

EMPLOYEE BENEFITS ADDENDUM¹

Business Requirements Document (BRD) Template

Prepared by: Business Project Services (BPS)

Strictly Confidential and for Internal Use of BDO only

¹ Email sign-off is acceptable when:

1. The BRD has already been formally approved. The addendum is post-walkthrough and post-approval, not an initial BRD.
2. Changes are clarificatory, enhancements, refinements of the agreed requirements. No fundamental scope reset that would invalidate the approved BRD.
3. Changes are documented in the actual BRD Addendum or Minutes of Meeting (MOM) explicitly capturing the agreed changes.

Revision Log

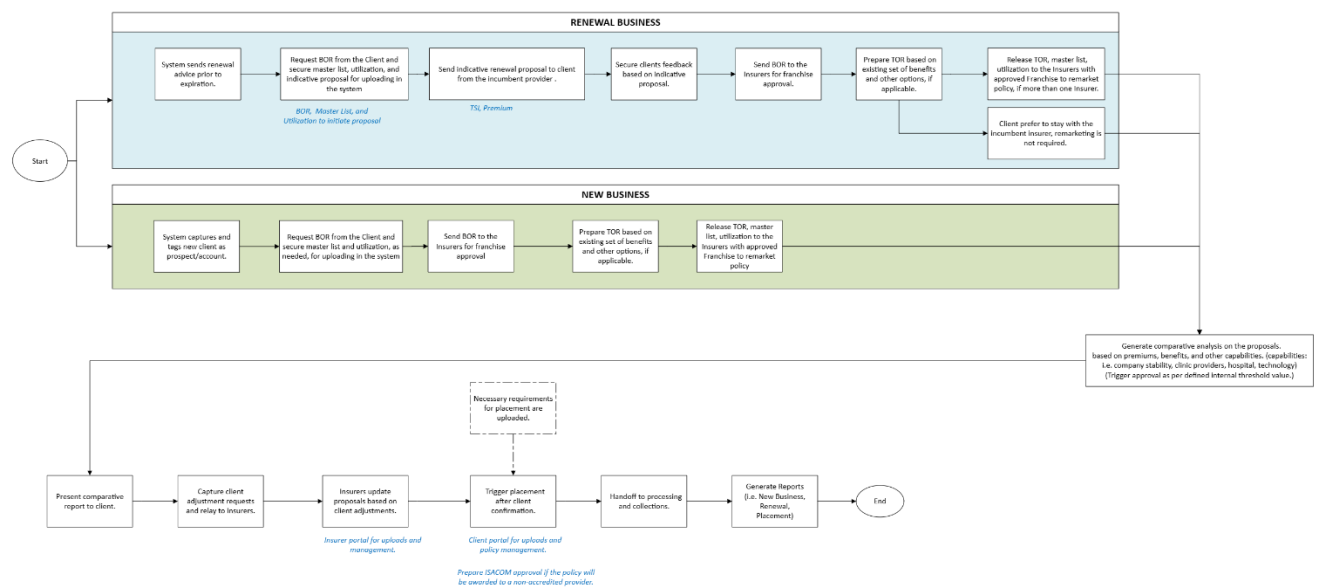

<i>Date</i>	<i>Version</i>	<i>Details</i>	<i>Author</i>
February 04,2025	1.0	Addendum Initial Version	Zean C. Ibay
February 09. 2026	1.0	Addendum discussion with Employee Benefits and IT System Analyst. • Clarified end-to-end workflow handling, including insurer, marketing, processing, and collection touchpoints. • More detailed insurer portal / API access controls, validation, and audit requirements.	Zean C. Ibay
February 23, 2026	1.0	• Enhanced document management and approval workflows. • Refined reporting requirements, including New Business vs Renewal classification. • Inclusion of transaction volumes and projected growth for capacity planning.	Zean C. Ibay

Business Needs and Requirements

What is the current process? (Before)

1. Manual notifications on renewal advice sending prior to expiration, using Word or Excel documents.
2. Terms of Reference, master lists, utilization, and proposals are prepared and distributed via email, with no centralized repository.
3. Comparative analysis of insurer proposals is done manually, often leading to delays and errors.
4. Manual booking of accounts and monitoring of member movements.
5. Handoffs between marketing, processing, and collections teams are managed via email and spreadsheets, causing bottlenecks and missed deadlines.
6. Reports are generated manually, lacking standardization and real-time accuracy.
7. Changes / additional / amendment s and feedback from clients are tracked via email threads, making audit and follow-up difficult.

II. What is the envisioned process? (After)

The envisioned process introduces an end-to-end, system-driven workflow that automates renewal and new business activities, improves collaboration with insurers and clients, and provides real-time visibility, auditability, and reporting.

1. The system monitors policy expiry dates and automatically issues renewal advisories ahead of expiration. Structured reminders and feedback requests are sent to clients to obtain renewal instructions in a timely manner, reducing manual follow-ups and missed renewals.
2. All Terms of Reference (TOR), master lists, utilization details, proposals, quotations, and supporting documents are captured, uploaded, and maintained within a single centralized system. Documents are version-controlled and accessible only to authorized users, ensuring data consistency and eliminating reliance on email-based exchanges.
3. Insurers and clients are provided with secure access to the system, enabling them to view policy details, upload and download documents, respond to requests, and track the status of renewals and new business submissions in real time. This self-service capability improves transparency and turnaround time.
4. The system consolidates insurer submissions and automatically generates standardized comparative reports, highlighting differences in coverage, pricing, terms, and conditions. These comparisons support informed client evaluation and decision-making, replacing manual and error-prone analysis.

5. Upon client confirmation, defined placement triggers automatically initiate the next stage of the workflow. Structured handoffs between marketing, processing, and collections teams are supported by system notifications, clear ownership, and end-to-end audit trails to ensure accountability and seamless transition.
6. Throughout the process, the system generates real-time and accurate operational and management reports for internal teams, clients, and insurers. These reports support monitoring, compliance, performance tracking, and strategic decision-making without manual consolidation.
7. All client feedback, changes, endorsements, and additional or amendment requests are captured within the system and flagged for insurer action. Each change is tracked with full version history and audit logs, ensuring transparency, traceability, and ease of review.

III. Table of Business Requirements

State key capabilities (ex: data encoding, file uploads, report generation, etc.) required by business for this request. Provide the business requirement of each key capability required in the table below. Map the key capabilities to the business requirements by matching their BRID (ex: Key capability 1 should match with all BRID1.#)

Business Key Capabilities:

1. Automated renewal notifications.
2. Manual and system-based proposal generation.
3. Insurer's limited access for viewing, uploading and updating proposals.
4. Data management based on Broker on Record.
5. Terms Of Reference generation and distribution.
6. Comparative analysis of proposals.
7. Automated and manual sending of proposals.
8. Master list and Utilization uploads.
9. Client's limited access for viewing, document uploads and policy management.
10. Proposal is approved based on defined threshold for TSI and premiums and level of authority.
11. Capability to upload supporting documents in agreed/defined format.
12. Centralized reporting and analytics.
13. View, download, generate, and print report/document as per authorization level.

Business Requirements

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-005.01		System	The system must provide a secure portal/API with enforced authentication.	Expected result: 1. System provides a secure portal or API that prevents access to the core system. 2. System allows insurers to log in securely and upload proposals, policy forms, and billing documents. 3. System automatically links uploaded documents to the correct adjustment, employee, client, policy, or transaction. 4. System ensures all uploads are subject to validation and approval workflows before becoming effective. 5. System logs all insurer interactions for audit and compliance. 6. System provides confirmation of successful uploads and error notifications for failed ones. Acceptance Criteria: 1. Access to the system is restricted to portal/API only—no direct access to the core system. 2. Secure authentication and role-based access control (RBAC) must be implemented. 3. System must support upload of documents in PDF, Word, Excel, and other agreed formats. 4. System must correctly link all uploaded files to relevant accounts, clients, policies, or transactions. 5. System must generate success notifications and error alerts.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				6. Audit trail must record all insurer actions, including uploads and updates. 7. All insurer-uploaded documents must pass validation and approval processes before taking effect. Negative Scenario: 1. System allows direct access to core platform. 2. System accepts unsupported file formats. 3. System fails to link documents to any client, policy, or transaction. 4. System allows uploads to bypass validation or approval workflows. 5. Audit trail is missing or incomplete.	
BRID-005.02		Insurer	Must have a capability to securely access the system only through the portal/API and not via direct access to the core system.	Expected Result: 1. Insurers can securely log in via portal/API and not via direct access to the core system. 2. Insurers can upload required documents (proposals, policy forms, billing). 3. Insurer uploads are correctly reflected in the system and linked to the correct entity. 4. Insurers can submit proposals via structured web forms within the Insurer Portal, with fields aligned to TOR items. 5. Insurers operate within their assigned scope and permissions. Acceptance Criteria: 1. Insurers authenticate using the secure portal/API.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				2. Insurers upload documents only in supported formats. 3. Insurers accurately assign uploads to the correct clients or transactions. 4. Insurers conform to system validation processes. 5. Insurers cannot access or manipulate anything outside their permission set. Negative Scenario: 1. Insurer attempts to access the core system directly. 2. Insurer uploads a document not linked to any client or policy. 3. Insurer uploads unsupported file types. 4. Insurer attempts to view or upload outside allowed scope.	
BRID-005.03		User	Facility to review insurer-uploaded documents, validate and approve.	Expected Result: 1. Users can review insurer uploads. 2. Users can complete validation and approval workflows. 3. Users receive notifications for uploads and errors. 4. Users can track actions through audit trails. Acceptance Criteria: 1. Users must be able to review and process insurer-uploaded documents. 2. Users must be notified of successful uploads/errors. 3. Users must be able to see audit trails for compliance. 4. Users must ensure accurate mapping of uploaded documents.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Negative Scenario: 1. User cannot view or validate insurer-uploaded documents. 2. User receives no system notification for failed uploads. 3. User finds incorrect or missing audit trail records.	
BRID-022.01		System, User	Generate reports automatically or manually.	Expected Result: 1. The System generates a New Business (NB) report that lists all new client accounts/policies within a period, with status and outcomes pertinent to first-time placements. 2. The report supports NB or Renewal classification as a field on the policy/transaction and as a filter. Acceptance Criteria: 1. A classification field (e.g. "Business Type" = NB or Renewal) exists on policy/transaction records and is required at creation/update. 2. Users can filter all reports (e.g. Production, Renewal, Placement, and NB) by Business Type. 3. New Business Report includes necessary columns (e.g. Client, Line of Business/Product, Effective Date, Insurer Selected, Premium, Commission, Account Officer, Business Type, Date, and Status) 4. Reports are exportable (PDF/XLSX/CSV/WORD) and respect authorization rules. 5. Data is accurate and up-to-date at the time of generation. Negative Scenario: 1. Business Type not set or inconsistent across records.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				- Report cannot be filtered by NB/Renewal. - Export fails or excludes required fields.	
BRID-025		User	System must allow Marketing AO to upload direct billing documents from Insurer for employee benefit changes / additional / amendment s. The system must also ensure that all documents uploaded or generated are linked to the correct transaction and endorsement type (e.g., placement, renewal, endorsement, adjustment, franchise request) and are associated with the appropriate department (i.e. Marketing, Processing, or Collection).	Acceptance Criteria: - Documents are mandatorily linked to the correct endorsement / transaction type and the correct client and policy - Authorized users i.e. Marketing, Processing, and Collection can access and open documents directly via the system. - Collection users can directly access the following: - Billing documents - SOA and endorsement-related files - Supporting documents required for collection activities - Documents are role-restricted and not visible to unauthorized users. Negative Scenarios: - Documents are uploaded but not linked to the correct endorsement or transaction. - Documents are linked correctly but not accessible to Collection users. - Documents are visible to users outside their authorized role. - Documents are uploaded without a clear department or transaction context.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-026		User	The system must allow the user to submit all necessary documents to the Insurance Provider for any of the following processes: • New Business placement • Renewal placement • Adjustment / Endorsement (financial and non-financial) • Franchise request (accreditation) • Any insurer-required documentation for proposal, quotation, or evaluation Documents include but are not limited to: • BOR • TOR • Masterlist • Utilization • Indicative proposal • Placement requirements • Adjustment requirements	Expected Result: 1. Insurance Provider receives complete and correct documents for the required evaluation (placement/renewal/adjustment/franchise). 2. Documents are transmitted via the system instead of manual email (future state). 3. Submission is traceable, logged, and linked to the correct client, policy, or transaction. 4. Processing and Collections can view the submitted documents as needed. Acceptance Criteria: 1. All required documents for the relevant process (placement, renewal, adjustment, franchise) are submitted. 2. System validates presence of required files before submission (based on process type). 3. Documents are transmitted to the correct insurer or insurer's portal, as defined in the system. 4. Processing & Collections receive visibility/notification if relevant. 5. Only authorized users can submit or view these documents. 6. Insurers can only access documents applicable to them. Negative Scenario: 1. Required documents are missing, incomplete, or improperly tagged.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				2. Documents are submitted to the wrong insurer. 3. Notification of submission not sent to insurer or internal teams. 4. Unauthorized user attempts submission. 5. Insurer cannot open, access, or validate the documents. 6. Documents not linked to any client, renewal, placement, or transaction.	

Out-Of-Scope

- BRID-0028 as high risks account is not applicable to Employee Benefits.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-028		Insurer	Present required documents for high-risk accounts (ISO Franchise Form, BOR/SOA, Masterlist, Terms of Reference, Utilization Report)	Expected Result: 1. High-risk franchise requests are properly evaluated and documented Acceptance Criteria: 1. All additional documents for high-risk accounts are presented and reviewed before approval. Negative Scenario: 1. Missing documents for high-risk accounts. 2. Approval given without proper risk assessment.	Must have.

Volumes

	Transaction Volume	Projected transaction volume for 2026	Projected percentage growth of transaction annually
Team 1 – BDO	400	550	38%
Team 2 – SM	2500	3500	40%
Team 3 – Voluntary	550	560	3%
Team 4 – Solicited	700	900	29%
Team 5 - New Business	50	55	10%

User Matrix

Capabilities (Target State)	Account Officer	Client / HR	Insurer	Marketing	Processing	Collection
Marketing – Account Officer (AO) sends renewal advice	✓					
Marketing – Account Officer (AO) collects/uploads client feedback	✓	✓				
Marketing – Account Officer (AO) sends initial proposal (incumbent rates)	✓					
Marketing – Account Officer (AO) remarkets to other insurers	✓		✓			
Insurer access to system (view/upload/update) and will be validated/approved by BDOI System Controls			✓			

Capabilities (Target State)	Account Officer	Client / HR	Insurer	Marketing	Processing	Collection
Marketing – Account Officer (AO) captures/tag new clients (prospect/account)		✓		✓		
Marketing – Account Officer (AO) uploads TOR and master list	✓		✓			
Marketing – Account Officer (AO) secures/upload Broker on Record (BOR). Client will sign as confirmation or form of approval.	✓	✓				
Marketing – Account Officer (AO) distributes TOR/master list/utilization report	✓		✓			
System / Marketing – AO generates comparative analysis	✓		✓			
Marketing – Account Officer (AO) presents comparative report to client. Client to confirm/approve.	✓	✓				
Marketing – Account Officer (AO) captures/relay client changes/amendments	✓	✓	✓			
Marketing – Account Officer (AO) entry/upload of employee benefit changes	✓	✓	✓	✓		
Client view/upload/manage policy		✓				
Insurers update proposals			✓			
Systems trigger approval workflow (value threshold). BDOI Management approves	✓					
Marketing – Account Officer (AO) triggers placement after client confirmation. Client to approve.	✓	✓	✓		✓	
Processing Team assign/reassign/return/remark . Processing Supervisor approves, if applicable.					✓	
Processing Team Complete policy issuance					✓	
Manage billing/payment tracking (Collection)						✓
Generate reports (System / Authorized User)	✓			✓	✓	
Log all key actions (audit)	✓	✓	✓	✓	✓	✓

Capabilities (Target State)	Account Officer	Client / HR	Insurer	Marketing	Processing	Collection
Marketing – Account Officer (AO) Upload direct billing docs for benefit changes. Processing to validate completeness.			✓	✓		
Marketing – Account Officer (AO) franchise request submission.			✓	✓		
Franchise approval/rejection by the Insurer			✓			
Marketing – Account Officer (AO) advises client of franchise outcome		✓		✓		

NOTE:

- Marketing – Account Officer (AO) is the primary Maker for almost all EB business actions.
- Approvals are conditional, not blanket:
 - Client approves proposals and placement.
 - Insurer approves franchise, proposals, issuance.
- Processing and Collections are validators/executors, not business approvers.

Approval

This document has been approved as the official Business Requirements Document for the <Title> request.

Upon approval of this document, changes will be permitted until the conclusion of the service definition phase. Any changes made during service definition must be accompanied by a Minutes of the Meeting (MoM) document, signifying the change. Once the service build commences, any further changes will be subject to the project's change management process.

Business Needs and Requirements

I. Executive Summary (What do you need?)

To have a system for Employee Benefits to manage both New and Renewal Account both captive and open market. This solution will enable seamless onboarding, booking of production with the help of Collection and Processing in consideration with the approved internal guidelines (MIS Credit / no payment no booking on adjustment), efficient proposal, consolidation of all accounts, and comparative analysis, approval workflow, streamlined placement, and reporting within a single automated platform. By minimizing manual processes and enhancing data integrity, the system will address operational bottlenecks, reduce risk, and ensure regulatory compliance.

II. Business Objective (Why do you need it?)

a. Business Goals

State the goal of the change needed. If the objective is not found below, select “Others” and specify the goal.

- ☐ Revenue
- ☐ Cost Savings
- ☐ Compliance/Regulatory Requirement *(attach the related law being addressed)*
- ☐ Customer Experience
- ☐ Others:

1. To enhance efficiency via automating manual steps such as renewal advice¹, proposal distribution, and reporting to reduce errors and save time.
2. To improve accuracy via centralizing data management for TORs, master lists, and proposals to ensure all information is up-to-date and accessible.
3. To increase transparency via providing clear audit trails, approval workflows, and reporting for management, clients, and insurers.
4. To support growth via enabling scalable onboarding, booking of production, and renewal processes to accommodate more clients and accounts.
5. To strengthen compliance via ensuring timely notifications and standardized workflows to meet regulatory and contractual obligations.

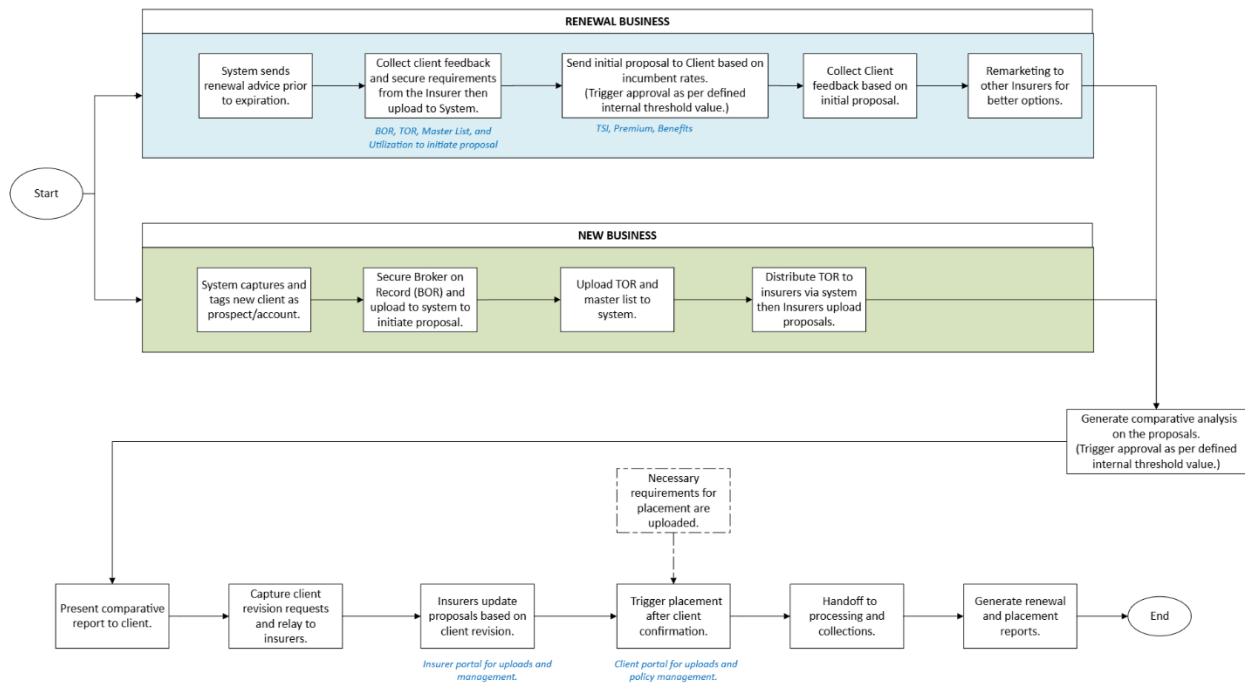

b. Benefits (Optional)

¹ Renewal Advice being mentioned here is the notification to the impacted client that their policy is about to expire.

III. What is the current process? (Before)

1. Manual notifications on renewal advice sending prior to expiration, using Word or Excel documents.
2. Terms of Reference, master lists, utilization, and proposals are prepared and distributed via email, with no centralized repository.
3. Comparative analysis of insurer proposals is done manually, often leading to delays and errors.
4. Manual booking of accounts and monitoring of member movements.
5. Handoffs between marketing, processing, and collections teams are managed via email and spreadsheets, causing bottlenecks and missed deadlines.
6. Reports are generated manually, lacking standardization and real-time accuracy.
7. Changes / additional / amendment s and feedback from clients are tracked via email threads, making audit and follow-up difficult.

IV. What is the envisioned process? (After)

1. Automated Renewal Advice wherein the System sends renewal notifications prior to expiration, with automated reminders and feedback requests.
2. All Terms Of Reference (TOR), master lists, proposals, and attachments are uploaded and managed in a single system, accessible to authorized users.
3. Insurers and Clients to view, upload documents, manage policies, and track progress.
4. System generates comparative reports for proposals, highlighting differences and supporting decision-making.
5. Placement triggers and notifications ensure smooth handoff between teams, with clear accountability and audit trails.
6. Real-time, accurate reports are generated for management, clients, and insurers, supporting operational and strategic needs.
7. All client feedback and changes / additional / amendment requests are captured, flagged, and relayed to insurers, with changes tracked for audit purposes.

V. Table of Business Requirements

State key capabilities (ex: data encoding, file uploads, report generation, etc.) required by business for this request. Provide the business requirement of each key capability required in the table below. Map the key capabilities to the business requirements by matching their BRID (ex: Key capability 1 should match with all BRID1.#)

Business Key Capabilities:

1. Automated renewal notifications.
2. Manual and system-based proposal generation.
3. Insurer's limited access for viewing, uploading and updating proposals.
4. Broker on record management.
5. Terms Of Reference generation and distribution.
6. Comparative analysis of proposals.
7. Client feedback or changes / additional / amendment request capture and relay.
8. Automated and manual sending of proposals.
9. Master list and Utilization uploads.
10. Client's limited access for viewing, document uploads and policy management.
11. Approval workflow based on defined thresholds.
12. Centralized reporting and analytics.

Business Requirements

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-001		System, User ²	System sends renewal advice prior to expiration. Renewal advice is only relevant for existing policies being renewed.	Expected Result: 1. The system automatically sends renewal advice notifications to clients with existing policies scheduled for renewal, at a defined period (e.g., 180 days) before the policy expiration date. Acceptance Criteria: 1. Renewal advice is sent on defined days before the expiration date of an existing policy. 2. Renewal advice is generated only for policies flagged for renewal. 3. No renewal advice is sent for new policies or policies not eligible for renewal. 4. The renewal advice includes key details. 5. Renewal advice is sent to the correct client contact(s). Negative Scenario: 1. The system sends renewal advice for a policy that is not eligible for renewal (e.g., a new policy, a canceled policy, or one not flagged for renewal). 2. Clients receiving incorrect renewal advice. 3. Renewal Advice not sent on time.	Must have.

² User mention are the authorized user such as but not limited to the following: Account Officer (AO), Marketing, Processing, Collection.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-002		User	Collect client feedback and upload to system.	Expected Result: 1. The system allows Users to collect client feedback and successfully uploads it, associating the feedback with the correct client and relevant policy or transaction. Acceptance Criteria: 1. Users can enter or attach client feedback (e.g., comments, forms, documents) via the system interface. 2. Uploaded feedback is linked to the correct client record. 3. The system accepts feedback in supported formats (e.g., text, PDF, Word, image). 4. The system provides a confirmation message upon successful upload. Negative Scenario: 1. The feedback is not associated with any client record (e.g., missing or incorrect client selection). 2. The feedback file format is unsupported. 3. The feedback content is empty or incomplete.	Must have.
BRID-003		User, Client	Send initial proposal based on incumbent rates. Initial proposal based on incumbent rates is specific to renewal.	Expected Result: 1. Received proposal based on incumbent rates. 2. The system generates proposals. 3. User sends an initial proposal to the client for policy renewal, using the rates and coverage details from the incumbent (current) provider. Acceptance Criteria:	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				1. Initial proposal is generated only for existing policies flagged for renewal. 2. No initial proposal is sent for new policies or policies not eligible for renewal. 3. The proposal uses the latest rates and coverage details from the incumbent provider. 4. The proposal includes policy number, coverage details, incumbent rates, expiration date, and renewal instructions. 5. Proposal is sent to the correct client contact(s). Negative Scenario: 1. The system sends an initial proposal for a policy that is not eligible for renewal (e.g., a new policy, a canceled policy, or one not flagged for renewal) or uses outdated/non-incumbent rates.	
BRID-004		User	Capability to perform remarketing to other Insurers for better options.	Expected Result: 1. The system enables User to initiate remarketing for existing policies up for renewal, allowing proposals to be solicited from multiple insurers to identify better coverage or pricing options for the client. Acceptance Criteria: 1. Remarketing is available only for policies flagged for renewal (not for new or canceled policies). 2. User can trigger remarketing from the system interface for eligible policies.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				- The system sends requests for proposals to selected insurers, including relevant policy and client details. - The system collects and organizes incoming proposals from insurers for easy comparison. - The system generates a comparative analysis of all received proposals, highlighting differences in coverage, pricing, and terms. Negative Scenario: - Remarketing is initiated for a policy that is not eligible (e.g., a new policy, a canceled policy, or one not flagged for renewal), or proposal requests are sent to insurers with incomplete or incorrect policy details.	
BRID-005		System, Insurer, User	Facility that allows Insurers to access/ interact with the system only through a secure portal or integration (e.g., API), not via direct access to the core system. The portal/integration allows insurers to upload, view, and manage records assigned to them, with access strictly limited by role and scope.	Expected Result: - Insurers can securely log in to a portal or connect via API to upload proposals, policy forms, and billing documents. - All uploads are linked to specific adjustments or employees and are subject to validation and approval workflows. - Uploaded documents do not imply automatic approval; further processing and endorsement are required. - All actions are logged for audit and compliance. Acceptance Criteria: - Insurers access the system only via portal or integration, never direct core access. - Secure authentication and role-based access controls are enforced.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				- Insurers can upload documents in supported formats (PDF, Word, Excel, etc.). - Uploaded documents are correctly linked to relevant client/policy/transaction. - System provides confirmation of successful uploads and notifies users of errors. - Audit trail is maintained for all uploads and updates. - Uploads are subject to validation and approval before becoming effective. - Insurers cannot view or modify data outside their assigned scope. Negative Scenario: - Insurer attempts to access the core system directly. - Insurer uploads a document not associated with any client or policy. - Unsupported file format is uploaded. - Insurer tries to upload or view data outside their assigned scope. - Uploads bypass validation or approval steps. - Audit trail is incomplete or missing.	
BRID-006		User	Capability to allow User to capture and tags new clients as prospect/account. Onboarding/tagging is specific to new clients.	Expected Result: When a new client is onboarded, the system automatically creates a client record and tags the client accordingly as a prospect or account. Acceptance Criteria:	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				1. Tagging is initiated only when a new client is onboarded (not for existing clients). 2. The system creates a new client record with all required fields (e.g., company name, contact details). 3. The new client is automatically tagged accordingly as prospect or account based on onboarding workflow. 4. Users can search for and retrieve all clients tagged as prospect or account. 5. The system validates that the client does not exist before creating a new record and tagging. Negative Scenario: 1. The system tags an existing client as a prospect during onboarding or fails to tag a new client correctly.	
BRID-007		User	Capability to upload Terms of Reference (TOR), master list to system, and utilization report. Unnamed Master List will be submitted by Insurer.	Expected Result: 1. User can upload the Terms of Reference (TOR) and master list documents to the system, associating them with the correct client and renewal process, enabling insurers and stakeholders to access and act on the information. 2. File to be sent out is encrypted and protected by a password. 3. The password is either a standard assigned value (e.g., a default password) or system-generated following a defined syntax. 4. The password is sent to the recipient via a separate email for security.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Acceptance Criteria: 1. User can upload TOR and master list documents via the system interface. 2. The system accepts TOR and master list in supported formats (e.g., Word, Excel, PDF). 3. Uploaded documents are linked to the correct client, policy, and renewal transaction. 4. The system provides a confirmation message upon successful upload. 5. The password must be communicated to the recipient in a separately. 6. Users must be able to select single or multiple files for sending, and all selected documents must be encrypted/password-protected. 7. The process must work for both individual and bulk transmissions. 8. The password convention (standard or system-generated) must be documented and consistently applied. 9. Notification to be sent to Insurer (incumbent) to upload master list. Negative Scenario: 1. The document is not associated with any client or renewal transaction. 2. The file format is unsupported. 3. The document is incomplete or missing required information.	

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-008		User	Capability to upload the secured Broker on Record (BOR) to the system. The signed BOR must be uploaded by the user. The system validates that the BOR is signed and not empty before allowing proposal requests to proceed.	Expected Result: 1. The system enables User to secure a signed Broker on Record (BOR) document from the client and upload it, associating it with the correct client and transaction before any proposal requests are sent to insurers. 2. The system displays the BOR upload status (e.g., Pending, Uploaded, Validated). 3. The system allows re-upload of BOR if the previous file was invalid or rejected. 4. The system logs upload activity for audit purposes (timestamp, user ID, client ID). 5. The system provides error messages for invalid file formats or missing signatures. 6. The system ensures BOR is accessible for viewing/download by authorized users after upload. 7. The system supports version control for multiple BOR uploads (latest version marked as active). Acceptance Criteria: 1. User can upload a signed BOR document. 2. The system accepts BOR documents in supported formats (e.g., PDF, Word). 3. Uploaded BOR is linked to the correct client and new business transactions. 4. The system provides a confirmation message upon successful upload. 5. The system validates that the BOR is signed and not empty before upload.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				6. The system prevents proposal requests from being sent to insurers until a valid BOR is uploaded. Negative Scenario: 1. A user attempts to upload a BOR for a renewal transaction, or uploads an unsigned/empty BOR, or tries to request proposals without a BOR for new business.	
BRID-009		User	Capability to distribute TOR, unnamed master list and utilization report to Insurers.	Expected Result: 1. The system enables User to distribute the Terms of Reference (TOR) to selected insurers as per agreed and defined channel. 2. Insurers receive the TOR and can upload their proposals directly to the system, associating them with the correct client and transaction. 3. Insurers receive timely notifications and can access/download the utilization reports through the system. 4. The system maintains an audit trail of all uploads and distributions for compliance and tracking. Acceptance Criteria: 1. User can select insurers and distribute the TOR via the system interface. 2. The system confirms successful distribution to all selected insurers. 3. Insurers receive a notification (e.g., email, alert) when a TOR is distributed to them.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				4. All actions (upload, distribution, access) are logged with timestamps and user details. Negative Scenario: 1. TOR is distributed to the wrong insurer or not distributed at all. 2. Insurer attempts to upload a proposal without receiving the TOR, or uploads a proposal not associated with any TOR/client. 3. Proposal file format is unsupported, or the proposal is incomplete. 4. Insurer receives the wrong utilization report (e.g., for a different client or policy). 5. Audit trail is incomplete or missing key actions (upload, distribution, access).	
BRID-010		User, System	Generate comparative analysis of renewal proposals.	Expected Result: 1. The system generates a comparative analysis report of all renewal proposals received from insurers, highlighting differences in coverage, pricing, terms, and other relevant factors, enabling clients and account officers to make informed decisions. Acceptance Criteria: 1. The system collects all renewal proposals uploaded by insurers for a specific client and renewal transaction.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				- The system generates a comparative analysis within the defined timeline (e.g., within three days of receiving proposals). - The analysis compares key factors such as coverage, premium rates, exclusions, terms, and additional benefits. - The comparative analysis is presented in a clear, structured format (e.g., table or report) that is easy to review and share. - The analysis is linked to the correct client, renewal transaction, and proposals. - The system validates that all required proposals are included and that the analysis is complete before finalizing the report. - The system has approval workflow. - Authorized signatories to provide approval. - The Comparative Report is viewable, can be extracted and printed by authorized Users. Negative Scenario: - The system generates comparative analysis with missing or incomplete proposals. - The analysis does not compare all relevant factors or is not linked to the correct client/transaction. - The report format is unclear or difficult to interpret.	

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-011		User, Client ³	Present comparative report to client.	Expected Result: 1. The system presents the comparative analysis report of renewal proposals to the client, ensuring the report is clear, accurate, and accessible for client review and decision-making. Acceptance Criteria: 1. The comparative report is available to the Client. 2. The report includes all relevant proposals, clearly compares coverage, pricing, terms, and other key factors. 3. The report is presented in a structured, easy-to-understand format (e.g., table, summary, downloadable PDF). 4. The client receives a notification when the comparative report is available for review. 5. The client can provide feedback or request clarifications directly from the report interface. Negative Scenario: 1. The comparative report is incomplete, missing proposals, or containing errors. 2. The report is not accessible to the client or is sent to the wrong recipient. 3. The format is unclear or difficult to interpret.	Must have.

³ Client refers to the Client or Client HR

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-012		User, Client	Capability to capture client changes / additional / amendment requests and relay to insurers.	Expected Result: 1. The system allows User to capture client changes / additional / amendment requests (e.g., changes to coverage, terms, or pricing) and reliably relays these requests to the relevant insurers for proposal updates. Acceptance Criteria: 1. User can enter or upload client changes / additional / amendment requests via the system interface (e.g., comment box, form, document). 2. Each changes / additional / amendment request is linked to the correct client, policy, and renewal transaction. 3. The system relays captured changes / additional / amendment requests to the selected Insurers. 4. The system provides confirmation to the user that the changes / additional / amendment request has been successfully relayed. 5. The system validates changes / additional / amendment requests are not empty and meet minimum content requirements before relay. Negative Scenario: 1. A user attempts to capture changes / additional / amendment request but does not associate it with any client or policy. 2. The changes / additional / amendment request is incomplete or missing required information.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				3. The system fails to relay the request to the insurer or relays it to the wrong insurer.	
BRID-013		User	Capability to allow entry and upload of employee benefit changes / additional / amendment requests (e.g., new hires for HMO, GPA, GLI).	Expected Result: - Changes / additional / amendment request is captured, validated, and linked to correct policy/transaction. Acceptance Criteria: - Changes / additional / amendment request is complete, meets content requirements, and is successfully relayed to insurer. Negative Scenario: - Changes / additional / amendment request is incomplete, not linked, or fails validation; insurer does not receive request.	Must have.
BRID-014		System, Client, User	Facility that allows Clients to access / interact with the system only through a secure portal or integration (e.g., API), not via direct access to the core system. The portal allows clients to upload master lists, utilization reports, and view policy details, with access strictly limited to viewing and uploading.	Expected Result: - Clients can securely log in to the portal to upload documents and view policy details. - Uploaded documents are for reference and require further validation and endorsement before affecting policy status. - All actions are logged for audit and compliance. - Portal supports automated mapping of uploaded data (e.g., Excel files) to system fields, reducing manual entry.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Acceptance Criteria: 1. Clients access the system only via portal, never direct core access. 2. Secure authentication and role-based access controls are enforced. 3. Clients can upload documents in supported formats (PDF, Word, Excel, etc.). 4. Uploaded documents are correctly linked to relevant client record/policy/transaction. 5. System provides confirmation of successful uploads and notifies users of errors. 6. Audit trail is maintained for all uploads and downloads. 7. Uploads are subject to validation and endorsement before affecting policy status. 8. Clients cannot view or modify data outside their assigned scope. 9. Portal supports automated mapping of uploaded data to system fields. Negative Scenario: 1. Client attempts to access the core system directly. 2. Client uploads a document not associated with any policy or renewal transaction. 3. Unsupported file format is uploaded. 4. Client tries to upload or view data outside their assigned scope. 5. Uploads bypass validation or endorsement steps.	

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				6. Audit trail is incomplete or missing. 7. Uploaded documents are incorrectly mapped or not processed.	
BRID-015		User, Insurer	Insurer update proposals based on client changes / additional / amendment s.	Expected Result: 1. Insurer receive client changes / additional / amendment requests via the system and update their proposals accordingly, uploading revised proposals that reflect the requested changes. Acceptance Criteria: 1. The system reliably relays client changes / additional / amendment requests to the relevant insurers. 2. Insurer can update their proposals in the system, referencing the specific changes / additional / amendment requests. 3. Updated proposals are linked to the correct client, policy, and changes / additional / amendment request. 4. The system validates that updated proposals address the client's changes / additional / amendment requests before upload. Negative Scenario: 1. An insurer updates a proposal without referencing or addressing the client's changes / additional / amendment request. 2. The updated proposal is not associated with the correct client or policy.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				3. The system fails to notify the user of the update, or the version history is lost.	
BRID-016		System	Trigger approval transaction meets or exceeds a defined value threshold (e.g., Total Sum Insured (TSI) or premium amount).	Expected Result: 1. System identifies transaction that meets or exceeds a defined value threshold and automatically triggers an approval workflow, requiring review and sign-off by authorized personnel before it can proceed. Acceptance Criteria: 1. System detects threshold (e.g., TSI $\geq$ 500M, premium $\geq$ 20M), initiates workflow, notifies approvers 2. The system automatically initiates an approval workflow. 3. Relevant approvers are notified of the pending approval request. 4. Only authorized personnel can review and approve transaction meets or exceeds a defined value threshold . 5. The process cannot proceed until the required approval is granted. 6. The value threshold for triggering approval is configurable by system administrators. Negative Scenario: 1. System fails to detect threshold, no approval triggered, renewal proceeds without required approval 2. The approval workflow is not logged, or the renewal proceeds without required approval.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-017		User	Capability to trigger placement after client confirmation.	Expected Result: - Once the client confirms their selection of a proposal, the system automatically triggers the placement process, ensuring the chosen coverage is placed with the insurer and all necessary documentation and notifications are handled. Acceptance Criteria: - The system captures explicit client confirmation of their chosen proposal (e.g., via System, email, or signed document). - Upon confirmation, the System automatically initiates the placement workflow for the selected insurer and coverage. - Relevant stakeholders (e.g., processing team, insurer) are notified that placement has been triggered. - All required documents (e.g., confirmation, proposal, policy forms) are linked to the placement transaction. Negative Scenario: - The system triggers placement without valid client confirmation. - Placement is triggered for the wrong proposal or insurer. - Required documentation is missing or not associated with the placement transaction.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-018		User	Capability to access the system to perform activities such as assign, reassign, return, and provide remarks.	Expected Result: 1. User can assign, reassign, return, and provide remarks. 2. Return requests to with clear feedback/remarks. Acceptance Criteria: 1. Authorized User can perform these actions. 2. Feedback/remarks are captured and visible. Negative Scenario: 1. Unauthorized user can access/modify Processing tasks. 2. Feedback not captured. 3. Requests not returned properly.	Must have.
BRID-019		User	Facility to complete policy issuance after valid placement confirmation, ensuring all required documents are received and activities are tracked until completion.	Expected Result 1. When a valid placement confirmation is received from the client, relevant information and documentation flow-in to the next process. 2. User receives a notification, including transaction details and documents. 3. Only authorized User can access the transaction and documents. 4. The system enables tracking of Processing activities until policy issuance is complete. Acceptance Criteria 1. Received placement confirmation from the client. 2. All required documents (client confirmation, proposal, policy forms) are transferred.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				3. User receives timely notification with all necessary details upon trigger. 4. Unauthorized personnel cannot access the transaction or documents. 5. Activities are tracked until policy issuance. Negative Scenario 1. Required documents are missing or not transferred. 2. Notification is not sent to the Processing team after the trigger.	
BRID-020		User	There must be a capability which will allow users to submit booking.	Expected Result: 1. Users can access a booking submission. 2. Users can enter required details to check duplicate (e.g., billing number, client, policy). 3. System validates validation criteria for duplicate, if existing, notify User that submission cannot proceed. 4. Audit trail logs booking submission details (i.e. user, timestamp, billing number). Acceptance Criteria: 1. Users can submit booking. 2. System checks for duplicate. 3. Notification is sent when booking is successful and duplicate is detected. 4. Only authorized users can submit booking. 5. Booking details are logged for audit and tracking. Negative Scenario:	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				1. Billing number already exists. 2. Required fields (i.e. billing number, client, policy) are missing. 3. Unauthorized user attempts booking. 4. System fails to send notification after duplicate detection.	
BRID-021		User	Facility to manage financial transactions, billing, and payment tracking after policy placement, ensuring proper document transfer and activity monitoring.	Expected Result 1. SOA is received from the Insurer. 2. When the Statement of Account (SOA) is released to the client and billing is validated after policy issuance, the relevant information and documentation flow-in. 3. Payment status is updated in the system and visible to all relevant teams. 4. User receives a notification after payment confirmation, transaction details and document links. 5. Only authorized User can access the transaction and documents. 6. The system enables tracking of activities until payment is complete. Acceptance Criteria 1. SOA is received. 2. System accepts SOA in supported formats (PDF, Excel) via manual or automated upload. 3. All required documents are transferred. 4. User receives timely notification with all necessary details upon trigger. 5. Unauthorized personnel cannot access the transaction or documents.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				6. Activities are tracked until payment is received and confirmed. Negative Scenario 1. Invalid SOA Upload or SOA file is corrupted or missing mandatory fields. 2. Duplicate SOA. 3. Payment not updated or the payment confirmation fails to update in the system. 4. Notification is not sent.	
BRID-022		System, User	Generate reports automatically or manually.	Expected Result: 1. The system generates comprehensive reports detailing the status and outcomes of employee benefits renewals and insurance placements, supporting management, compliance, and client transparency. (i.e. Production Report, Renewal and Placement reports.) 2. System can generate customizable reports tracking TAT for key activities. 3. Reports include date stamps for received and released items, and can be filtered by team or AO. Acceptance Criteria: 1. Users can select report parameters (e.g., activity, team, AO, date range). 2. Reports display TAT metrics (e.g., days between receipt and release). 3. Reports can be exported in supported formats. 4. Data is accurate and up-to-date.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				5. Renewal Report a. Lists all policies scheduled for renewal, including expiration dates, renewal advice sent dates, and status of renewal (e.g., pending, confirmed, declined). b. Includes details of proposals received, comparative analysis results, and client changes / additional / amendment requests. c. Tracks actions such as securing brokers on record, sending terms of reference, and remarketing efforts. 6. Placement Report a. Details all policies placed with insurers, including client confirmation, insurer selected, coverage details, and commission confirmations. b. Includes information on counter proposals, renegotiations, and final terms agreed upon. c. Tracks document uploads (e.g., master list, TOR) and placement confirmation dates. 7. Reports are generated in a structured, easy-to-read format (e.g., tables, summaries, downloadable PDFs). 8. Authorized users can view, download, print, and share reports. 9. User can customize needed reports (i.e date range, filtered by client, product type). 10. Reports are updated in real-time as actions are completed in the system.	

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Negative Scenario: 1. Reports are missing key TAT data. 2. Filters do not work or data is inaccurate. 3. Reports cannot be exported. 4. Users cannot generate reports by team or AO. 5. Reports are missing key data (e.g., renewal status, placement confirmation). 6. Reports are not updated in real-time or contain outdated information. 7. Reports are inaccessible to authorized users or are sent to the wrong recipients.	
BRID-023		User, System	Only authorized users can view, download, print or access documents and reports.	Expected Result: 1. The system generates needed reports that are clear, complete, and up-to-date. Acceptance Criteria: 1. Reports show all relevant details and information (e.g., policy status, dates, actions taken). 2. Reports are easy to read and can be viewed or downloaded by authorized users. 3. Reports update automatically as new actions are completed. Negative Scenario: 1. Reports are missing important information. 2. Reports are outdated or not updated in real time.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				3. Unauthorized users can access reports, or authorized users cannot access them.	
BRID-024		System	The system logs all key actions (like sending renewal advice, uploading feedback, proposals, documents, approvals, and client confirmation) with timestamps and user details.	Expected Result: 1. The system records all important actions (like sending advice, uploading feedback, proposals, documents, approvals, and client confirmation) with timestamps and user details. 2. Every update, upload, or approval is tracked for security and auditing. 3. The system keeps a history of changes to proposals and documents. Acceptance Criteria: 1. All key actions are automatically logged with time, user, and reference details. 2. Updates and uploads are tracked and can be reviewed for audit purposes. 3. Users can view the history of changes to proposals and documents. Negative Scenario: 1. Actions are not logged, or logs are missing key details. 2. Changes to proposals or documents are not tracked. 3. Audit history is incomplete or inaccessible.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
BRID-025		User	System must allow Marketing AO to upload direct billing documents from Insurer for employee benefit changes / additional / amendment s.	Expected Result: 1. Billing documents are uploaded and linked to the correct endorsement/transaction Acceptance Criteria: 1. Documents are uploaded, correctly linked, and accessible to authorized users. Negative Scenario: 1. Documents are not uploaded, not linked, or inaccessible 2. Billing is not recorded in the system.	Must have.
BRID-026		User	Submit necessary documents to Insurance Provider for franchise request	Expected Result: 1. Insurance Provider receives complete documents for franchise evaluation Acceptance Criteria: 1. All required documents are submitted and acknowledged by Insurance Provider. Negative Scenario: 1. Incomplete documents submitted. 2. Request is delayed or rejected.	Must have.
BRID-027		Insurer	Provide approval or rejection for franchise to BDOI Marketing	Expected Result: 1. Franchise is either approved or rejected. 2. BDOI Marketing is notified.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Acceptance Criteria: 1. Approval/rejection is communicated within the agreed working days upon receipt of request. Negative Scenario: 1. No response within TAT. 2. Approval given without proper evaluation.	
BRID-028		Insurer	Present required documents for high-risk accounts (ISO Franchise Form, BOR/SOA, Masterlist, Terms of Reference, Utilization Report)	Expected Result: 1. High-risk franchise requests are properly evaluated and documented Acceptance Criteria: 1. All additional documents for high-risk accounts are presented and reviewed before approval. Negative Scenario: 1. Missing documents for high-risk accounts. 2. Approval given without proper risk assessment.	Must have.
BRID-029		User	Advise client of franchise approval or rejection	Expected Result: 1. Client is informed of the outcome of their franchise request. Acceptance Criteria: 1. Client receives clear communication of approval or rejection within agreed TAT.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				Negative Scenario: 1. Client not informed.	
BRID-030		System, User	Automated monitoring and tagging.	Expected Result: 1. The system monitors and tags the status of various items, including but not limited to contracts, HMO cards (i.e. loss / card replacement), and Billing / Invoice for each endorsement or member. 2. Pending contract, cards/billing are flagged accordingly. 3. Auto email follow-ups are sent to responsible parties for pending items as defined follow-up date and TAT. Acceptance Criteria: 1. The system must display a status for each item (contract, HMO card, Billing / Invoice) associated with every endorsement or member. 2. Each item must be correctly tagged with its current status. 3. Tags should update automatically when the item's state changes. 4. System generates and sends automated follow-up emails for items pending beyond defined thresholds. 5. Users can view and filter pending items by account/member. Negative Scenario: 1. Pending items are not tagged or tracked.	Must have.

BR ID	Process Step #	Persona	Requirement	Expected Result/Acceptance Criteria	Priority Level
				2. Auto follow-up emails are not sent. 3. Statuses are incorrect or not updated. 4. Users cannot view pending items.	

Usage Requirements

Complete the tables where applicable. If a table is not relevant to your request, kindly indicate “Not Applicable”

Volume and Performance							
<i>Describes how the system needs to operate in terms of capacity and efficiency.</i>							
User Role	Business Process	User Count		Projected Transaction Volume	Projected Volume Rate (Percentage %)	Annual Growth	Expected Response Time
		Max	Concurrent				
Marketing		13	13				
Processing		4	4				
Collection		3	3				
Questions				Response			
When is the highest system demand expected (e.g., year-end)?				Month-end			
When are peak times for usage (e.g., 12:00 - 14:00 daily)?				08:30 – 07:00pm			
Do mobile and desktop end users expect different levels of speed and performance?				No			

Availability	
<i>Refers to the uptime of system reliability, specifying how often the system/service should be operational and accessible for users.</i>	
Questions	Response
What is the acceptable system availability (e.g., 99.9%)?	99.99
When do people use the system (e.g., 9am-6pm daily, 24/7)?	08:30 – 07:00pm
How long can the system be down each month or year without causing issues?	RTO – 4hrs RPO – 24hrs
What times are acceptable for system maintenance?	As per bank standard
In the event of a major disaster, what is the threshold of your business continuity plan relevant to this requirement?	RTO – 4hrs RPO – 24hrs

Data Retention & Archiving
<i>Refer to how long data is stored, how it is managed overtime, and when it is moved to long-term storage or deleted, based on the business needs and legal/compliance requirements.</i>

Data	Retention Period (Data-In-Use / Online)	Archival Period (Data-at-Rest / Offline)	Backup Frequency	Accessibility	Backup Retention Period
Application Logs	5 Years	15 years	Every 4 hours	Online (5 years) Offline (up to 15 years)	7 Years
Database Logs	5 Years	15 years	Every 4 hours	Online (5 years) Offline (up to 15 years)	7 Years
Audit Logs (System Level & Secure logs)	5 Years	15 years	Every 4 hours	Online (5 years) Offline (up to 15 years)	7 Years
Historical data within database	5 Years	15 years	Every 4 hours	Online (5 years) Offline (up to 15 years)	7 Years
Questions			Response		
Should certain data be anonymized over a particular period?			No		

Approval

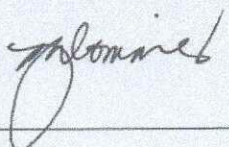

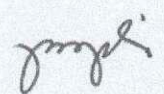

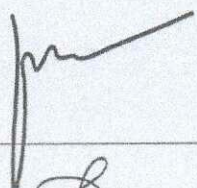

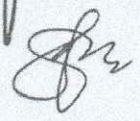

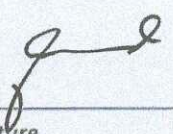

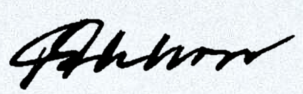

This document has been approved as the official Business Requirements Document for the <Title> request.

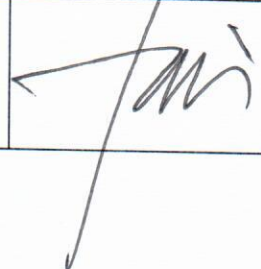

Upon approval of this document, changes will be permitted until the conclusion of the service definition phase. Any changes made during service definition must be accompanied by a Minutes of the Meeting (MoM) document, signifying the change. Once the service build commences, any further changes will be subject to the project's change management process.

Present docs for high-risk accounts	X			X			
Advise client of franchise outcome	X		X		X		

Employee Benefits Turn-Around-Time

Activity	Procedures/Trigger	Responsible Person	TAT (Turnaround Time)
Submission of Request for Franchise	Submit documents to Insurance Provider	BDOI Marketing	1-3 working days upon receipt of complete docs
Franchise Approval	Approval for franchise; high-value triggers	Insurance Provider	1-5 working days upon request
Submission of Request for Quotation (New)	Submit docs/request to Insurance Provider	BDOI Marketing	1-3 working days upon franchise approval
Submission of Renewal Advice	Send renewal notice to client	BDOI Marketing	135 days prior to inception date
Request renewal requirements	Email request for renewal docs (Active List, Loss Exp., etc.)	BDOI Marketing	135 days prior to inception date
Issuance of Quotation (New/Renewal)	Provide quote/proposal to BDOI Marketing	Insurance Provider	1-5 working days upon complete docs
Sending of Proposal to Client	Provide proposal/renewal proposal Comparative analysis	BDOI Marketing	1-5 working days from receipt of proposal
Sending of Client's Confirmation	Send confirmation/request for Certificate of Cover	BDOI Marketing	1-2 working days upon client confirmation
Sending of Certificate of Cover	Issue Certificate of Cover	Insurance Provider	Within 1 working day
Submission of Request for Placement & Booking	Email for placement/booking with docs	BDOI Marketing	1-5 working days upon client confirmation
Submission of Placement Slip	Submit placement to Insurance Provider	BDOI Processing	1-3 days upon request
Submission of Policy/Contract & Billing/SOA	Submit policy/contract, endorsements, billing/SOA	Insurance Provider	1-10 working days from placement slip
Validation of SOA	Validate SOA received from Insurance Provider	BDOI Processing	Within 3 working days upon receipt of final SOA
Booking in EBIX	Book account once billing is validated	BDOI Processing	Within 3 working days upon request
Checking of Policy/Contract	Check policy vs. proposal	BDOI Processing	Within 3 working days upon request
Releasing of SOA and Policy	Release SOA to Collection and Policy to Client/COG	BDOI Processing	Within 3 working days upon request
Adjustments (Inclusion/Deletion)	Send/Consolidate list, request/follow-up SOA/Billing	BDOI Marketing/Processing	1-3 working days per step
Collection of Premium	Collect premium due to client	BDOI Collection Team	1-2 working days upon SOA/Billing receipt
Submission/Validation/Releasing of Cards	Submit, validate, release cards to COG/client	Insurance Provider/COG	5-10 working days depending on volume
OR Submission	Submit original Official Receipt to client	Insurance Provider	Weekly
