32	1 to 6		32. Search specific Account Broker from the drop-down list	Result: User should be able to search specific account broker from the drop-down list Negative Scenario: User cannot search specific account broker from the drop-down list	must have

BRD 3.010.2.33	1 to 6		33. Select single, multiple, all except and all Business Type from the drop-down list	Result: User should be able to select single, multiple, all except and all business type from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all business type from the drop-down list	must have
BRD 3.010.2.34	1 to 6		34. Search specific Business Type from the drop-down list	Result: User should be able to search specific business type from the drop-down list Negative Scenario: User cannot search specific business type from the drop-down list	must have
BRD 3.010.2.35	1 to 6		35. Select single, multiple, all except and all Customer Segment from the drop-down list	Result: User should be able to select single, multiple, all except and all customer segment from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all customer segment from the drop-down list	must have
BRD 3.010.2.36	1 to 6		36. Search specific Customer Segment from the drop-down list	Result: User should be able to search specific customer segment from the drop-down list Negative Scenario: User cannot search specific customer segment from the drop-down list	must have
BRD 3.010.2.37	1 to 6		37. Select single, multiple, all except and all Specific Client from the drop-down list	Result: User should be able to select single, multiple, all except and all specific client from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all specific client from the drop-down list	must have
BRD 3.010.2.38	1 to 6		38. Search specific Client from the drop-down list	Result: User should be able to search specific Client from the drop-down list Negative Scenario: User cannot search specific Client from the drop-down list	must have
BRD 3.010.2.39	1 to 6		39. Select single, multiple, all except and all Renewal Status from the drop-down list	Result: User should be able to select single, multiple, all except and all renewal status from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all renewal status from the drop-down list	must have

BRD 3.010.2.40	1 to 6		40. Search specific Renewal Status from the drop-down list	Result: User should be able to search specific renewal status from the drop-down list Negative Scenario: User cannot search specific renewal status from the drop-down list	must have
BRD 3.010.3	1 to 6		c. Generate a report showing the overall status of the renewal accounts with the following information per invoice	Result: User should be able to generate a report showing the overall status of the renewal accounts with the following information per invoice Negative Scenario: User cannot generate a report showing the overall status of the renewal accounts with the following information per invoice	must have
BRD 3.010.3.1	1 to 6		1. Display the following information per invoice (display all accounts in 1 view using a scroll bar)	Result: User should be able to display the following information per invoice. Display all accounts in 1 view using a scroll bar Negative Scenario: User cannot display the following information per invoice. Cannot display all accounts in 1 view using a scroll bar	must have
BRD 3.010.3.1.1	1 to 6		1.1. Unit Head	Result: User should be able to see a column with the complete list of Unit Heads Negative Scenario: User cannot see a column with the complete list of Unit Heads	must have
BRD 3.010.3.1.2	1 to 6		1.2. Account Broker	Result: User should be able to see a column with the account broker value Negative Scenario: User cannot see a column with account broker value	must have
BRD 3.010.3.1.3	1 to 6		1.3. Business Origin	Result: User should be able to User should be able to see a column with business origin value Negative Scenario: User cannot see a column with business origin value	must have
BRD 3.010.3.1.4	1 to 6		1.4. Bank Officer	Result: User should be able to see a column with bank officer value Negative Scenario: User cannot see a column with bank officer value	must have

BRD 3.010.3.1.5	1 to 6		1.1. Renewal Reference	Result: User should be able to see a column with renewal reference value Negative Scenario: User cannot see a column with renewal reference value	must have
BRD 3.010.3.1.6	1 to 6		1.6. Expiring Ebix Invoice No	Result: User should be able to see a column with expiring Ebix invoice no value Negative Scenario: User cannot see a column with expiring Ebix invoice no value	must have
BRD 3.010.3.1.7	1 to 6		1.7. Assured	Result: User should be able to see a column with assured value Negative Scenario: User cannot see a column with assured value	must have
BRD 3.010.3.1.8	1 to 6		1.8. Type of Risk	Result: User should be able to see a column with type of risk value Negative Scenario: User cannot see a column with type of risk value	must have
BRD 3.010.3.1.9	1 to 6		1.9. Expiring Invoice Inception Date	Result: User should be able to see a column with expiring invoice inception date value Negative Scenario: User cannot see a column with expiring invoice inception date value	must have
BRD 3.010.3.1.10	1 to 6		1.10. Expiring Invoice Expiry Date	Result: User should be able to see a column with expiring invoice expiry date value Negative Scenario: User cannot see a column with expiring invoice expiry date value	must have
BRD 3.010.3.1.11	1 to 6		1.11. Renewal Reference Inception Date	Result: User should be able to see a column with renewal reference inception date value Negative Scenario: User cannot see a column with renewal reference inception date value	must have

BRD 3.010.3.1.12	1 to 6		1.12. Renewal Reference Expiry Date	Result: User should be able to see a column with renewal reference expiry date value Negative Scenario: User cannot see a column with renewal reference expiry date value	must have
BRD 3.010.3.1.13	1 to 6		1.13. Expiring Invoice Policy Number	Result: User should be able to see a column with expiring invoice policy number value Negative Scenario: User cannot see a column with expiring invoice policy number value	must have
BRD 3.010.3.1.14	1 to 6		1.14. Account Type	Result: User should be able to see a column with the complete list of account type Negative Scenario: User cannot see a column with the complete list of account type	must have
BRD 3.010.3.1.15	1 to 6		1.11. Basic Premium	Result: User should be able to see a column with basic premium value Negative Scenario: User cannot see a column with basic premium value	must have
BRD 3.010.3.1.16	1 to 6		1.16. Gross Premium	Result: User should be able to see a column with gross premium value Negative Scenario: User cannot see a column with gross premium value	must have
BRD 3.010.3.1.17	1 to 6		1.17. Premium Rate	Result: User should be able to see a column with premium rate value Negative Scenario: User cannot see a column with premium rate value	must have
BRD 3.010.3.1.18	1 to 6		1.18. Commission Rate	Result: User should be able to see a column with commission rate value Negative Scenario: User cannot see a column with commission rate value	must have

BRD 3.010.3.1.19	1 to 6		1.19. Total Sum Insured	Result: User should be able to see a column with total sum insured value Negative Scenario: User cannot see a column with total sum insured value	must have
BRD 3.010.3.1.20	1 to 6		1.20. Risk Description	Result: User should be able to see a column with risk description value Negative Scenario: User cannot see a column with risk description value	must have
BRD 3.010.3.1.21	1 to 6		1.21. Location Of Risk	Result: User should be able to see a column with location of risk value Negative Scenario: User cannot see a column with location of risk value	must have
BRD 3.010.3.1.22	1 to 6		1.22. Address	Result: User should be able to see a column with address value Negative Scenario: User cannot see a column with address value	must have
BRD 3.010.3.1.23	1 to 6		1.23. Contact No(S).	Result: User should be able to see a column with contact number value Negative Scenario: User cannot see a column with contact number value	must have
BRD 3.010.3.1.24	1 to 6		1.24. Email Address	Result: User should be able to see a column with email address value Negative Scenario: User cannot email address value	must have
BRD 3.010.3.1.25	1 to 6		1.21. Region	Result: User should be able to see a column with Rregion value Negative Scenario: User cannot see a column with Region value	must have
BRD 3.010.3.1.26	1 to 6		1.26. Area	Result: User should be able to see a column with Area value Negative Scenario: User cannot see a column with Area value	must have

BRD 3.010.3.1.27	1 to 6		1.27. Branch	Result: User should be able to see a column with Branch value Negative Scenario: User cannot see a column with Branch value	must have
BRD 3.010.3.1.28	1 to 6		1.28. Insurer	Result: User should be able to see a column with Insurer value Negative Scenario: User cannot see a column with Insurer value	must have
BRD 3.010.3.1.29	1 to 6		1.29. Location	Result: User should be able to see a column with location value Negative Scenario: User cannot see a column with location value	must have
BRD 3.010.3.1.30	1 to 6		1.30. Mortgaged To BDO	Result: User should be able to see a column with Mortgaged to BDO value Negative Scenario: User cannot see a column with Mortgaged to BDO value	must have
BRD 3.010.3.1.31	1 to 6		1.31. Mortgagee Bank	Result: User should be able to see a column with mortgagee bank value Negative Scenario: User cannot see a column with mortgagee bank value	must have
BRD 3.010.3.1.32	1 to 6		1.32. PN Number	Result: User should be able to see a column with PN number value Negative Scenario: User cannot see a column with PN number value	must have
BRD 3.010.3.1.33	1 to 6		1.33. Hold Cover (HC)	Result: User should be able to see a column with hold cover (HC) value Negative Scenario: User cannot see a column with hold cover (HC) value	must have
BRD 3.010.3.1.34	1 to 6		1.34. HC End Date	Result: User should be able to see a column with HC end date value Negative Scenario: User cannot see a column with HC end date value	must have

BRD 3.010.3.1.35	1 to 6		1.31. Renewal Status	Result: User should be able to see a column with renewal status value Negative Scenario: User cannot see a column with renewal status value	must have
BRD 3.010.3.1.36	1 to 6		1.36. Reason for "Not for Renewal"	Result: User should be able to see a column with reason for not for renewal value Negative Scenario: User cannot see a column with reason for not for renewal value	must have
BRD 3.010.3.1.37	1 to 6		1.37. Remarks Of Acct Officer	Result: User should be able to see a column with remarks of acct officer value Negative Scenario: User cannot see a column with remarks of acct officer value	must have
BRD 3.010.3.1.38	1 to 6		1.38. Name of Renewal Processor	Result: User should be able to see a column with name of renewal processor value Negative Scenario: User cannot see a column with name of renewal processor value	must have
BRD 3.010.3.1.39	1 to 6		1.39. Name of Assigned Marketing Account Officer	Result: User should be able to see a column with name of assigned marketing account officer value Negative Scenario: User cannot see a column with name of assigned marketing account officer value	must have
BRD 3.010.3.1.40	1 to 6		1.40. Sum Insured per Cover	Result: User should be able to see a column with Sum Insured per Cover value Negative Scenario: User cannot see a column with Sum Insured per Cover value	must have
BRD 3.010.3.2	1 to 6		2. Display a summary	Result: User should be able to display a summary Negative Scenario: User cannot display a summary	must have

BRD 3.010.3.2.1	1 to 6		2.1. Total No. of Booked	Result: User should be able to see the total no. of booked value Negative Scenario: User cannot see the total no. of booked value	must have
BRD 3.010.3.2.2	1 to 6		2.2. Total No. of Cancelled	Result: User should be able to see the total no. of cancelled value Negative Scenario: User cannot see the total no. of cancelled value	must have
BRD 3.010.3.2.3	1 to 6		2.3. Total No. of Renewal - For Placement	Result: User should be able to see the total no. of renewal - for placement value Negative Scenario: User cannot see the total no. of renewal - for placement value	must have
BRD 3.010.3.2.4	1 to 6		2.4. Total No. of Renewal - For Proposal	Result: User should be able to see the total no. of renewal - for proposal value Negative Scenario: User cannot see total no. of renewal - for proposal value	must have
BRD 3.010.3.2.5	1 to 6		2.5. Total No. of Renewal - For ARF	Result: User should be able to see the total no. of renewal - for ARF value Negative Scenario: User cannot see the total no. of renewal - for ARF value	must have
BRD 3.010.3.2.6	1 to 6		2.6. Total No. of RA Processed	Result: User should be able to see the total no. of ra processed value Negative Scenario: User cannot see the total no. of ra processed value	must have
BRD 3.010.3.2.7	1 to 6		2.7. Total No. of Renewal - For RA Processing	Result: User should be able to see the total no. of renewal - for RA processing value Negative Scenario: User cannot see the total no. of renewal - for RA processing value	must have
BRD 3.010.3.2.8	1 to 6		2.8. Total No. of Renew to TSU	Result: User should be able to see the total no. of renew to TSU value Negative Scenario: User cannot see the total no. of renew to TSU value	must have

BRD 3.010.3.2.9	1 to 6		2.9. Total No. of Returned to Marketing	Result: User should be able to see the total no. of returned to marketing value Negative Scenario: User cannot see the total no. of returned to marketing value	must have
BRD 3.010.3.2.10	1 to 6		2.10. Total No. of Awaiting Marketing TL Approval (For Renewal)	Result: User should be able to see the total no. of awaiting marketing TL approval (for renewal) value Negative Scenario: User cannot see total no. of awaiting marketing TL approval (for renewal) value	must have
BRD 3.010.3.2.11	1 to 6		2.11. Total No. of Awaiting Marketing TL Approval (For Quotation)	Result: User should be able to see the total no. of awaiting marketing TL approval (for quotation) value Negative Scenario: User cannot see the total no. of awaiting marketing TL approval (for quotation) value	must have
BRD 3.010.3.2.12	1 to 6		2.12. Total No. of Awaiting Marketing TL Approval (Not For Renewal)	Result: User should be able to see the no. of awaiting marketing TL approval (not for renewal) value Negative Scenario: User cannot see the no. of awaiting marketing TL approval (not for renewal) value	must have
BRD 3.010.3.2.13	1 to 6		2.13. Total No. of Awaiting Marketing TL Approval (Lost Business)	Result: User should be able to see the no. of awaiting marketing TL approval (lost business) value Negative Scenario: User cannot see the no. of awaiting marketing TL approval (lost business) value	must have
BRD 3.010.3.2.14	1 to 6		2.14. Total No. of Disapproved Accounts	Result: User should be able to see the total no. of disapproved accounts value Negative Scenario: User cannot see the total no. of disapproved accounts value	must have
BRD 3.010.3.2.15	1 to 6		2.15. Total No. of Not for Renewal Accounts	Result: User should be able to see the total no. of not for renewal accounts value Negative Scenario: User cannot see the total no. of not for renewal accounts value	must have

BRD 3.010.3.2.16	1 to 6		2.16. Total No. of Mortgaged Lost Business	Result: User should be able to see the total no. of mortgaged lost business value Negative Scenario: User cannot see the total no. of mortgaged lost business value	must have
BRD 3.010.3.2.17	1 to 6		2.17. Total No. of Unrenewed Mortgaged for Proposal	Result: User should be able to see the total no. of unrenewed mortgaged for proposal value Negative Scenario: User cannot see the total no. of unrenewed mortgaged for proposal value	must have
BRD 3.010.3.2.18	1 to 6		2.18. Total No. of Unrenewed Mortgaged Transferred to Other Unit	Result: User should be able to see the total no. of unrenewed mortgaged transferred to Other unit value Negative Scenario: User cannot see the total no. of unrenewed mortgaged transferred to Other unit value	must have
BRD 3.010.3.2.19	1 to 6		2.19. Total No. of Mortgaged Loan Fully Paid	Result: User should be able to see the total no. of mortgaged loan fully paid value Negative Scenario: User cannot see the total no. of mortgaged loan fully paid value	must have
BRD 3.010.3.2.20	1 to 6		2.20. Total number of Unrenewed Mortgaged Awaiting Confirmation	Result: User should be able to see the unrenewed mortgaged awaiting confirmation value Negative Scenario: User cannot see the unrenewed mortgaged awaiting confirmation value	must have
BRD 3.010.3.2.21	1 to 6		2.21. Total No. of Mortgaged Booked under New Invoice No.	Result: User should be able to see the total no. of mortgaged booked under new invoice no. value Negative Scenario: User cannot see the total no. of mortgaged booked under new invoice no. value	must have
BRD 3.010.3.2.22	1 to 6		2.22. Total No. of Unrenewed Mortgaged No Disposition	Result: User should be able to see the total no. of unrenewed mortgaged no disposition value Negative Scenario: User cannot see the total no. of unrenewed mortgaged no disposition value	must have

BRD 3.010.3.2.23	1 to 6		2.23. Total No. of Unrenewed Mortgaged to Other Bank	Result: User should be able to see the total no. of unrenewed mortgaged to Other bank value Negative Scenario: User cannot see the total no. of unrenewed mortgaged to other bank value	must have
BRD 3.010.3.2.24	1 to 6		2.24. Total No. of Non- Mortgaged Lost Business	Result: User should be able to see the total no. of non- mortgaged lost business value Negative Scenario: User cannot see the total no. of non- mortgaged lost business value	must have
BRD 3.010.3.2.25	1 to 6		2.25. Total No. of Unrenewed Non- Mortgaged For Proposal	Result: User should be able to see the total no. of unrenewed non- mortgaged for proposal value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged for proposal value	must have
BRD 3.010.3.2.26	1 to 6		2.26. Total No. of Unrenewed Non- Mortgaged Transferred to Other Unit	Result: User should be able to see the total no. of unrenewed non- mortgaged transferred to Other unit value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged transferred to other unit value	must have
BRD 3.010.3.2.27	1 to 6		2.27. Total No. of Non- Mortgaged Loan Fully Paid	Result: User should be able to see the total no. of non- mortgaged loan fully paid value Negative Scenario: User cannot see the total no. of non- mortgaged loan fully paid value	must have
BRD 3.010.3.2.28	1 to 6		2.28. Total No. of Unrenewed Non- Mortgaged Awaiting Confirmation from Client	Result: User should be able to see the total no. of unrenewed non- mortgaged awaiting confirmation from client value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged awaiting confirmation from client value	must have

BRD 3.010.3.2.29	1 to 6		2.29. Total No. of Non-Mortgaged Booked under Invoice No.	Result: User should be able to see the total no. of non- mortgaged booked under invoice no. value Negative Scenario: User cannot see the total no. of non- mortgaged booked under invoice no. value	must have
BRD 3.010.3.2.30	1 to 6		2.30. Total No. of Unrenewed Non- Mortgaged with No Disposition	Result: User should be able to see the total no. of unrenewed non- mortgaged no disposition value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged no disposition value	must have
BRD 3.010.3.2.31	1 to 6		2.31. Total No. of Unrenewed Non- Mortgaged to Other Bank	Result: User should be able to see the total no. of unrenewed non- mortgaged to other bank value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged to other bank value	must have
BRD 3.010.3.2.32	1 to 6		2.32. Total No. of Non-renewable Accounts	Result: User should be able to see the total no. of non-renewable accounts value Negative Scenario: User cannot see the total no. of non-renewable accounts value	must have
BRD 3.010.3.2.33	1 to 6		2.33. Total No. of No Disposition	Result: User should be able to see the total no. of no disposition value Negative Scenario: User cannot see the total no. of no disposition value	must have
BRD 3.010.3.2.34	1 to 6		2.34. Total No. of Accounts	Result: User should be able to see the total no. of accounts value Negative Scenario: User cannot see the total no. of accounts value	must have
BRD 3.010.4	1 to 6		d. Download report	Result: User should not experience issue/s in downloading the report Negative Scenario: User experienced issue/s in see the download report value	must have

BRD 3.010.4.1	1 to 6		1. Download in a .xlsx format	Result: User should be able to download in a .xlsx format Negative Scenario: User cannot download in a .xlsx format	must have
BRD 3.010.4.2	1 to 6		2. Download in a .pdf format	Result: User should be able to download in a .pdf format Negative Scenario: User cannot download in a .pdf format	must have
BRD 3.010.5	1 to 6		e. Save report in the desired location	Result: User should be able to save report in the desired location Negative Scenario: User cannot save report in the desired location	must have
BRD 3.010.5.1	1 to 6		1. Save in a .xlsx format	Result: User should be able to save in a .xlsx format Negative Scenario: User cannot save in a .xlsx format	must have
BRD 3.010.5.2	1 to 6		2. Save in a .pdf format	Result: User should be able to save in a .pdf format Negative Scenario: User cannot save in a .pdf format	must have
BRD 3.010.6	1 to 6		f. Print report	Result: User should be able to print report Negative Scenario: User cannot print report	must have
BRD 3.010.7	1 to 6		g. View the assigned accounts per Processing Officer in a dashboard	Result: User should be able to view the assigned accounts per Processing Officer in a dashboard Negative Scenario: User cannot view the assigned accounts per Processing Officer in a dashboard	must have
BRD 3.011.1	6	XI. Generate Renewal Advice (RA)	a. Select single, multiple, all except and all accounts	Result: User should be able to select single, multiple, all except and all accounts Negative Scenario: User cannot select single, multiple, all except and all accounts	must have

BRD 3.011.2	6		b. Generate RA for the selected account/s	Result: User should be able to generate RA for the selected account/s Negative Scenario: User cannot generate RA for the selected account/s	must have
BRD 3.011.2.1	6		1. Disable RA generation on locked accounts (account should be locked on the marketing side when the RA is generated)	Result: User should be able to not generate RA on locked accounts Negative Scenario: User can RA generate on locked accounts	must have
BRD 3.011.2.2	6		2. With visible identifier if the generated RA is for first notice or second notice	Result: User should have a visible identifier if the generated RA is for first notice or second notice Negative Scenario: User has no visible identifier if the generated RA is for first notice or second notice	must have
BRD 3.011.3	6		c. View the generated RA	Result: User should be able to view the generated RA Negative Scenario: User cannot view the generated RA	must have
BRD 3.011.3.1	6		1. Select RA	Result: User should be able to select RA Negative Scenario: User cannot select RA	must have
BRD 3.011.3.2	6		2. Preview the details of the RA	Result: User should be able to preview the details of the RA Negative Scenario: User cannot preview the details of the RA	must have
BRD 3.011.3.3	6		3. Close the preview	Result: User should be able to close the preview screen Negative Scenario: User cannot close the preview screen	must have
BRD 3.011.4	6		d. Download the generated RA	Result: User should be able to download the generated RA Negative Scenario: User cannot download the generated RA	must have

BRD 3.011.4.1	6		1. Select single or multiple RA/s	Result: User should be able to select single or multiple RA/s Negative Scenario: User cannot select single or multiple RA/s	must have
BRD 3.011.4.2	6		2. Download single or multiple RA/s	Result: User should be able to download single or multiple RA/s Negative Scenario: User cannot download single or multiple RA/s	must have
BRD 3.011.5	6		e. Save the generated RA/s	Result: User should be able to save the generated RA/s Negative Scenario: User cannot save the generated RA/s	must have
BRD 3.011.5.1	6		1. Select single or multiple RA/s	Result: User should be able to select single or multiple RA/s Negative Scenario: User cannot select single or multiple RA/s	must have
BRD 3.011.5.2	6		2. Select the desired location	Result: User should be able to select the desired location Negative Scenario: User cannot select the desired location	must have
BRD 3.011.6	5		f. Extract the details required for RA sending	Result: User should be able to extract required details for RA sending Negative Scenario: User cannot extract details for RA sending	must have
BRD 3.011.7	6		g. Send RA in batch	Result: User should be able to send RAs in batch Negative Scenario: User cannot send RAs in batch	must have
BRD 3.011.7.1	6		1. Encrypt and add password prior to sendin	Result: RA should be encrypted and with password Negative Scenario: RA is not encrypted and/or no password	must have
D. As a Processing Officer, I want to be able to...					

BRD 4.001.1	3	I. Log in as a Processing Officer	a. Access the module/application using any BDO issued device	Result: User should be able to access the module/application using any BDO issued device Negative Scenario: User cannot access the module/application using any BDO issued device	must have
BRD 4.001.1.1	3		1. Log in with a Operations Team Leader user profile	Result: User should be able to log in with a Processing Team Leader user profile Negative Scenario: User cannot log in with a Processing Team Leader user profile	must have
BRD 4.001.1.2	3		2. Receive the inactivity warning (15 minutes)	Result: User should be able to receive the inactivity warning after 15 minutes of inactivity Negative Scenario: User did not receive the inactivity warning after 15 minutes of inactivity	must have
BRD 4.001.1.3	3		3. Receive warning prior to system triggered log out (30 minutes)	Result: User should be able to receive warning 30 minutes prior to system triggered log out Negative Scenario: User did not receive warning 30 minutes prior to system triggered log out	must have
BRD 4.002.1	3	II. Open the Application in multiple tabs	a. Open the application in multiple tabs	Result: User should be able to open the application in multiple tabs Negative Scenario: User cannot open the application in multiple tabs	must have
BRD 4.003.1	3	III. View accounts for processing	a. View all accounts assigned to me (display all accounts in 1 view using a scroll bar). Any updates/endorsement should reflect on the mother policy	Result: User should be able to view all accounts assigned to me. Display all accounts in 1 view using a scroll bar. Any updates/endorsement should reflect on the mother policy Negative Scenario: User cannot view all accounts assigned to me. Cannot display all accounts in 1 view using a scroll bar. Updates/endorsement does not reflect on	must have

				the mother policy	
BRD 4.003.1.1	3		1. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 4.003.1.2	3		2. View the complete renewal fields of the selected account from the generated expiring account list	Result: User should be able to view the complete renewal fields of the selected account from the generated expiring account list Negative Scenario: User cannot view the complete renewal fields of the selected account from the generated expiring account list	must have
BRD 4.003.1.3	3		3. Option to filter each column of the list	Result: User should be able to have an option to filter each column of the list Negative Scenario: User cannot option to filter each column of the list	must have
BRD 4.003.1.4	3		4. Option to sort the list	Result: User should be able to have an option to sort the list Negative Scenario: User cannot option to sort the list	must have
BRD 4.003.1.5	3		5. Search specific information from the list (i.e. similar to control F function)	Result: User should be able to search specific information from the list (i.e. similar to control f function) Negative Scenario: User cannot search specific information from the list (i.e. similar to control f function)	must have
BRD 4.003.1.6	3		6. Search a particular account via name, QPS reference number, Ebix reference number	Result: User should be able to search a particular account via name, QPS reference number, Ebix reference number Negative Scenario: User cannot search a particular account via name, QPS reference number, Ebix reference number	must have

BRD 4.003.2	3		b. Save the account details as needed	Result: User should be able to save the account details as needed Negative Scenario: User cannot save the account details as needed	must have
BRD 4.003.3	3		C. Print the account details as needed	Result: User should be able to print the account details as needed Negative Scenario: User cannot print the account details as needed	must have
BRD 4.003.3.1	3		1. Print preview option	Result: User should be able to print preview option Negative Scenario: User cannot print preview option	must have
BRD 4.003.3.2	3		2. Print setting options	Result: User should be able to print setting options Negative Scenario: User cannot print setting options	must have
BRD 4.004.1	3	IV. Upload Dispositioned file	a. Upload file/s	Result: User should be able to upload file/s Negative Scenario: User cannot upload file/s	must have
BRD 4.004.1.1	3		1. Select the source path	Result: User should be able to select the source path Negative Scenario: User cannot select the source path	must have
BRD 4.004.1.2	3		2. Select the file/s for upload	Result: User should be able to select the file/s for upload Negative Scenario: User cannot select the file/s for upload	must have
BRD 4.004.2	3		b. Upload single or multiple files	Result: User should be able to upload single or multiple files Negative Scenario: User cannot upload single or multiple files	must have

BRD 4.004.3	3		c. Push the uploaded account to the list of accounts for Processing	Result: User should be able to push the uploaded account to the list of accounts for processing Negative Scenario: User cannot push the uploaded account to the list of accounts for processing	must have
BRD 4.004.3.1	3		1. Capture the account/s on the uploaded file as part of the generated list of accounts for processing	Result: User should be able to capture the account/s on the uploaded file as part of the generated list of accounts for processing Negative Scenario: User cannot capture the account/s on the uploaded file as part of the generated list of accounts for processing	must have
BRD 4.005.1	3	V. Update Data on an account	a. Select an account	Result: User should be able to select an account Negative Scenario: User cannot select an account	must have
BRD 4.005.2	3		b. View specific details of the selected account	Result: User should be able to view specific details of the selected account Negative Scenario: User cannot view specific details of the selected account	must have
BRD 4.005.3	3		c. Update necessary details	Result: User should be able to update necessary details Negative Scenario: User cannot update necessary details	must have
BRD 4.005.3.1	3		1. Easily view mandatory details	Result: User should be able to easily view mandatory details Negative Scenario: User cannot easily view mandatory details	must have
BRD 4.005.3.2	3		2. Receive prompts to supply missing mandatory details. The system should not allow me to push the account to the next workflow if there are missing mandatory fields	Result: User should be able to receive prompts to supply missing mandatory details. The system should not allow user to push the account to the next workflow if there are missing mandatory fields Negative Scenario: User does not receive prompts to supply missing mandatory details. The system should allow me to push the account to the next workflow if there are missing mandatory fields	must have

BRD 4.005.3.3	3		3. Save updated details	Result: User should be able to save updated details Negative Scenario: User cannot save updated details	must have
BRD 4.005.3.4	3		4. Disable editing on locked accounts (account should be locked after placement)	Result: User should not be able to edit locked accounts Negative Scenario: User can edit locked accounts	must have
BRD 4.006.1	3	VI. Review Computations	a. Review computations per account	Result: User should be able to review computations per account Negative Scenario: User cannot review computations per account	must have
BRD 4.006.1.1	3		1.View all calculated fields	Result: User should be able to view all calculated fields Negative Scenario: User cannot view all calculated fields	must have
BRD 4.006.2	3		b. Return account/s	Result: User should be able to return account/s Negative Scenario: User cannot return account/s	must have
BRD 4.006.2.1	3		1. Select single, multiple, all except and all account/s	Result: User should be able to select single, multiple, all except and all account/s Negative Scenario: User cannot select single, multiple, all except and all account/s	must have
BRD 4.006.2.2	3		2. Tag the status as returned	Result: User should be able to tag the status as returned Negative Scenario: User cannot tag the status as returned	must have
BRD 4.006.2.3	3		3. Add remarks	Result: User should be able to add remarks Negative Scenario: User cannot add remarks	must have
BRD 4.006.2.4	3		4. Save remarks	Result: User should be able to save remarks Negative Scenario: User cannot save remarks	must have

BRD 4.006.2.5	3		5. Return to the assigned Marketing AO	Result: User should be able to return to the assigned Marketing AO Negative Scenario: User cannot return to the assigned marketing AO	must have
BRD 4.006.2.6	3		6. Flag the returned account	Result: Accounts are automatically flagged once returned Negative Scenario: Accounts are not automatically flagged as returned	must have
BRD 4.006.2.7	3		7. Push the account/s to the next workflow	Result: User should be able to push the account/s to the next workflow Negative Scenario: User cannot push the account/s to the next workflow	must have
BRD 4.007.1	3	VII. Extract Accounts for renewal per Insurer	a. View the list of "For renewal" accounts per Insurer (display all accounts in 1 view using a scroll bar)	Result: User should be able to view the list of for renewal accounts per. Display all accounts in 1 view using a scroll bar insurer Negative Scenario: User cannot view the list of for renewal accounts per insurer. Cannot display all accounts in 1 view us	must have
BRD 4.007.1.1	3		1. Select date range	Result: User should be able to select date range Negative Scenario: User cannot select date range	must have
BRD 4.007.1.2	3		2. Select the name of the Insurer from the drop-down	Result: User should be able to select the name of the insurer per from the drop-down Negative Scenario: User cannot select the name of the insurer per from the drop-down	must have
BRD 4.007.1.3	3		3. Search the name of specific Insurer	Result: User should be able to search the name of specific insurer Negative Scenario: User cannot search the name of specific insurer	must have
BRD 4.007.1.4	3		4. View the following columns:	Result: User should be able to view the details Negative Scenario: User cannot view the	must have

				details	
BRD 4.007.1.4.1	3		4.1. Insurance Company	Result: User should be able to see a column with insurance company value Negative Scenario: User cannot see a column with insurance company value	must have
BRD 4.007.1.4.2	3		4.2. Invoice No	Result: User should be able to see a column with invoice no value Negative Scenario: User cannot see a column with invoice no value	must have
BRD 4.007.1.4.3	3		4.3. Assured Name	Result: User should be able to see a column with assured name value Negative Scenario: User cannot see a column with assured name value	must have
BRD 4.007.1.4.4	3		4.4. Risk Code	Result: User should be able to see a column with risk code value Negative Scenario: User cannot see a column with risk code value	must have
BRD 4.007.1.4.5	3		4.5. Inception Date	Result: User should be able to see a column with inception date value Negative Scenario: User cannot see a column with inception date value	must have
BRD 4.007.1.4.6	3		4.6. Expiry Date	Result: User should be able to see a column with expiry date value Negative Scenario: User cannot see a column with expiry date value	must have
BRD 4.007.1.4.7	3		4.7. Sum Insured	Result: User should be able to see a column with sum insured value Negative Scenario: User cannot see a column with sum insured value	must have

BRD 4.007.1.4.8	3		4.8. Premium Amount	Result: User should be able to see a column with premium amount value Negative Scenario: User cannot see a column with premium amount value	must have
BRD 4.007.1.4.9	3		4.9. Commission Rate	Result: User should be able to see a column with commission rate value Negative Scenario: User cannot see a column with commission rate value	must have
BRD 4.007.1.4.10	3		4.10. AR Client (Unpaid Balance)	Result: User should be able to see a column with AR client (unpaid balance) value Negative Scenario: User cannot see a column with AR client (unpaid balance) value	must have
BRD 4.007.1.4.11	3		4.11. Is Mortgaged (Yes Or No)	Result: User should be able to see a column with Is mortgaged (yes or no) value Negative Scenario: User cannot see a column with Is mortgaged (yes or no) value	must have
BRD 4.007.1.4.12	3		4.12. Premium Rate (breakdown per cover)	Result: User should be able to see a column with premium rate value Negative Scenario: User see a column with premium rate value	must have
BRD 4.007.1.4.13	3		4.13. Policy No	Result: User should be able to see a column with policy number value Negative Scenario: User cannot see a column with policy number value	must have
BRD 4.007.1.4.14	3		4.14. Risk Description	Result: User should be able to see a column with risk description value Negative Scenario: User cannot see a column with risk description value	must have

BRD 4.007.1.4.15	3		4.15. Encoder Name (User Who Booked the Account)	Result: User should be able to see a column with encoder name (user who booked the account) value Negative Scenario: User cannot see a column with encoder name (user who booked the account) value	must have
BRD 4.007.1.4.16	3		4.16. Unit Head	Result: User should be able to see a column with Unit Head value Negative Scenario: User cannot see a column with Unit Head value	must have
BRD 4.007.1.4.17	3		4.17. Business Origin	Result: User should be able to see a column with business origin value Negative Scenario: User cannot see a column with business origin value	must have
BRD 4.007.1.4.18	3		4.18. Account Type	Result: User should be able to see a column with account type value Negative Scenario: User cannot see a column with account type value	must have
BRD 4.007.1.4.19	3		4.19. Region	Result: User should be able to see a column with region value Negative Scenario: User cannot see a column with region value	must have
BRD 4.007.1.4.20	3		4.20. Area	Result: User should be able to see a column with Area value Negative Scenario: User cannot see a column with Area value	must have
BRD 4.007.1.4.21	3		4.21. Branch	Result: User should be able to see a column with branch value Negative Scenario: User cannot see a column with branch value	must have

BRD 4.007.1.4.22	3		4.22. Account Officer Name	Result: User should be able to see a column with account officer name value Negative Scenario: User cannot see a column with account officer name value	must have
BRD 4.007.1.4.23	3		4.23. Remarks	Result: User should be able to see a column with remarks value Negative Scenario: User cannot see a column with remarks value	must have
BRD 4.007.1.4.24	3		4.24. Bodily Injury and Property Damage for Motor Accounts (BIPD)	Result: User should be able to see a column with Bodily Injury and Property Damage for Motor Accounts (BIPD) value Negative Scenario: User cannot see a column with Bodily Injury and Property Damage for Motor Accounts (BIPD) value	must have
BRD 4.007.1.4.25	3		4.25. Seating capacity for Motor	Result: User should be able to see a column with Seating Capacity value Negative Scenario: User cannot see a column with Seating Capacity value	must have
BRD 4.007.1.4.26	3		4.26. Auto Personal Accident for Motor	Result: User should be able to see a column with Auto Personal Accident for Motor value Negative Scenario: User cannot see a column with Auto Personal Accident for Motor value	must have
BRD 4.007.1.4.27	3		4.27. Sum Insured (breakdown per cover)	Result: User should be able to see a column with Sum Insured value (breakdown per cover) Negative Scenario: User see a column with Sum Insured value. Not breakdown per cover.	must have
BRD 4.007.1.4.28	3		4.28. Packaged/Non-Packaged description	Result: User should be able to see a column with packaged/non-packaged description value Negative Scenario: User see a column with packaged/non-packaged description value	must have

BRD 4.007.2	3		b. Download the generated list in a .xlsx format when needed	Result: User should be able to download the generated list in a .xlsx format when needed Negative Scenario: User cannot download the generated list in a .xlsx format when needed	must have
BRD 4.007.3	3		c. Save the generated list in a .xlsx format when needed	Result: User should be able to save the generated list in a .xlsx format when needed Negative Scenario: User cannot save the generated list in a .xlsx format when needed	must have
BRD 4.007.4	3		d. Print the generated list in a .xlsx format when needed	Result: User should be able to print the generated list in a .xlsx format when needed Negative Scenario: User cannot print the generated list in a .xlsx format when needed	must have
BRD 4.007.4.1	3		1. Print preview option	Result: User should be able to have a print preview option Negative Scenario: User does not have a print preview option	must have
BRD 4.007.4.2	3		2. Print setting options	Result: User should be able to have print setting options Negative Scenario: User does not have print setting options	must have
BRD 4.007.5	3		e. Send the file to Insurer/s	Result: User should be able to send the file to insurer/s Negative Scenario: User cannot send the file to insurer/s	must have
BRD 4.007.5.1	3		1. Encrypt and add password on the file	Result: User should be able to encrypt the file and add password Negative Scenario: User cannot encrypt the file and add password	must have

BRD 4.007.6	4		f. Received dispositioned file from Insurer	Result: User should be able to receive dispositioned file from insurer Negative Scenario: User cannot receive dispositioned file from insurer	must have
BRD 4.007.6.1	4		1. Download and view the file	Result: User should be able to download and view the file Negative Scenario: User cannot download and view the file	must have
BRD 4.007.6.2	4		2. Update account	Result: User should be able to update account Negative Scenario: User cannot update account	must have
BRD 4.008.1	1 to 6	VIII. Generate Report	a. Select expiry date range for each report	Result: User should be able to select expiry date range for each report Negative Scenario: User cannot select expiry date range for each report	must have
BRD 4.008.1.1	1 to 6		1. Select month, day and year	Result: User should be able to select month, day and year Negative Scenario: User cannot select month, day and year	must have
BRD 4.008.1.2	1 to 6		2. Change the selected date range	Result: User should be able to change the selected date range Negative Scenario: User cannot change the selected date range	must have
BRD 4.008.2	1 to 6		b. Select single, multiple, all and all except criteria for each report	Result: User should be able to select single, multiple, all and all except criteria for each report Negative Scenario: User cannot select single, multiple, all and all except criteria for each report	must have
BRD 4.008.2.1	1 to 6		1. Select single, multiple, all except and all Unit Head from the drop-down list	Result: User should be able to select single, multiple, all except and all unit head from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all unit head from the drop-down list	must have

BRD 4.008.2.2	1 to 6		2. Search specific Unit Head from the drop-down list	Result: User should be able to search specific unit head from the drop-down list Negative Scenario: User cannot search specific unit head from the drop-down list	must have
BRD 4.008.2.3	1 to 6		3. Select single, multiple, all except and all Risk Code from the drop-down list	Result: User should be able to select single, multiple, all except and all risk code from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all risk code from the drop-down list	must have
BRD 4.008.2.4	1 to 6		4. Search specific Risk Code from the drop-down list	Result: User should be able to search specific risk code from the drop-down list Negative Scenario: User cannot search specific risk code from the drop-down list	must have
BRD 4.008.2.5	1 to 6		5. Select single, multiple, all except and all Insurance Company from the drop-down list	Result: User should be able to select single, multiple, all except and all insurance company from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all insurance company from the drop-down list	must have
BRD 4.008.2.6	1 to 6		6. Search specific Insurance Company from the drop-down list	Result: User should be able to search specific insurance company from the drop-down list Negative Scenario: User cannot search specific insurance company from the drop-down list	must have
BRD 4.008.2.7	1 to 6		7. Select single, multiple, all except and all Insurance Group from the drop-down list	Result: User should be able to select single, multiple, all except and all insurance group from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all insurance group from the drop-down list	must have
BRD 4.008.2.8	1 to 6		8. Search specific Insurance Group from the drop-down list	Result: User should be able to search specific insurance group from the drop-down list Negative Scenario: User cannot search specific insurance group from the drop-down list	must have

BRD 4.008.2.9	1 to 6		9. Select single, multiple, all except and all Business Origin from the drop-down list	Result: User should be able to select single, multiple, all except and all business origin from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all business origin from the drop-down list	must have
BRD 4.008.2.10	1 to 6		10. Search specific Business Origin from the drop-down list	Result: User should be able to search specific business origin from the drop-down list Negative Scenario: User cannot search specific business origin from the drop-down list	must have
BRD 4.008.2.11	1 to 6		11. Select single, multiple, all except and all Market Category from the drop-down list	Result: User should be able to select single, multiple, all except and all market category from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all market category from the drop-down list	must have
BRD 4.008.2.12	1 to 6		12. Search specific Market Category from the drop-down list	Result: User should be able to search specific market category from the drop-down list Negative Scenario: User cannot search specific market category from the drop-down list	must have
BRD 4.008.2.13	1 to 6		13. Select single, multiple, all except and all BDO Branch from the drop-down list	Result: User should be able to select single, multiple, all except and all BDO branch from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDO branch from the drop-down list	must have
BRD 4.008.2.14	1 to 6		14. Search specific BDO Branch from the drop-down list	Result: User should be able to search specific BDO branch from the drop-down list Negative Scenario: User cannot search specific BDO branch from the drop-down list	must have
BRD 4.008.2.15	1 to 6		15. Select single, multiple, all except and all BDO Area from the drop-down list	Result: User should be able to select single, multiple, all except and all BDO area from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDO area from the drop-down list	must have

BRD 4.008.2.16	1 to 6		16. Search specific BDO Area from the drop-down list	Result: User should be able to search specific BDO area from the drop-down list Negative Scenario: User cannot search specific BDO area from the drop-down list	must have
BRD 4.008.2.17	1 to 6		17. Select single, multiple, all except and all Region from the drop-down list	Result: User should be able to select single, multiple, all except and all region from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all region from the drop-down list	must have
BRD 4.008.2.18	1 to 6		18. Search specific Region from the drop-down list	Result: User should be able to search specific region from the drop-down list Negative Scenario: User cannot search specific region from the drop-down list	must have
BRD 4.008.2.19	1 to 6		19. Select single, multiple, all except and all Bank Officer from the drop-down list	Result: User should be able to select single, multiple, all except and all bank officer from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all bank officer from the drop-down list	must have
BRD 4.008.2.20	1 to 6		20. Search specific Bank Officer from the drop-down list	Result: User should be able to search specific bank officer from the drop-down list Negative Scenario: User cannot search specific bank officer from the drop-down list	must have
BRD 4.008.2.21	1 to 6		21. Select single, multiple, all except and all Bank Unit from the drop-down list	Result: User should be able to select single, multiple, all except and all bank unit from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all bank unit from the drop-down list	must have
BRD 4.008.2.22	1 to 6		22. Search specific Bank Unit from the drop-down list	Result: User should be able to search specific bank unit from the drop-down list Negative Scenario: User cannot search specific bank unit from the drop-down list	must have

BRD 4.008.2.23	1 to 6		23. Select single, multiple, all except and all Product Code from the drop-down list	Result: User should be able to select single, multiple, all except and all product code from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all product code from the drop-down list	must have
BRD 4.008.2.24	1 to 6		24. Search specific Product Code from the drop-down list	Result: User should be able to search specific product code from the drop-down list Negative Scenario: User cannot search specific product code from the drop-down list	must have
BRD 4.008.2.25	1 to 6		25. Select single, multiple, all except and all Account Type from the drop-down list	Result: User should be able to select single, multiple, all except and all account type from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all account type from the drop-down list	must have
BRD 4.008.2.26	1 to 6		26. Search specific Account Type drop-down list	Result: User should be able to search specific account type drop-down list Negative Scenario: User cannot search specific account type drop-down list	must have
BRD 4.008.2.27	1 to 6		27. Select single, multiple, all except and all BDOI Branch from the drop-down list	Result: User should be able to select single, multiple, all except and all BDOI branch from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all BDOI branch from the drop-down list	must have
BRD 4.008.2.28	1 to 6		28. Search specific BDOI Branch from the drop-down list	Result: User should be able to search specific BDOI branch from the drop-down list Negative Scenario: User cannot search specific BDOI branch from the drop-down list	must have
BRD 4.008.2.29	1 to 6		29. Select single, multiple, all except and all Location from the drop-down list	Result: User should be able to select single, multiple, all except and all location from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all location from the drop-down list	must have

BRD 4.008.2.30	1 to 6		30. Search specific Location from the drop-down list	Result: User should be able to search specific location from the drop-down list Negative Scenario: User cannot search specific location from the drop-down list	must have
BRD 4.008.2.31	1 to 6		31. Select single, multiple, all except and all Account Broker from the drop-down list	Result: User should be able to select single, multiple, all except and all account broker from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all account broker from the drop-down list	must have
BRD 4.008.2.32	1 to 6		32. Search specific Account Broker from the drop-down list	Result: User should be able to search specific account broker from the drop-down list Negative Scenario: User cannot search specific account broker from the drop-down list	must have
BRD 4.008.2.33	1 to 6		33. Select single, multiple, all except and all Business Type from the drop-down list	Result: User should be able to select single, multiple, all except and all business type from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all business type from the drop-down list	must have
BRD 4.008.2.34	1 to 6		34. Search specific Business Type from the drop-down list	Result: User should be able to search specific business type from the drop-down list Negative Scenario: User cannot search specific business type from the drop-down list	must have
BRD 4.008.2.35	1 to 6		35. Select single, multiple, all except and all Customer Segment from the drop-down list	Result: User should be able to select single, multiple, all except and all customer segment from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all customer segment from the drop-down list	must have
BRD 4.008.2.36	1 to 6		36. Search specific Customer Segment from the drop-down list	Result: User should be able to search specific customer segment from the drop-down list Negative Scenario: User cannot search specific customer segment from the drop-down list	must have

BRD 4.008.2.37	1 to 6		37. Select single, multiple, all except and all Specific Client from the drop-down list	Result: User should be able to select single, multiple, all except and all specific client from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all specific client from the drop-down list	must have
BRD 4.008.2.38	1 to 6		38. Search specific Client from the drop-down list	Result: User should be able to search specific Client from the drop-down list Negative Scenario: User cannot search specific Client from the drop-down list	must have
BRD 4.008.2.39	1 to 6		39. Select single, multiple, all except and all Renewal Status from the drop-down list	Result: User should be able to select single, multiple, all except and all renewal status from the drop-down list Negative Scenario: User cannot select single, multiple, all except and all renewal status from the drop-down list	must have
BRD 4.008.2.40	1 to 6		40. Search specific Renewal Status from the drop-down list	Result: User should be able to search specific renewal status from the drop-down list Negative Scenario: User cannot search specific renewal status from the drop-down list	must have
BRD 4.008.3	1 to 6		c. Generate a report showing the overall status of the renewal accounts with the following information per invoice	Result: User should be able to generate a report showing the overall status of the renewal accounts with the following information per invoice Negative Scenario: User cannot generate a report showing the overall status of the renewal accounts with the following information per invoice	must have
BRD 4.008.3.1	1 to 6		1. Display the following information per invoice (display all accounts in 1 view using a scroll bar). Any updates/endorsement should reflect on the mother policy	Result: User should be able to display the following information per invoice. Display all accounts in 1 view using a scroll bar. Any updates/endorsement should reflect on the mother policy Negative Scenario: User cannot display the following information per invoice. Cannot display all accounts in 1 view using a scroll bar. Updates/endorsement does not reflect on the mother policy	must have

BRD 4.008.3.1.1	1 to 6		1.1. Unit Head	Result: User should be able to see a column with the complete list of Unit Heads Negative Scenario: User cannot see a column with the complete list of Unit Heads	must have
BRD 4.008.3.1.2	1 to 6		1.2. Account Broker	Result: User should be able to see a column with the account broker value Negative Scenario: User cannot see a column with account broker value	must have
BRD 4.008.3.1.3	1 to 6		1.3. Business Origin	Result: User should be able to see a column with business origin value Negative Scenario: User cannot see a column with business origin value	must have
BRD 4.008.3.1.4	1 to 6		1.4. Bank Officer	Result: User should be able to see a column with bank officer value Negative Scenario: User cannot see a column with bank officer value	must have
BRD 4.008.3.1.5	1 to 6		1.1. Renewal Reference	Result: User should be able to see a column with renewal reference value Negative Scenario: User cannot see a column with renewal reference value	must have
BRD 4.008.3.1.6	1 to 6		1.6. Expiring Ebix Invoice No	Result: User should be able to see a column with expiring Ebix invoice no value Negative Scenario: User cannot see a column with expiring Ebix invoice no value	must have
BRD 4.008.3.1.7	1 to 6		1.7. Assured	Result: User should be able to see a column with assured value Negative Scenario: User cannot see a column with assured value	must have

BRD 4.008.3.1.8	1 to 6		1.8. Type of Risk	Result: User should be able to see a column with type of risk value Negative Scenario: User cannot see a column with type of risk value	must have
BRD 4.008.3.1.9	1 to 6		1.9. Expiring Invoice Inception Date	Result: User should be able to see a column with expiring invoice inception date value Negative Scenario: User cannot see a column with expiring invoice inception date value	must have
BRD 4.008.3.1.10	1 to 6		1.10. Expiring Invoice Expiry Date	Result: User should be able to see a column with expiring invoice expiry date value Negative Scenario: User cannot see a column with expiring invoice expiry date value	must have
BRD 4.008.3.1.11	1 to 6		1.11. Renewal Reference Inception Date	Result: User should be able to see a column with renewal reference inception date value Negative Scenario: User cannot see a column with renewal reference inception date value	must have
BRD 4.008.3.1.12	1 to 6		1.12. Renewal Reference Expiry Date	Result: User should be able to see a column with renewal reference expiry date value Negative Scenario: User cannot see a column with renewal reference expiry date value	must have
BRD 4.008.3.1.13	1 to 6		1.13. Expiring Invoice Policy Number	Result: User should be able to see a column with expiring invoice policy number value Negative Scenario: User cannot see a column with expiring invoice policy number value	must have
BRD 4.008.3.1.14	1 to 6		1.14. Account Type	Result: User should be able to see a column with the complete list of account type Negative Scenario: User cannot see a column with the complete list of account type	must have

BRD 4.008.3.1.15	1 to 6		1.11. Basic Premium	Result: User should be able to see a column with basic premium value Negative Scenario: User cannot see a column with basic premium value	must have
BRD 4.008.3.1.16	1 to 6		1.16. Gross Premium	Result: User should be able to see a column with gross premium value Negative Scenario: User cannot see a column with gross premium value	must have
BRD 4.008.3.1.17	1 to 6		1.17. Premium Rate	Result: User should be able to see a column with premium rate value Negative Scenario: User cannot see a column with premium rate value	must have
BRD 4.008.3.1.18	1 to 6		1.18. Commission Rate	Result: User should be able to see a column with commission rate value Negative Scenario: User cannot see a column with commission rate value	must have
BRD 4.008.3.1.19	1 to 6		1.19. Total Sum Insured	Result: User should be able to see a column with total sum insured value Negative Scenario: User cannot see a column with total sum insured value	must have
BRD 4.008.3.1.20	1 to 6		1.20. Risk Description	Result: User should be able to see a column with risk description value Negative Scenario: User cannot see a column with risk description value	must have
BRD 4.008.3.1.21	1 to 6		1.21. Location Of Risk	Result: User should be able to see a column with location of risk value Negative Scenario: User cannot see a column with location of risk value	must have
BRD 4.008.3.1.22	1 to 6		1.22. Address	Result: User should be able to see a column with address value Negative Scenario: User cannot see a column with address value	must have

BRD 4.008.3.1.23	1 to 6		1.23. Contact No(S).	Result: User should be able to see a column with contact number value Negative Scenario: User cannot see a column with contact number value	must have
BRD 4.008.3.1.24	1 to 6		1.24. Email Address	Result: User should be able to see a column with email address value Negative Scenario: User cannot email address value	must have
BRD 4.008.3.1.25	1 to 6		1.21. Region	Result: User should be able to see a column with region value Negative Scenario: User cannot see a column with region value	must have
BRD 4.008.3.1.26	1 to 6		1.26. Area	Result: User should be able to see a column with area value Negative Scenario: User cannot see a column with area value	must have
BRD 4.008.3.1.27	1 to 6		1.27. Branch	Result: User should be able to see a column with branch value Negative Scenario: User cannot see a column with branch value	must have
BRD 4.008.3.1.28	1 to 6		1.28. Insurer	Result: User should be able to see a column with insurer value Negative Scenario: User cannot see a column with insurer value	must have
BRD 4.008.3.1.29	1 to 6		1.29. Location	Result: User should be able to see a column with location value Negative Scenario: User cannot see a column with location value	must have
BRD 4.008.3.1.30	1 to 6		1.30. Mortgaged To BDO	Result: User should be able to see a column with Mortgaged to BDO value Negative Scenario: User cannot see a column with Mortgaged to BDO value	must have

BRD 4.008.3.1.31	1 to 6		1.31. Mortgagee Bank	Result: User should be able to see a column with mortgagee bank value Negative Scenario: User cannot see a column with mortgagee bank value	must have
BRD 4.008.3.1.32	1 to 6		1.32. PN Number	Result: User should be able to see a column with PN number value Negative Scenario: User cannot see a column with PN number value	must have
BRD 4.008.3.1.33	1 to 6		1.33. Hold Cover (HC)	Result: User should be able to see a column with hold cover (HC) value Negative Scenario: User cannot see a column with hold cover (HC) value	must have
BRD 4.008.3.1.34	1 to 6		1.34. HC End Date	Result: User should be able to see a column with HC end date value Negative Scenario: User cannot see a column with HC end date value	must have
BRD 4.008.3.1.35	1 to 6		1.31. Renewal Status	Result: User should be able to see a column with renewal status value Negative Scenario: User cannot see a column with renewal status value	must have
BRD 4.008.3.1.36	1 to 6		1.36. Reason for "Not For Renewal"	Result: User should be able to see a column with reason for not for renewal value Negative Scenario: User cannot see a column with reason for not for renewal value	must have
BRD 4.008.3.1.37	1 to 6		1.37. Remarks of Acct Officer	Result: User should be able to see a column with remarks of acct officer value Negative Scenario: User cannot see a column with remarks of acct officer value	must have
BRD 4.008.3.1.38	1 to 6		1.38. Name of Renewal Processor	Result: User should be able to see a column with name of renewal processor value Negative Scenario: User cannot see a column with name of renewal processor	must have

				value	
BRD 4.008.3.1.39	1 to 6		1.39. Name of Assigned Marketing Account Officer	Result: User should be able to see a column with name of assigned marketing account officer value Negative Scenario: User cannot see a column with name of assigned marketing account officer value	must have
BRD 4.008.3.1.40	1 to 6		1.40. Sum Insured per Cover	Result: User should be able to see a column with Sum Insured per Cover value Negative Scenario: User cannot see a column with Sum Insured per Cover value	
BRD 4.008.3.2	1 to 6		2. Display a summary	Result: User should be able to display a summary Negative Scenario: User cannot display a summary	must have
BRD 4.008.3.2.1	1 to 6		2.1. Total No. of Booked	Result: User should be able to see the total no. of booked value Negative Scenario: User cannot see the total no. of booked value	must have
BRD 4.008.3.2.2	1 to 6		2.2. Total No. of Cancelled	Result: User should be able to see the total no. of cancelled value Negative Scenario: User cannot see the total no. of cancelled value	must have
BRD 4.008.3.2.3	1 to 6		2.3. Total No. of Renewal - For Placement	Result: User should be able to see the total no. of renewal - for placement value Negative Scenario: User cannot see the total no. of renewal - for placement value	must have
BRD 4.008.3.2.4	1 to 6		2.4. Total No. of Renewal - For Proposal	Result: User should be able to see the total no. of renewal - for proposal value Negative Scenario: User cannot see total no. of renewal - for proposal value	must have

BRD 4.008.3.2.5	1 to 6		2.5. Total No. of Renewal - For ARF	Result: User should be able to see the total no. of renewal - for ARF value Negative Scenario: User cannot see the total no. of renewal - for ARF value	must have
BRD 4.008.3.2.6	1 to 6		2.6. Total No. of RA Processed	Result: User should be able to see the total no. of ra processed value Negative Scenario: User cannot see the total no. of ra processed value	must have
BRD 4.008.3.2.7	1 to 6		2.7. Total No. of Renewal - For RA Processing	Result: User should be able to see the total no. of renewal - for RA processing value Negative Scenario: User cannot see the total no. of renewal - for RA processing value	must have
BRD 4.008.3.2.8	1 to 6		2.8. Total No. of Renew to TSU	Result: User should be able to see the total no. of renew to TSU value Negative Scenario: User cannot see the total no. of renew to TSU value	must have
BRD 4.008.3.2.9	1 to 6		2.9. Total No. of Returned to Marketing	Result: User should be able to see the total no. of returned to marketing value Negative Scenario: User cannot see the total no. of returned to marketing value	must have
BRD 4.008.3.2.10	1 to 6		2.10. Total No. of Awaiting Marketing TL Approval (For Renewal)	Result: User should be able to see the total no. of awaiting marketing TL approval (for renewal) value Negative Scenario: User cannot total no. of awaiting marketing TL approval (for renewal) value	must have
BRD 4.008.3.2.11	1 to 6		2.11. Total No. of Awaiting Marketing TL Approval (For Quotation)	Result: User should be able to see the total no. of awaiting marketing TL approval (for quotation) value Negative Scenario: User cannot see the total no. of awaiting marketing TL approval (for quotation) value	must have

BRD 4.008.3.2.12	1 to 6		2.12. Total No. of Awaiting Marketing TL Approval (Not For Renewal)	Result: User should be able to see the no. of awaiting marketing TL approval (not for renewal) value Negative Scenario: User cannot see the no. of awaiting marketing TL approval (not for renewal) value	must have
BRD 4.008.3.2.13	1 to 6		2.13. Total No. of Awaiting Marketing TL Approval (Lost Business)	Result: User should be able to see the no. of awaiting marketing TL approval (lost business) value Negative Scenario: User cannot see the no. of awaiting marketing TL approval (lost business) value	must have
BRD 4.008.3.2.14	1 to 6		2.14. Total No. of Disapproved Accounts	Result: User should be able to see the total no. of disapproved accounts value Negative Scenario: User cannot see the total no. of disapproved accounts value	must have
BRD 4.008.3.2.15	1 to 6		2.15. Total No. of Not For Renewal Accounts	Result: User should be able to see the total no. of not for renewal accounts value Negative Scenario: User cannot see the total no. of not for renewal accounts value	must have
BRD 4.008.3.2.16	1 to 6		2.16. Total No. of Mortgaged Lost Business	Result: User should be able to see the total no. of mortgaged lost business value Negative Scenario: User cannot see the total no. of mortgaged lost business value	must have
BRD 4.008.3.2.17	1 to 6		2.17. Total No. of Unrenewed Mortgaged for Proposal	Result: User should be able to see the total no. of unrenewed mortgaged for proposal value Negative Scenario: User cannot see the total no. of unrenewed mortgaged for proposal value	must have
BRD 4.008.3.2.18	1 to 6		2.18. Total No. of Unrenewed Mortgaged Transferred to Other Unit	Result: User should be able to see the total no. of unrenewed mortgaged transferred to Other unit value Negative Scenario: User cannot see the total no. of unrenewed mortgaged transferred to Other unit value	must have

BRD 4.008.3.2.19	1 to 6		2.19. Total No. of Mortgaged Loan Fully Paid	Result: User should be able to see the total no. of mortgaged loan fully paid value Negative Scenario: User cannot see the total no. of mortgaged loan fully paid value	must have
BRD 4.008.3.2.20	1 to 6		2.20. Unrenewed Mortgaged Awaiting Confirmation	Result: User should be able to see the unrenewed mortgaged awaiting confirmation value Negative Scenario: User cannot see the unrenewed mortgaged awaiting confirmation value	must have
BRD 4.008.3.2.21	1 to 6		2.21. Total No. of Mortgaged Booked under New Invoice No.	Result: User should be able to see the total no. of mortgaged booked under new invoice no. value Negative Scenario: User cannot see the total no. of mortgaged booked under new invoice no. value	must have
BRD 4.008.3.2.22	1 to 6		2.22. Total No. of Unrenewed Mortgaged No Disposition	Result: User should be able to see the total no. of unrenewed mortgaged no disposition value Negative Scenario: User cannot see the total no. of unrenewed mortgaged no disposition value	must have
BRD 4.008.3.2.23	1 to 6		2.23. Total No. of Unrenewed Mortgaged to Other Bank	Result: User should be able to see the total no. of unrenewed mortgaged to Other bank value Negative Scenario: User cannot see the total no. of unrenewed mortgaged to Other bank value	must have
BRD 4.008.3.2.24	1 to 6		2.24. Total No. of Non- Mortgaged Lost Business	Result: User should be able to see the total no. of non- mortgaged lost business value Negative Scenario: User cannot see the total no. of non- mortgaged lost business value	must have
BRD 4.008.3.2.25	1 to 6		2.25. Total No. of Unrenewed Non- Mortgaged for Proposal	Result: User should be able to see the total no. of unrenewed non- mortgaged for proposal value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged for proposal value	must have

BRD 4.008.3.2.26	1 to 6		2.26. Total No. of Unrenewed Non- Mortgaged Transferred To Other Unit	Result: User should be able to see the total no. of unrenewed non- mortgaged transferred to Other unit value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged transferred to Other unit value	must have
BRD 4.008.3.2.27	1 to 6		2.27. Total No. of Non- Mortgaged Loan Fully Paid	Result: User should be able to see the total no. of non- mortgaged loan fully paid value Negative Scenario: User cannot see the total no. of non- mortgaged loan fully paid value	must have
BRD 4.008.3.2.28	1 to 6		2.28. Total No. of Unrenewed Non- Mortgaged Awaiting Confirmation from Client	Result: User should be able to see the total no. of unrenewed non- mortgaged awaiting confirmation from client value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged awaiting confirmation from client value	must have
BRD 4.008.3.2.29	1 to 6		2.29. Total No. of Non- Mortgaged Booked under Invoice No.	Result: User should be able to see the total no. of non- mortgaged booked under invoice no. value Negative Scenario: User cannot see the total no. of non- mortgaged booked under invoice no. value	must have
BRD 4.008.3.2.30	1 to 6		2.30. Total No. of Unrenewed Non- Mortgaged No Disposition	Result: User should be able to see the total no. of unrenewed non- mortgaged no disposition value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged no disposition value	must have
BRD 4.008.3.2.31	1 to 6		2.31. Total No. of Unrenewed Non- Mortgaged to Other Bank	Result: User should be able to see the total no. of unrenewed non- mortgaged to Other bank value Negative Scenario: User cannot see the total no. of unrenewed non- mortgaged to Other bank value	must have

BRD 4.008.3.2.32	1 to 6		2.32. Total No. of Non-renewable Accounts	Result: User should be able to see the total no. of non-renewable accounts value Negative Scenario: User cannot see the total no. of non-renewable accounts value	must have
BRD 4.008.3.2.33	1 to 6		2.33. Total No. of No Disposition	Result: User should be able to see the total no. of no disposition value Negative Scenario: User cannot see the total no. of no disposition value	must have
BRD 4.008.3.2.34	1 to 6		2.34. Total No. of Accounts	Result: User should be able to see the total no. of accounts value Negative Scenario: User cannot see the total no. of accounts value	must have
BRD 4.008.4	1 to 6		d. Download report	Result: User should be able to not experience issue/s in downloading the report Negative Scenario: User experienced issue/s in see the download report value	must have
BRD 4.008.4.1	1 to 6		1. Download in a .xlsx format	Result: User should be able to download in a .xlsx format Negative Scenario: User cannot download in a .xlsx format	must have
BRD 4.008.4.2	1 to 6		2. Download in a .pdf format	Result: User should be able to download in a .pdf format Negative Scenario: User cannot download in a .pdf format	must have
BRD 4.008.5	1 to 6		e. Save report in the desired location	Result: User should be able to save report in the desired location Negative Scenario: User cannot save report in the desired location	must have
BRD 4.008.5.1	1 to 6		1. Save in a .xlsx format	Result: User should be able to save in a .xlsx format Negative Scenario: User cannot save in a .xlsx format	must have

BRD 4.008.5.2	1 to 6		2. Save in a .pdf format	Result: User should be able to save in a .pdf format Negative Scenario: User cannot save in a .pdf format	must have
BRD 4.008.6	1 to 6		f. Print report	Result: User should be able to print report Negative Scenario: User cannot print report	must have
BRD 4.09.1	6	XI. Generate Renewal Advice (RA)	a. Select single, multiple, all except and all accounts	Result: User should be able to select single, multiple, all except and all accounts Negative Scenario: User cannot select single, multiple, all except and all accounts	must have
BRD 4.09.2	6		b. Generate RA for the selected account/s	Result: User should be able to generate RA for the selected account/s Negative Scenario: User cannot generate RA for the selected account/s	must have
BRD 4.09.2.1	6		1. Disable RA generation on locked accounts (account should be locked on the marketing side when the RA is generated)	Result: User should be able to not generate RA on locked accounts Negative Scenario: User can RA generate on locked accounts	must have
BRD 4.09.2.2	6		2. With visible identifier if the generated RA is for first notice or second notice	Result: User should be able to have a visible identifier if the generated RA is for first notice or second notice Negative Scenario: User has no visible identifier if the generated RA is for first notice or second notice	must have
BRD 4.09.2.3	6		c. View the generated RA	Result: User should be able to view the generated RA Negative Scenario: User cannot view the generated RA	must have
BRD 4.09.3	6		1. Select RA	Result: User should be able to select RA Negative Scenario: User cannot select RA	must have
BRD 4.09.3.1	6		2. Preview the details of the RA	Result: User should be able to preview the details of the RA Negative Scenario: User cannot preview the details of the RA	must have

BRD 4.09.3.2	6		3. Close the preview	Result: User should be able to close the preview screen Negative Scenario: User cannot close the preview screen	must have
BRD 4.09.4	6		d. Download the generated RA	Result: User should be able to download the generated RA Negative Scenario: User cannot download the generated RA	must have
BRD 4.09.4.1	6		1. Select single or multiple RA/s	Result: User should be able to select single or multiple RA/s Negative Scenario: User cannot select single or multiple RA/s	must have
BRD 4.09.4.2	6		2. Download single or multiple RA/s	Result: User should be able to download single or multiple RA/s Negative Scenario: User cannot download single or multiple RA/s	must have
BRD 4.09.5	6		e. Save the generated RA/s	Result: User should be able to save the generated RA/s Negative Scenario: User cannot save the generated RA/s	must have
BRD 4.09.5.1	6		1. Select single or multiple RA/s	Result: User should be able to select single or multiple RA/s Negative Scenario: User cannot select single or multiple RA/s	must have
BRD 4.09.5.2	6		2. Select the desired location	Result: User should be able to select the desired location Negative Scenario: User cannot select the desired location	must have
BRD 4.09.6	5		f. Extract the details required for RA sending	Result: User should be able to extract required details for RA sending Negative Scenario: User cannot extract details for RA sending	must have

BRD 4.09.7	6		g. Send RA in batch	Result: User should be able to send RAs in batch Negative Scenario: User cannot send RAs in batch	must have
		E. As a Business Administrator, I want to be able to...			
BRD 5.001.1		I. Log in as a Business Administrator	a. Access the module/application using any BDO issued device	Result: User should be able to access the module/application using any BDO issued device Negative Scenario: User cannot access the module/application using any BDO issued device	must have
BRD 5.001.1.1			1. Log in with a Business Administrator user profile	Result: User should be able to log in with a Business Administrator user profile Negative Scenario: User cannot log in with a Business Administrator user profile	must have
BRD 5.001.1.2			2. Receive the inactivity warning (15 minutes)	Result: User should be able to receive the inactivity warning after 15 minutes of inactivity Negative Scenario: User did not receive the inactivity warning after 15 minutes of inactivity	must have
BRD 5.001.1.3			3. Receive warning prior to system triggered log out (30 minutes)	Result: User should be able to receive warning 30 minutes prior to system triggered log out Negative Scenario: User did not receive warning 30 minutes prior to system triggered log out	must have
BRD 5.002.1		II. Open the Application in multiple tabs	a. Open the application in multiple tabs	Result: User should be able to open the application in multiple tabs Negative Scenario: User cannot open the application in multiple tabs	must have
BRD 5.003.1		III. Maintain List of Values (LOVs)	a. View defined LOVs	Result: User should be able to view defined LOVs Negative Scenario: User cannot view defined LOVs	must have
BRD 5.003.2			b. Add new LOVs	Result: User should be able to add new LOVs Negative Scenario: User cannot add new LOVs	must have

BRD 5.003.3			c. Edit defined LOVs	Result: User should be able to edit defined LOVs Negative Scenario: User cannot edit defined LOVs	must have
BRD 5.003.4			d. Delete defined LOVs	Result: User should be able to delete defined LOVs Negative Scenario: User cannot delete defined LOVs	must have
BRD 5.003.5			e. Select an effectivity date on the changes in LOVs	Result: User should be able to select an effectivity date Negative Scenario: User cannot select an effectivity date	must have
BRD 5.004.1		IV. Maintain users	a. Assign user profile/role to a specific user/s (based on agreed User Access Matrix)	Result: User should be able to assign user profile/role to specific user/s (based on agreed user access matrix) Negative Scenario: User cannot assign user profile/role to specific user/s (based on agreed user access matrix)	must have
BRD 5.005.1		V. Update the Renewal Advice Template	a. Update the Renewal Advice template when necessary	Result: User should be able to update the Renewal Advice template as needed Negative Scenario: User cannot update the Renewal Advice template as needed	
		F. As a System Administrator, I want to be able to...			
BRD 6.001.1		I. Access the Application	a. Access the application using any BDO Work station	Result: User should be able to access the application using any BDO work station Negative Scenario: User cannot access the application using any BDO work station	must have
BRD 6.001.1.1			1. Log in with a System Administrator User profile	Result: User should be able to log in with a system administrator user profile Negative Scenario: User cannot log in with a system administrator user profile	must have
BRD 6.002.1		II. Manage Users of the System	a. Define User profile/role	Result: User should be able to define user profile/role Negative Scenario: User cannot define user profile/role	must have

BRD 6.002.1.2			1. Create profile for Marketing Team Leader	Result: User should be able to create profile for marketing team leader Negative Scenario: User cannot create profile for marketing team leader	must have
BRD 6.002.1.3			2. Create profile for Marketing Account Officer/Admin	Result: User should be able to create profile for marketing account officer/Admin Negative Scenario: User cannot create profile for marketing account officer/Admin	must have
BRD 6.002.1.4			3. Create profile for Processing Team Leader	Result: User should be able to create profile for processing team leader Negative Scenario: User cannot create profile for processing team leader	must have
BRD 6.002.1.5			4. Create profile for Processing Officer	Result: User should be able to create profile for processing officer Negative Scenario: User cannot create profile for processing officer	must have
BRD 6.002.1.6			5. Create profile for Business Administrator	Result: User should be able to create profile for business administrator Negative Scenario: User cannot create profile for business administrator	must have
BRD 6.002.2			b. Assign specific functionality/capability to a user profile/role	Result: User should be able to assign specific functionality/capability to a user profile/role Negative Scenario: User cannot assign specific functionality/capability to a user profile/role	must have
BRD 6.002.2.1			1. Assign Acquire Document/s function to a specific user profile/role	Result: User should be able to assign acquire document/s function to a specific user profile/role Negative Scenario: User cannot assign acquire document/s function to a specific user profile/role	must have

BRD 6.002.2.2			2. Assign open the application in multiple tabs function to a specific user profile/role	Result: User should be able to assign open the application in multiple tabs function to a specific user profile/role Negative Scenario: User cannot assign open the application in multiple tabs function to a specific user profile/role	must have
BRD 6.002.2.3			3. Assign generate the list of expiring accounts function to a specific user profile/role	Result: User should be able to assign generate the list of expiring accounts function to a specific user profile/role Negative Scenario: User cannot assign generate the list of expiring accounts function to a specific user profile/role	must have
BRD 6.002.2.4			4. Assign view account function to a specific user profile/role	Result: User should be able to assign view account function to a specific user profile/role Negative Scenario: User cannot assign view account function to a specific user profile/role	must have
BRD 6.002.2.5			5. Assign accounts function to a specific user profile/role	Result: User should be able to assign accounts function to a specific user profile/role Negative Scenario: User cannot assign accounts function to a specific user profile/role	must have
BRD 6.002.2.6			6. Assign transfer to account to other units' function to a specific user profile/role	Result: User should be able to assign transfer to account to other units' function to a specific user profile/role Negative Scenario: User cannot assign transfer to account to other units' function to a specific user profile/role	must have
BRD 6.002.2.7			7. Assign receive account transfer requests from other units' function to a specific user profile/role	Result: User should be able to assign receive account transfer requests from other units' function to a specific user profile/role Negative Scenario: User cannot assign receive account transfer requests from other units' function to a specific user profile/role	must have

BRD 6.002.2.8			8. Assign review and post disposition accounts function to a specific user profile/role	Result: User should be able to assign review and post disposition accounts function to a specific user profile/role Negative Scenario: User cannot assign review and post disposition accounts function to a specific user profile/role	must have
BRD 6.002.2.9			9. Assign generate report function to a specific user profile/role	Result: User should be able to assign generate report function to a specific user profile/role Negative Scenario: User cannot assign generate report function to a specific user profile/role	must have
BRD 6.002.2.10			10. Assign generate renewal advice (RA) function to a specific user profile/role	Result: User should be able to assign generate renewal advice (RA) function to a specific user profile/role Negative Scenario: User cannot assign generate renewal advice (RA) function to a specific user profile/role	must have
BRD 6.002.2.11			11. Assign view accounts for disposition function to a specific user profile/role	Result: User should be able to assign view accounts for disposition function to a specific user profile/role Negative Scenario: User cannot assign view accounts for disposition function to a specific user profile/role	must have
BRD 6.002.2.12			12. Assign provide disposition function to a specific user profile/role	Result: User should be able to assign provide disposition function to a specific user profile/role Negative Scenario: User cannot assign provide disposition function to a specific user profile/role	must have
BRD 6.002.2.13			13. Assign view the list of dispositioned accounts function to a specific user profile/role	Result: User should be able to assign view the list of dispositioned accounts function to a specific user profile/role Negative Scenario: User cannot assign view the list of dispositioned accounts function to a specific user profile/role	must have

BRD 6.002.2.14			14. Assign update the returned accounts function to a specific user profile/role	Result: User should be able to assign update the returned accounts function to a specific user profile/role Negative Scenario: User cannot assign update the returned accounts function to a specific user profile/role	must have
BRD 6.002.2.15			15. Assign generate list of accounts for processing function to a specific user profile/role	Result: User should be able to assign generate list of accounts for processing function to a specific user profile/role Negative Scenario: User cannot assign generate list of accounts for processing function to a specific user profile/role	must have
BRD 6.002.2.16			16. Assign upload dispositioned file function to a specific user profile/role	Result: User should be able to assign upload dispositioned file function to a specific user profile/role Negative Scenario: User cannot assign upload dispositioned file function to a specific user profile/role	must have
BRD 6.002.2.17			17. Assign view accounts for processing function to a specific user profile/role	Result: User should be able to assign view accounts for processing function to a specific user profile/role Negative Scenario: User cannot assign view accounts for processing function to a specific user profile/role	must have
BRD 6.002.2.18			18. Assign update data on an account function to a specific user profile/role	Result: User should be able to assign update data on an account function to a specific user profile/role Negative Scenario: User cannot assign update data on an account function to a specific user profile/role	must have
BRD 6.002.2.19			19. Assign review computations function to a specific user profile/role	Result: User should be able to assign review computations function to a specific user profile/role Negative Scenario: User cannot assign review computations function to a specific user profile/role	must have

BRD 6.002.2.20			20. Assign extract accounts for renewal per insurer function to a specific user profile/role	Result: User should be able to assign extract accounts for renewal per insurer function to a specific user profile/role Negative Scenario: User cannot assign extract accounts for renewal per insurer function to a specific user profile/role	must have
BRD 6.002.2.21			21. Assign view generate renewal advice (RA) function to a specific user profile/role	Result: User should be able to assign view generate renewal advice (RA) function to a specific user profile/role Negative Scenario: User cannot assign view generate renewal advice (RA) function to a specific user profile/role	must have
BRD 6.002.2.22			22. Assign return account/s function to a specific user profile/role	Result: User should be able to assign return account/s function to a specific user profile/role Negative Scenario: User cannot assign return account/s function to a specific user profile/role	must have
BRD 6.002.2.23			23. Assign maintain LOVs function to a specific user profile/role	Result: User should be able to assign maintain LOVs function to a specific user profile/role Negative Scenario: User cannot assign maintain LOVs function to a specific user profile/role	must have
BRD 6.002.2.24			24. Assign maintain users function to a specific user profile/role	Result: User should be able to assign maintain users function to a specific user profile/role Negative Scenario: User cannot assign maintain users function to a specific user profile/role	must have
BRD 6.002.2.25			25. Update the Renewal Advice Template	Result: User should be able to assign update Renewal Advice Template Negative Scenario: User cannot assign update Renewal Advice Template	must have

Usage Requirements

Complete the tables where applicable. If a table is not relevant to your request, kindly indicate “Not Applicable”

Volume and Performance						
<i>Describes how the system needs to operate in terms of capacity and efficiency.</i>						
User Role	Business Process	User Count		Projected Transaction Volume (Per Month)	Projected Annual Volume Growth Rate (Percentage %)	Expected Response Time
		Max	Concurrent			
Marketing Team Lead	Generate Accounts for Renewal List	75	23	25,800 / month	20%	10 seconds
Marketing Team Lead	Assign Accounts for Disposition	75	23	25,800 / month	20%	10 seconds
Marketing Team Lead	Assign Account to Other Units	75	23	25,800 / month	20%	10 seconds
Marketing Account Officer/ Account Broker	Provide Online Renewal Disposition	319	50	25,800 / month	20%	10 seconds
Marketing Team Lead	Review and Post Online Disposition	75	18	25,800 / month	20%	10 seconds
Processing Team Lead	Generate List of Renewal Accounts for Processing	50	15	25,800 / month	20%	10 seconds
Processing Team Lead	Assign Accounts for Processing	9	3	25,800 / month	20%	10 seconds
Processing Team Lead	Upload Disposition File	9	3	25,800 / month	20%	10 seconds
Processing Officer/ Broker	Review and Update Account Details	73	22	25,800 / month	20%	10 seconds
Processing Officer/ Broker	Upload/Download Attachments	73	22	25,800 / month	20%	10 seconds
Marketing Account Officer/ Broker, Processing Officer/	Generate Reports	485	145	25,800 / month	20%	20 seconds

Broker, Marketing Team Lead, Processing Team Lead						
Marketing Account Officer, Processing Officer, Marketing Team Lead, Processing Team Lead	Generate Renewal Advice	485	145	25,800 / month	20%	20 seconds
When is the highest system demand expected (e.g., year-end)?			During month-end			
When are peak times for usage (e.g., 12:00 - 14:00 daily)?			8am to 10am; 3pm to 5pm			
Do mobile and desktop end users expect different levels of speed and performance?			No			

Availability

Refers to the uptime of system reliability, specifying how often the system/service should be operational and accessible for users.

Questions	Response
What is the acceptable system availability (e.g., 99.9%)?	Follow existing QPS set up
When do people use the system (e.g., 9am-6pm daily, 24/7)?	7am to 10pm, Monday to Saturday
How long can the system be down each month or year without causing issues?	Follow existing QPS set up
What times are acceptable for system maintenance?	Follow existing QPS set up
In the event of a major disaster, what is the threshold of your business continuity plan relevant to this requirement?	Follow existing QPS set up

Data Retention & Archiving

Refer to how long data is stored, how it is managed overtime, and when it is moved to long-term storage or deleted, based on the business needs and legal/compliance requirements.

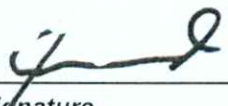

Data	Retention Period (Data-In-Use / Online)	Archival Period (Data-at-Rest / Offline)	Backup Frequency	Accessibility	Backup Retention Period
------	---	---	------------------	---------------	-------------------------

Follow existing QPS set up	Follow existing QPS set up	Follow existing QPS set up	Follow existing QPS set up	Follow existing QPS set up	Follow existing QPS set up
Questions			Response		
Should certain data be anonymized over a particular period?			Follow existing QPS set up		

Approval

This document has been approved as the official Business Requirements Document for the RMEL Phase 2 – Online Dispositioning request.

Upon approval of this document, changes will be permitted until the conclusion of the service definition phase. Any changes made during service definition must be accompanied by a Minutes of the Meeting (MoM) document, signifying the change. Once the service build commences, any further changes will be subject to the project's change management process.
