Business Requirements Document BDOI CORE REPLACEMENT

Revision Log

Date	Version	Details	Author
August 04, 2025	1.0	Initial version.	Zean C. Ibay
August 11, 2025	1.0	Updated to BRD Format	Zean C. Ibay
September 05, 2025	1.0	Updated objectives to as per RFI review.	Zean C. Ibay
October 01, 2025	1.0	Added link to the signed BRD.	Zean C. Ibay
October 20, 2025	1.0	Moved up R1 as E12	Zean C. Ibay
October 24, 2025	1.0	Added new BRDs	Zean C. Ibay
November 20, 2025	1.0	Added Non-Package Management	Zean C. Ibay

Business Requirements Document BDOI CORE REPLACEMENT

Business Needs and Requirements

I. Executive Summary (What do you need?)

The BDOI E2E Process Flow outlines the comprehensive lifecycle of insurance operations, from client onboarding to claims and accounting. It integrates multiple departments and systems to ensure seamless service delivery for BDOI products.

The BDOI Core Replacement aims to deliver a fully integrated, end-to-end platform that centralizes all insurance brokering operations, enabling seamless collaboration across departments and real-time data exchange. Automated workflows, unified dashboards, and role-based access empower users to manage the entire lifecycle—from client onboarding to claims and accounting—within a single, secure environment. This unified system enhances efficiency, transparency, and compliance, supporting strategic growth and superior customer experience.

Each key BDOI function has its own Business Requirements Document (BRD). The information presented here is a high-level summary and does not replace the detailed specifications and requirements outlined in the respective BRDs. For function-specific details, please refer to the corresponding BRD.

Business Requirements Document BDOI CORE REPLACEMENT

II. Business Objective (Why do you need it?)

a. Business Goals

- ☐ Revenue
- ☐ Cost Savings
- ☐ Compliance/Regulatory Requirement (*attach the related law being addressed*)
- ☐ Customer Experience
- ☒ Others:
 1. A comprehensive lifecycle of non-life insurance brokering / re-insurance operations, from client onboarding to claims and accounting.
 2. To integrate multiple departments and systems to ensure seamless service delivery for non-life insurance products (e.g. Motor, Fire, CARI, CTPL)
 3. Cater to both Retail and Wholesale business.
 4. Regulatory compliance to BIR and insurance commission, reportorial requirements.

b. Benefits (Optional)

1. Efficiency and Automation
 - a. Reduced manual effort and faster turnaround times.
 - b. Streamlined workflows across departments.
 - c. Batch and individual processing support.
2. Accuracy and Data Integrity
 - a. Improved validation and error prevention.
 - b. Real-time updates and synchronized records.
 - c. Reliable audit logs and reconciliation.
3. Transparency and Compliance
 - a. Enhanced audit trails and regulatory reporting.
 - b. Real-time tracking and systematic status updates.
 - c. Workflow-based communication and approvals.
4. User Experience and Empowerment
 - a. Role-based access and intuitive dashboards.
 - b. Self-service tools for renewals and client management.
 - c. Browser-based access and simplified interfaces.
5. Scalability and Strategic Insight
 - a. Support for growing transaction volumes.
 - b. Automated reporting for strategic decision-making.

III. What is the current process? (Before)

The existing workflows are manual, fragmented, and error-prone, characterised by:

1. Manual Data Handling
 - a. Intake, tagging, tracking, and reconciliation done via spreadsheets and email.

Business Requirements Document BDOI CORE REPLACEMENT

- b. Offline monitoring and manual updates to diaries and PR lists.
- 2. Limited System Integration
 - a. Disparate systems for cashiering, remittance, and ACSL.
 - b. No unified workflow or dashboard visibility.
- 3. Heavy IT Dependency
 - a. Reliance on IT for data extraction, uploads, and reporting.
 - b. Corrections and reversals outside core systems.
- 4. Communication Gaps
 - a. Email and phone-based coordination.
 - b. No automated notifications or status tagging.

What is the envisioned process? (After)

The future state is automated, centralised, and user-driven, featuring:

- 1. End-to-End Automation
 - a. Claims authorization, policy validation, placement requests, and renewals handled digitally.
 - b. Automated reconciliation, posting, and tagging across financial workflows.
- 2. Integrated Systems
 - a. Centralized dashboards for all roles.
 - b. Unified client and account management with real-time updates.
- 3. Role-Based Access and Self-Service
 - a. Business units are empowered to manage renewals and PR directly.
 - b. Secure permissions for claims, settlements, and reporting.
- 4. Enhanced Reporting and Monitoring
 - a. System-generated reports for ageing, reconciliation, and compliance.
 - b. Generate customized reports.
 - c. Real-time dashboards and audit logs for transparency.
- 5. Workflow-Based Communication
 - a. Automated notifications, approvals, and feedback tracking.
 - b. Integrated workflows for disbursements, refunds, and ACSL corrections.

Business Requirements Document BDOI CORE REPLACEMENT

IV. Table of Business Requirements

State key capabilities (ex: data encoding, file uploads, report generation, etc.) required by business for this request. Provide the business requirement of each key capability required in the table below. Map the key capabilities to the business requirements by matching their BRID (ex: Key capability 1 should match with all BRID1.#)

Business Key Capabilities:

1. Client Onboarding

- Create prospect / record.
- Update prospect / record.
- Convert prospect into client record.
- Delete of prospect / record.
- Upload and validate client documents.
- Client search.
- Generate client code.

2. Quotation Or Proposal

- Receive request for quotation/proposal.
- Create quotation/proposal.
- Track proposal status.
- Edit quotation/proposal.
- Approve quotation/proposal.
- Print quotation/proposal.
- Uploading of documents
- Send quotation/proposal.
- Generate and customize report.

3. Account Creation And Maintenance

- Create account.
- Update account.
- Link to client record.
- Approve account.
- Initiate Placement Request.

4. Non-Package Management

- Create proposal request form.
- Approve proposal request form.
- Submit proposal request form.
- Receive proposal request form.
- Edit proposal request form.
- Create Quotation Slip.
- Send Quotation Slip to insurers.
- Input insurers' Feedback in Comparative Table.
- Submit Comparative Table.
- Finalize Proposal Slip .
- Submit Proposal Slip.
- Receive and print quotation.
- Send quotation.
- Convert quotation to account.
- Edit account.
- Approve account.
- Initiate Policy Placement Request.
- Track proposal request form/proposal placement slip/quotation status/policy placement request.
- Uploading of documents.
- Generate and customize report.
- Automated Reference Number generation..
- Password protection and encryption for shared documents
- System notification for status changes..
- Complete logging of all actions

5. Placement and Booking

- Submit for placement and booking.
- Generate Placement Slip
- Generate Placement Report
- Send Placement Slip to Insurer.
- Generate Insurance Advise
- Receive e-Policy.
- Send e-Policy to Client
- Update Client record to add e-Policy.

Business Requirements Document BDOI CORE REPLACEMENT

6. Renewal

- Generate RMEL.
- Filter and distribute RMEL.
- Rules-based sanitation of accounts (Bulk/Individual).
- Provide disposition.
- Process and Generate Renewal Proposal.
- Generate and Send Renewal Advice
- Send No Advice Letter (NAL) and Non-Renewal Letter (NRL).

7. Marketing Collection

- Premium Receivable (PR) Management.
- Disposition Tracking and Management. (Unapplied disposition)
- Tag CWT, Premium / PR2307.
- Unapplied Payment Disposition. (Excess Payment)
- Reporting and Audit.

8. Accounting / GL / Disbursement / ACSL

- Daily Financial Report Reconciliation.
- Daily Cash Movement Reconciliation.
- Insurer's Statement of Accounts (SOA) Reconciliation.
- Generate Automated Journal Entries.
- Perform Manual Entries.
- Perform Manual/Invoice Adjustments.
- Perform Accrual.
- Perform Revaluation.
- Perform Month End and Year End Closing.
- Generate Financial Reports.
- Accounts Analysis.
- Receive and release CWT. (Commission/Supplier)
- Disbursement to Insurer, Client, Supplier, BDO Subsidiaries
- Reporting and Documentation
- Releasing of BIR 2307 on Premiums (PR2307) to Insurer
- Generate Direct Credit Transactions File
- Disbursement to Government Agencies, Employees
- Payee Management
- Check Printing and Series Management
- Status Tagging and Tracking

Business Requirements Document BDOI CORE REPLACEMENT

- Bank Account Operations
- Generate Manual Service Invoice (Other Income)

9. **Cashiering (Payments Acceptance And Application)**

- Manual issuance of Acknowledgement Receipt (AR), Official Receipt (OR), Invoice, Cash, and Cheque OTC Payment.
- Automated Accounting Entries.
- Batch Payment Files Processing. (Automatching)
- Batch Processing and Automation. (Automatch Re-run)
- Batch Reversal Processing.
- Unapplied Payment Management. (Excess Payment)
- Payment Auto Matching
- Generate Acknowledgment Receipt, Official Receipt, Invoice
- Premium Payment Monitoring
- Commission Fee Collection
- PDC Management
- Traceability and Auditability

10. **Remittance**

- Extraction and Remittance Processing (Scheduled or Manual Extraction)
- Sending and Uploading of Files
- Validation and Filtering Criteria
- Search and View Capabilities
- Hold Remittance Management
- Special Remittance request / processing
- Notifications and Tracking

11. **Production Reconciliation**

- Data Extraction and File Management
- Production Register Viewing and Filtering
- Matching and Automation
- Tracking and Monitoring
- Reports Generation

12. **Adjustment/Cancellation**

- Transaction Management
- Automated Accounting Entries

Business Requirements Document BDOI CORE REPLACEMENT

- Traceability and Auditability
- Reporting and Monitoring
- Search and Document Management
- Sending and Uploading of Files
- Batch Posting

13. Collection Of Commission Receivables (Direct Payment)

- Automated Incentive Calculation
- Motor Mania Incentive Plan Implementation
- Production Data Validation and Exclusion Handling
- Automated Commission Receivables Processing
- Comprehensive Production Reporting
- Risk Mitigation and Error Handling
- Collection of Commission Receivables (Direct Payment).
- Auto-match reversals.

14. Claims

- Process Claims Advice from BDOI Marketing
- Process Claims Advice from Client
- Process Claims Advice from Insurer
- Process LOA from Insurer
- Process Settlement Offer from Insurer
- Tag Permanent Closure
- Tag Temporary Closure
- Unclaimed Checks Safekeeping
- Handover to Cashiering
- Retrieval from Cashiering
- Maintain Full Claims History for Audit and Compliance
- Reports and Analytics Viewing
- Encode / Override the Next Follow-up Date

15. Reinsurance

- Placement request initiation
- Placement Slip Management
- Statement of Account (SOA) Generation
- Claims Reporting and Settlement
- Claims Payment Processing

Business Requirements Document BDOI CORE REPLACEMENT

- Direct Client Claims Payment

16. Customer Service Facility

- Search, retrieve and display client contact and insurance account details.
- View, add, and update client contact information.
- View mode of payment (historical) and current status.
- View and resend RA.
- Upload supporting documents.
- Case resolution, add / edit case details and status.

17. Data Management

- Master Data Change Logging
- Insurer Management
- LOV Maintenance
- MIS Field Definition
- Product Maintenance

18. Emerging Capabilities

- Include any other / additional system capabilities.

19. Employee Benefits

- Automated renewal notifications.
- Manual and system-based proposal generation.
- Document and Data Upload Management Capability.
- Broker on record management.
- Terms Of Reference generation and distribution.
- Comparative Report Management Capability.
- Client feedback or changes / additional / amendment request capture and relay.
- Automated and manual sending of proposals.
- Approval workflow based on defined thresholds.
- Placement and Booking Management.
- Centralized reporting and analytics.
- Manage franchise requests and approvals.

20. Product Maintenance

- Automated request handling.
- Automatic reference numbers.
- Easier quotation/proposal Management.
- Automatic comparison tables.
- Real-time dashboard/reports.
- Built-in checks/approvals.
- Secure document sharing.
- Works with existing systems.
- Track all changes.
- Expiring packages monitoring.

21. Report Generation

- Generate standard reports for operational and analytical purposes.
- Extract, download, and print reports in multiple formats.
- Create tailored reports based on specific parameters, filters, and business requirements.
- Support dynamic customization to include relevant data fields, charts, and summaries.
- Enable scheduled or on-demand report generation.

Business Requirements Document

BDOI CORE REPLACEMENT

Table of Business Requirements

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-000		System	System should be able to ask for login credentials		Must have.
BR-001		User	System should be able to reset username and password		Must have.
BR-002		User	System should be able to have multiple types of user access		Must have.
BR-003		Administrator	Administrators should be able to add, delete and edit accounts.		Must have.
BR-004		Authorized User	There must be a capability which will allow Authorized User to add, delete and edit list of values.		
BR-005		User	There must be a capability which will allow users to create prospect / record.		Must have.
BR-006		User	There must be a capability which will allow users to update prospect / record.		Must have.
BR-007		User	There must be a capability which will allow users to convert prospect into client record.		Must have.
BR-008		User	There must be a capability which will allow users to delete of prospect / record.		Must have.
BR-009		User	There must be a capability which will allow users to upload client documents.		Must have.
BR-010		System	There must be a capability wherein the system validates client documents.		Must have.
BR-011		System	There must be a capability wherein the system links documents to client records.		Must have.
BR-012		User	There must be a capability which will allow users to client search.		Must have.
BR-013		System	There must be a capability wherein the system generates unique client code.		Must have.
BR-014		User	There must be a capability which will allow users to receive request for quotation/proposal.		Must have.
BR-015		User	There must be a capability which will allow users to create quotation/proposal. (Individual or Bulk)		Must have.
BR-016		System	There must be a capability wherein the system generates unique reference numbers.		Must have.
BR-017		User	There must be a capability which will allow users to track proposal status.		Must have.
BR-018		User	There must be a capability which will allow users to edit quotation/proposal.		Must have.
BR-019		User	There must be a capability which will allow users to approve quotation/proposal.		Must have.
BR-020		User	There must be a capability which will allow users to print quotation/proposal.		Must have.
BR-021		User	There must be a capability which will allow users to upload supporting documents.		Must have.

¹ Each Expected Result, Acceptance Criteria, and Negative Scenario is based on explicit standards and examples from the specific individual BRDs. Refer to the BRD links for the complete Expected Result, Acceptance Criteria, and Negative Scenario.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-022		User	There must be a capability which will allow users to send quotation/proposal.		Must have.
BR-023		User	There must be a capability which will allow users to create accounts manually.		Must have.
BR-024		System	There must be a capability wherein the system should accept uploaded accounts (via bulk processing).		Must have.
BR-025		System	There must be a capability wherein the system creates an account.		Must have.
BR-026		System	The system must automatically sanitize lists of uniform products (e.g., insurance accounts, policies) during bulk and individual processing, based on configurable business rules. This sanitation should validate, filter, and flag records according to criteria such as duplicate detection, missing/invalid data, and business-specific logic, ensuring only clean, valid records proceed to the next workflow stage.		Must have.
BR-027		User	There must be a capability which will allow users to perform currency selection on account creation, premium computation, reporting.		Must have.
BR-028		System	There must be a capability wherein the system should generate unique identifiers for each account.		Must have.
BR-029		User	There must be a capability which will allow users to update account.		Must have.
BR-030		User	There must be a capability which will allow users to link an account to client record.		Must have.
BR-031		User	There must be a capability which will allow users to approve account.		Must have.
BR-032		User	There must be a capability which will allow users to submit for placement and booking.		Must have.
BR-033		User	There must be a capability which will allow users to initiate placement request.		Must have.
BR-034		User	There must be a capability wherein the system sends a 30 days Hold Cover (HC) request to Insurer/s and assign request for HC function to a specific user profile/role.		Must have.
BR-035		User	There must be a capability which will allow user to tag of Direct Payment (DP).		Must have.
BR-036		User	There must be a capability which will allow users to generate or re-generate placement slip.		Must have.
BR-037		User	There must be a capability which will allow users to send placement slip to insurer.		Must have.
BR-038		User	There must be a capability which will allow users to view client confirmation.		Must have.
BR-039		User	There must be a capability which will allow users to generate SOA, placement report, insurance advise.		Must have.
BR-040		User	There must be a capability which will allow users to receive e-policy. (Individual or Batch)		Must have.
BR-041		User	There must be a capability which will allow users to send e-policy to client. (Individual or Batch)		Must have.
BR-042		System	There must be a capability wherein the system updates client record to add e-policy and policy number. (Individual or Batch)		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-043		System	There must be a capability wherein the system generates service invoice to insurer simultaneously with SOA during booking.		Must have.
BR-044		User	There must be a capability which will allow users to generate and manage outstanding Premium Receivable (PR) list.		Must have.
BR-045		User	There must be a capability for the user to filter by using defined filter parameters.		Must have.
BR-046		User	There must be a capability which will allow users to access unapplied payment and request application.		Must have.
BR-047		User	There must be a capability for the user to generate and upload files for unapplied payments .		Must have.
BR-048		User	There must be a capability which will allow users to assigns disposition status on unapplied and add remarks. (Batch / Bulk)		Must have.
BR-049		System	There must be a capability wherein the system performs batch processing and automation to generate billing reports with premium and loan details.		Must have.
BR-050		System	There must be a capability wherein the system match payment reports to accounts.		Must have.
BR-051		System	There must be a capability wherein the system has a define workflow to automatically forward files to other system.		Must have.
BR-052		User	There must be a capability which will allow users to manage collection of commission receivables (Direct Payment) such as: a. Handling direct payments from insurers b. Reversing related commission entries c. Coordination with other departments/ unit (i.e. Collection Marketing).		Must have.
BR-053		User	There must be an ability to generate customized(ad hoc) reports based on user requirements.		Must have.
BR-054		User	There must be a capability to generate standard reports for regular reports. (i.e. Daily, Weekly, Monthly)		Must have.
BR-055		User	There must be an ability for a user's to generate a list of expiring accounts for renewal in bulk.		Must have.
BR-056		User	There must be a capability which will allow users to filter and distribute Renewal Master Expiry List (RMEL).		Must have.
BR-057		User	There must be a capability which will allow users to sanitize RMEL as per defined exclusion rules.		Must have.
BR-058		System	There must be a capability wherein the system accepts upload for dispositioned files in bulk (single or multiple files).		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-059		User	There must be a capability which will allow users to provide disposition as per defined disposition rules and values. (Individual or Bulk)		Must have.
BR-060		User	There must be a capability which will allow users to generate renewal advice or non-renewal advice. (Individual or Bulk)		Must have.
BR-061		User	There must be a capability which will allow users to send renewal advice or non-renewal advice. (Individual or Bulk)		Must have.
BR-062		User	There must be a capability which will allow users to check or view renewal payment.		Must have.
BR-063		User	There must be an ability to support concurrent users and high-volume bulk uploads/processing.		Must have.
BR-064		User	There must be a capability which will allow users to track renewal status.		Must have.
BR-065		System	There must be a capability wherein the system performs daily financial report reconciliation.		Must have.
BR-066		User	There must be a capability which will allow users to generate financial reports based on user requirements.		Must have.
BR-067		System	There must be a capability wherein the system performs daily cash movement reconciliation.		Must have.
BR-068		System	There must be a capability wherein the system performs insurer's statement of accounts (SOA) reconciliation.		Must have.
BR-069		System	There must be a capability wherein the system generates automated journal entries.		Must have.
BR-070		User	There must be a capability which will allow users to perform manual entries.		Must have.
BR-071		User	There must be a capability which will allow users to perform manual adjustments.		Must have.
BR-072		User	There must be a capability which will allow users to perform accrual.		Must have.
BR-073		User	There must be a capability which will allow users to perform revaluation.		Must have.
BR-074		User	There must be a capability which will allow users to perform accounts investigation and analysis.		Must have.
BR-075		User	There must be a capability which will allow users to perform CWT tagging to Vendor/ Supplier.		Must have.
BR-076		User	There must be a capability which will allow users to receive the actual Received/Released CWT from Client.		Must have.
BR-077		User	There must be a capability which will allow the users to: a. View and filter disbursement transactions b. Upload disbursement request files c. Process disbursements via multiple modes		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
			d. Create disbursement vouchers and proforma entries e. Submit transactions for review and approval		
BR-078		User	There must be a capability which will allow the users to: a. Access and generate system reports (End-of-Day, Real-Time, Payee Reports) b. Download and save reports in various formats c. Generate CWT using BIR Form 2307 d. Generate upload fallout reports		Must have.
BR-079		User	There must be a capability which will allow the users to: a. Maintain, add, update, delete, and classify payees b. Select and save payment methods c. View all maintained payee details		Must have.
BR-080		User	There must be a capability which will allow the users to: a. Access autogenerated checks for printing b. Print single or multiple vouchers with configurable options c. Maintain and edit check series		Must have.
BR-081		System	There must be a capability wherein the system automatically tag check statuses (e.g., Printed, Released, Negotiated, Staled)		Must have.
BR-082		User	There must be a capability which will allow manual and automatic status tagging (e.g., OR/AR, CWT, ATD). Cancel transactions at various stages ("In Process", "For Review", "Approved") Edit and update transaction statuses.		Must have.
BR-083		System	There must be a capability wherein the system automatically send email confirmation and remittance schedule to the intended recipient.		Must have.
BR-084		System	There must be a capability wherein the system generates BIR Standard books. Suitable for BIR submission, including defined formats, accessible on demand, printable, and exportable. • Sales/Revenue Journal • Purchase Journal • Cash Receipt Journal • Cash Disbursement Journal • General Journal		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-085		User	There must be a capability which will allow the users to generate manual service invoice. This is issued manually for transactions categorized under "Other Income" or those not captured by the standard booking system.		Must have.
BR-086		User	There must be a capability which will allow users to accept manual OTC payments.		Must have.
BR-087		System	There must be a capability wherein the system post Accounting entries for AR/OR.		Must have.
BR-088		System	There must be a capability wherein the system has the facility for multi-currency support.		Must have.
BR-089		User	There must be a capability which will allow users to upload files for batch payment files processing from different payment channels. (via Batch or Bulk Processing)		Must have.
BR-090		System	There must be a capability wherein the system is able to process excess payment, categorize as excess/unapplied, and auto-reverse minimal balances.		Must have.
BR-091		System	There must be a capability wherein the system performs payment auto matching.		Must have.
BR-092		System	There must be a capability wherein the system performs re-run of unapplied payments as per defined schedule to be able to auto-apply. (Batch / Bulk) o Manually trigger (when needed) o Auto-trigger (batch schedule)		Must have.
BR-093		System	There must be a capability wherein the system tag as unapplied unmatched payments.		Must have.
BR-094		System	There must be a capability wherein the system generates acknowledgment receipt.		Must have.
BR-095		System	There must be a capability wherein the system auto-assign AR number per branch.		Must have.
BR-096		System	There must be a capability wherein the system performs batch printing.		Must have.
BR-097		User	There must be a capability which will allow users to premium payment monitoring.		Must have.
BR-098		User	There must be a capability which will allow users to process commission fee collection.		Must have.
BR-099		User	There must be a capability which will allow users to process commission receivable withholding tax		Must have.
BR-100		User	There must be a capability which will allow users perform PDC management.		Must have.
BR-101		User	There must be an ability to define workflow to flow-in data to the next process.		Must have.
BR-102		User	There must be a capability which will allow users to perform manual extraction, remittance processing, and generate remittance schedule.		Must have.
BR-103		System	There must be a capability wherein the system scheduled extraction, remittance processing, and generate remittance schedule.		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-104		User	There must be a capability which will allow users to manually send and upload files.		Must have.
BR-105		System	There must be a capability wherein the system automatically send and upload files.		Must have.
BR-106		User	There must be a capability which will allow users to perform validation of payment status, outstanding balances, and check clearance.		Must have.
BR-107		System	There must be a capability wherein the system excludes on-hold, written-off items, and pending negative adjustments.		Must have.
BR-108		System	There must be a capability wherein the system applies remittance rules to eligible transactions for processing.		Must have.
BR-109		User	There must be a capability which will allow users to search and view capabilities.		Must have.
BR-110		User	There must be a capability which will allow users to view, tracks hold status and remittance disposition.		Must have.
BR-111		System	There must be a capability wherein the system sends notifications for remittance status changes, pending adjustments, and disbursement updates.		Must have.
BR-112		User	There must be a capability which will allow users to tag or remove, approve hold remittance request		Must have.
BR-113		System	There must be a capability wherein the system assign approved hold remittance requests to remittance processors.		Must have.
BR-114		User	There must be a capability which will allow users to create, cancel, and extend hold remittance requests. The system must provide appropriate actions based on user roles and log all status updates.		Must have.
BR-115		System	There must be a capability wherein the system generates unique reference numbers for hold remittance requests. The system must ensure reference numbers are system-generated, non-repeating, searchable, and linked to request details		Must have.
BR-116		System	There must be a capability wherein the system generates a formal slip with all required fields, available for download or print, and assign a unique slip number		Must have.
BR-117		User	There must be a capability which will allow users to request and process special remittance for accounts meeting specific conditions.		Must have.
BR-118		User	There must be a capability which will allow users to tag and track BIR Form 2307 certificates, submit reinstatement requests, and confirm remittance status for reversals. The system must integrate these actions, log all activities, and require written confirmation for refunds if payment was already remitted.		Must have.
BR-119		User	There must be a capability which will allow users to manually perform data extraction.		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-120		System	There must be a capability wherein the system extracts data automatically.		Must have.
BR-121		User	There must be a capability which will allow users to view and filter Production Register.		Must have.
BR-122		System	There must be a capability wherein the system matches insurer reports with system data and categorizes accounts as per defined criteria or rules.		Must have.
BR-123		System	There must be a capability wherein the system stores unmatched and duplicate records.		Must have.
BR-124		System	There must be a capability wherein the system keeps audit and track activities.		Must have.
BR-125		User	There must be a capability which will allow users to view details in the dashboard of a particular information to be defined.		Must have.
BR-126		System	There must be a capability wherein the system performs single or multiple financial endorsement transactions and cancellations.		Must have.
BR-127		System	There must be a capability wherein the system generates accounting entries for cancellations, adjustments, and excess payments.		Must have.
BR-128		System	There must be a capability wherein the system generates unique reference numbers to each transaction.		Must have.
BR-129		System	There must be a capability wherein the system maintains full transaction history for audit and compliance.		Must have.
BR-130		User	There must be a capability which will allow users to perform search as per defined search criteria.		Must have.
BR-131		System	There must be a capability wherein the system it links all transactions to original account references for transparency.		Must have.
BR-132		System	There must be a capability wherein the system generates a service invoice whenever there is a cancellation or adjustment to serve as proof for BIR documentation and compliance.		Must have.
BR-133		System	There must be a capability wherein the system facilitates automated commission receivables processing. (Bulk)		Must have.
BR-134		User	There must be a capability which will allow users to generates comprehensive production reporting.		Must have.
BR-135		User	There must be a capability which will allow users to tag as DP account, auto-tagging of valid/invalid, audit trails for rejected accounts, and select reasons for insurer feedback.		Must have.
BR-136		System	There must be a capability wherein the system must ensure DP status is reflected in invoices and payment modules, and payments are matched to the correct invoice.		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-137		System	There must be a capability wherein the system automatically perform DP reversal only after validated DP tagging by Marketing and successful collection of commission receivables. (Batch / Bulk)		Must have.
BR-138		System	There must be a capability wherein the system must auto-match reversals, eliminate manual uploads, and log all actions. (Batch / Bulk)		Must have.
BR-139		User	There must be a capability which will allow user to tag reversal transactions for BIR 2307 and submit certificates received from clients, with processing that flows into Cashiering. (Batch / Bulk)		Must have.
BR-140		System	There must be a capability wherein the system performs DP reversal DP PR only after validated DP tagging and successful collection of commission receivables to ensure accurate financial records and reduce manual errors in commission and premium reversals.		Must have.
BR-141		User	There must be a capability which will allow users to process claims advice from defined claims requester.		Must have.
BR-142		User	There must be a capability which will allow users to process LOA from insurer.		Must have.
BR-143		User	There must be a capability which will allow users to process settlement offer from insurer.		Must have.
BR-144		User	There must be a capability which will allow users to tag permanent closure.		Must have.
BR-145		User	There must be a capability which will allow users to tag temporary closure.		Must have.
BR-146		User	There must be a capability which will allow users to unclaimed checks safekeeping.		Must have.
BR-147		User	There must be a capability which will allow users to handover to cashiering or forward settlement checks to Cashiering.		Must have.
BR-148		User	There must be a capability which will allow users to perform retrieval checks from Cashiering for release.		Must have.
BR-149		System	There must be a capability wherein the system generates reports on claims aging, settled claims, loss experience, outstanding claims, and loss ratio to inform business decisions.		Must have.
BR-150		User	There must be a capability which will allow users to have the necessary permissions to encode / override the Next Follow-up Date.		Must have.
BR-151		System	There must be a capability wherein the system maintains full claims history for audit and compliance.		Must have.
BR-152		User	There must be a capability for the user to view details to be defined by invoking it from the dashboard.		Must have.
BR-153		User	There must be a capability which will allow users to perform placement request initiation.		Must have.
BR-154		User	There must be a capability which will allow users to manage processes for placement slip such as receive, validate , view, edit, and revise placement slips.		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-155		System	There must be a capability wherein the system generates statement of account.		Must have.
BR-156		System	There must be a capability wherein the system generates accounting entries and received funds.		Must have.
BR-157		User	There must be a capability which will allow users to perform process for claims reporting and settlement.		Must have.
BR-158		User	There must be a capability which will allow users to perform process for claims payment processing.		Must have.
BR-159		User	There must be a capability which will allow users to perform process for direct client claims payment.		Must have.
BR-160		User	There must be a capability for the user to view details to be defined by invoking it from the dashboard.		Must have.
BR-161		User	There must be a capability which will allow users to search, retrieve and display client contact and insurance account details.		Must have.
BR-162		User	There must be a capability which will allow users to view, add, and update client contact information.		Must have.
BR-163		User	There must be a capability which will allow users to view payment history and current status.		Must have.
BR-164		User	There must be a capability which will allow users to view and resend RA / ePolicy.		Must have.
BR-165		User	There must be a capability which will allow users to perform case resolution, add / edit case details and status.		Must have.
BR-166		System	There must be a capability wherein the system computes incentives based on predefined rules and performance metrics.		Must have.
BR-167		User	There must be an ability to supports both fixed and performance-based commission schemes.		Must have.
BR-168		System	There must be a capability wherein the system integrates specialized incentive plans such as Motor Mania, ensuring accurate tracking and application of qualifying transactions.		Must have.
BR-169		User	There must be an ability to validate production data validation and exclusion handling.		Must have.
BR-170		User	There must be a capability wherein the system logs all changes to master data (user, product, insurer, LOVs).		Must have.
BR-171		User	There must be a capability wherein the system allows authorized users to create, update, and maintain insurer records (name, contact, accreditation, associated products), configuration of commission rates, payment terms, remittance schedules, risk participation, association of insurers with products/policies, and chart of accounts.		Must have.
BR-172		System	There must be a capability wherein the system maintains chart of accounts, LOVs for all dropdowns/selectable fields (claim status, settlement types, adjusters, catastrophe codes, product types, insurer names, payment types, disposition types, etc.).		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-173		User	System should be able to define MIS fields for all core entities (user, product, insurer, claims, policies, transactions). Example of typical fields: product type, risk code, market segment, booking date, policy number, insurer, branch, account officer, status, transaction type, chart of account.		Must have.
BR-174		System	System should be have available MIS fields for ad-hoc and standard reports, dashboards, analytics, filtering, grouping, and exporting data.		Must have.
BR-175		User	There must be a facility to manage and track invoice records across various operational workflows. (i.e. Invoice Master List) It includes information such as Reference Number, invoice Number, Cover Number, Version Number, Client Code, Status, Assured's Name, Product Line, Inception/Expiry Dates, Department, Insurer, Marketing/Processing Assignees, Placement Status, Approval Dates, Cancellation Status, and audit trails.		Must have.
BR-176		System	The system should include any other / additional system capabilities.		Must have.
BR-177		User	Facility to maintain workflow at the backend which can be triggered automatically as per the defined rules and logic.		Must have.
BR-178		User	The solution is flexible enough to correctly use BDO's brand required colors and logos according to the company's Corporate Guidelines		Must have.
BR-179		User	The solution can utilize BDO's prescribed icons and illustrations [as needed] without compromising user experience		Must have.
BR-180		User	The solution can customize the components of the user interface in adherence to the design prototype/style guide/BDO design system		Must have.
BR-181		User	The solution can adhere to the identified user journey (if yes, please conduct demo to BDO)		Must have.
BR-182		User	The solution can customize the interaction flows (between the user and the system)		Must have.
BR-183		User	The vendor/resources are familiar or can utilize Figma for the design execution		Must have.
BR-184		System	Automatically send renewal advice notifications to clients with existing policies scheduled for renewal, at a defined period before expiration.		Must have.
BR-185		System	Allow users to generate and send initial proposals based on incumbent rates for renewals, supporting both manual and automated proposal creation.		Must have.

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-186		System	Enable users, clients, and insurers to upload documents (TOR, master list, proposals, feedback, BOR, billing, etc.) in supported formats, ensuring correct association and confirmation of uploads.		Must have.
BR-187		System	Allow users to upload and manage signed Broker on Record (BOR) documents, ensuring proposals cannot be requested for new business without a valid BOR.		Must have.
BR-188		System	Enable users to generate and distribute Terms of Reference (TOR) and master lists to selected insurers, with confirmation and notification features.		Must have.
BR-189		System	Generate comparative analysis reports of renewal proposals, highlighting differences in coverage, pricing, and terms, and present these to clients in a clear format.		Must have.
BR-190		System	Allow users to capture client feedback, changes, additional requests, or amendments, and relay these to insurers for proposal updates.		Must have.
BR-191		System	Support both automated and manual sending of proposals to clients, ensuring correct timing and content.		Must have.
BR-192		System	Trigger approval workflows when transactions meet or exceed defined value thresholds (e.g., TSI or premium amount), notifying authorized approvers.		Must have.
BR-193		System	Provide users with the capability to trigger placement of insurance coverage after client confirmation and to submit booking requests for finalized policies, including validation against duplicates and tracking until completion.		Must have.
BR-194		System	Generate comprehensive, customizable reports (renewal, placement, production, etc.) automatically or manually, supporting management, compliance, and client transparency.		Must have.
BR-195		System	Allow users to submit franchise requests with required documents, track insurer approvals/rejections, and advise clients of outcomes.		Must have.
BR-196		System	Automatically send renewal advice notifications to clients with existing policies scheduled for renewal, at a defined period before expiration.		Must have.
BR-197		System	Allow users to generate and send initial proposals based on incumbent rates for renewals, supporting both manual and automated proposal creation.		Must have.
BR-198		System	Enable users, clients, and insurers to upload documents (TOR, master list, proposals, feedback, BOR, billing, etc.) in supported formats, ensuring correct association and confirmation of uploads.		Must have.
BR-199		System	Receive, view, track, and auto-sync requests		Must have.
BR-200		System	System auto-generates reference numbers for each request		Must have.
BR-201		System	Prepare/send quotations, negotiate terms, document communications		Must have.

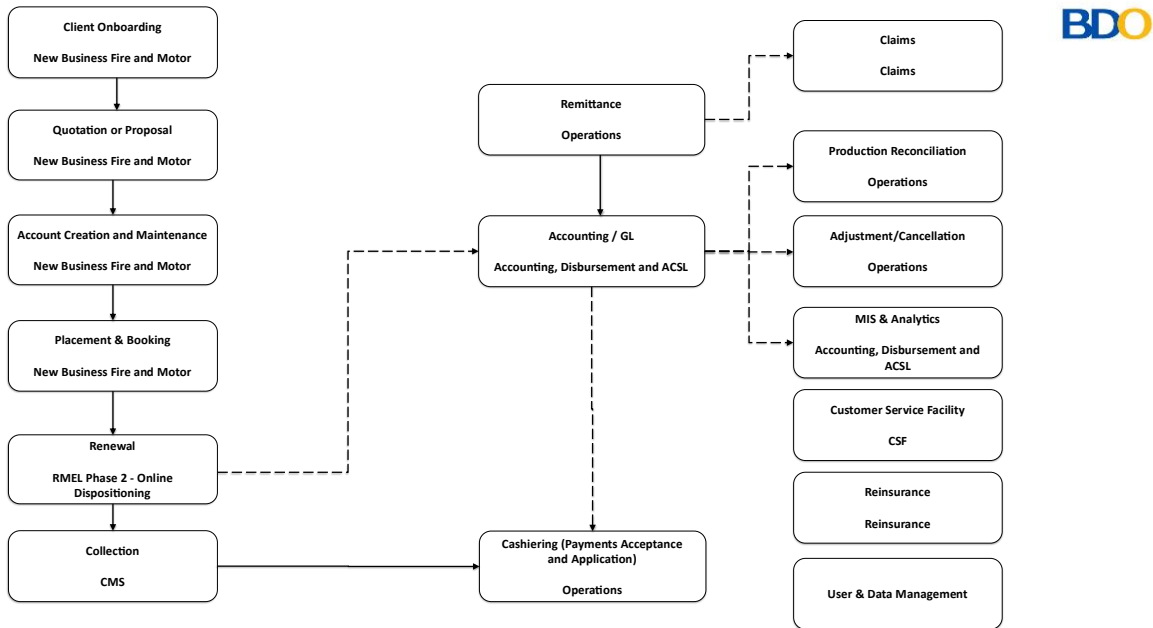

Business Requirements Document BDOI CORE REPLACEMENT

BR ID	Process Step #	Persona	Requirement	Expected Result / Acceptance Criteria ¹	Priority Level
BR-202		System	Compile insurer feedback into consolidated tables		Must have.
BR-203		System	Dashboards and reports for real-time tracking and reporting		Must have.
BR-204		System	Validation and multi-level approval workflows		Must have.
BR-205		System	Password protection/encryption, role-based access		Must have.
BR-206		System	Integration and notifications with BDOI systems		Must have.
BR-207		System	Complete audit trail for all actions		Must have.
BR-208		System	Archive expired products, monitor expiry dates, enable renewals		Must have.

Business Requirements Document

BDOI CORE REPLACEMENT

Capability Matrix

CLIENT ONBOARDING	QUOTATION OR PROPOSAL	ACCOUNT CREATION AND MAINTENANCE	PLACEMENT & BOOKING
Create prospect / record.	Receive request for quotation/proposal.	Create account.	Submit for placement and booking.
Update prospect / record.	Create quotation/proposal.	Rules-based sanitation of accounts	Generate Placement Slip
Convert prospect into client record.	Track proposal status.	Link to client record.	Send Placement Report
Delete of prospect / record.	Edit quotation/proposal.	Update account.	Send Placement Slip to Insurer
Upload and validate client documents	Approve quotation/proposal.	Approve account.	Generate Insurance Advise
Client search.	Print quotation/proposal.	Maintenance	Receive e-Policy
Generate client code.	Uploading of documents.	Client Confirmation	Send e-Policy to Client
	Send quotation/proposal.	Initiate Placement request.	Update Client record to add e-Policy
	Generate and customize report.

Insurer record
MIS field
List Of Values

EMPLOYEE BENEFITS

Automated renewal notifications.	Centralized reporting and analytics
Manual and system-based proposal generation.	Manage franchise requests and approvals.
Document and Data Upload Management Capability.	
Broker on record management.	
Terms Of Reference generation and distribution.	
Comparative Report Management Capability.	
Client feedback or changes / additional / amendment request.	
Automated and manual sending of proposals.	
Approval workflow based on defined thresholds.	
Placement and Booking Management.	

Business Requirements Document BDOI CORE REPLACEMENT

PRODUCT MAINTENANCE

Automated request handling.

Automatic reference numbers.

Easier quotation/proposal management.

Automatic comparison tables.

Real-time dashboard/reports.

Built-in checks/approvals.

Secure document sharing.

Works with existing systems.

Tracks all changes.

Expiring packages monitoring.

BRD	LEVEL 1	LEVEL 2	BRD IDs
Operations	Cashiering (Payments Acceptance And Application)	PDC Management	CSHID.008 – Accept uploading of PDC lists, assign system-generated numbers, auto-transact matured PDCs,
Operations	Remittance	Extraction & Remittance Processing (Scheduled or Manual Extraction)	RMTID.001–004 – Facility for scheduled/manual extraction per insurer/remittance type, auto extraction at intervals.
Operations	Remittance	Sending and Uploading of Files	RMTID.002, RMTID.013 – Edit extracted files online, upload remittance schedule files, update system with OR details.
Operations	Remittance	Validation & Filtering Criteria	RMTID.014, RMTID.017, RMTID.018 – Validate paid AR vs DTIP, check payment holding period and clearance, exclude accounts on hold.
Operations	Remittance	Search & View Capabilities	CSHID.010, RMTID.025, RMTID.026 – Search using multiple parameters (AR/OR/Invoice/Payor/Assured), view account/invoice details.
Operations	Remittance	Hold Remittance Management	RMTID.020, RMTID.031, RMTID.032 - Exclude accounts on hold, track hold/remittance status, manage hold requests.
Operations	Remittance	Notifications & Tracking	RMTID.033, RMTID.034, RMTID.035, RMTID.036 - Notify users on status changes, track remittance/disbursement status, alert team of pending adjustments.
Operations	Production Reconciliation	Data Extraction & File Management	PRCID.001, PRCID.009 - Automatically extract booked accounts, upload production reports from insurers.
Operations	Production Reconciliation	Production Register Viewing & Filtering	PRCID.012, PRCID.013, PRCID.014, PRCID.021 - View accounts from extracted/uploaded files, filter by production month, insurer, AO/AB, booking date, etc.
Operations	Production Reconciliation	Matching & Automation	PRCID.023, PRCID.024, PRCID.025, PRCID.026 - Match accounts from booked to pre-booked, automatch upon booking/upload, match with discrepancy threshold.
Operations	Production Reconciliation	Tracking & Monitoring	PRCID.029, PRCID.030, PRCID.031, PRCID.032, PRCID.033 - View account history, tag/track status, monitor upload attempts, create repository of unmatched/duplicate accounts.
Operations	Production Reconciliation	Reports Generation	CSHID.017, CSHID.023, RMTID.039, PRCID.034, PRCID.035, PRCID.036, PRCID.038, PRCID.039, ADJID.016, ADJID.019 - Generate, download, print various reports (premium, commission, reconciliation, adjustment, validation, etc.).
Operations	Adjustment/Cancellation	Transaction Management	ADJID.001, ADJID.002, ADJID.003, ADJID.004, ADJID.005, ADJID.006 - Manage single/multiple financial/non-financial endorsement transactions, batch posting, return problematic requests.
Operations	Adjustment/Cancellation	Automated Accounting Entries	CSHID.012, CSHID.013, CSHID.014, ADJID.011 - Post accounting entries for AR/OR issuance, cancellation, reinstatement, and financial endorsements.
Operations	Adjustment/Cancellation	Traceability & Auditability	ACSHID.011, ADJID.020, ADJID.022 - Log AR number and username in audit trail, link endorsements to original account, record/view transaction history.
Operations	Adjustment/Cancellation	Reporting & Monitoring	CSHID.017, CSHID.018, CSHID.023, RMTID.039, PRCID.034, PRCID.035, PRCID.036, PRCID.038, PRCID.039, ADJID.016, ADJID.019 - Facilities for generating, viewing, downloading, and printing reports for monitoring.
Operations	Adjustment/Cancellation	Search & Document Management	CSHID.010, ADJID.024, ADJID.025 - Search using account reference number, upload/attach supporting documents to endorsement requests.
Operations	Collection Of Commission Receivables (Direct Payment)	Automated Incentive Calculation	CMRID.005 – Incentive calculation based on production targets.
Operations	Collection Of Commission Receivables (Direct Payment)	Motor Mania Incentive Plan Implementation	CMRID.006 – Fixed incentive plan implementation supported.
Operations	Collection Of Commission Receivables (Direct Payment)	Production Data Validation and Exclusion Handling	CMRID.003 – Invalid production entries are excluded.
Operations	Collection Of Commission Receivables (Direct Payment)	Automated Commission Receivables Processing	CMRID.007 – Commission receivables are automated.

Business Requirements Document BDOI CORE REPLACEMENT

BRD	LEVEL 1	LEVEL 2	BRD IDs
Operations	Collection Of Commission Receivables (Direct Payment)	Comprehensive Production Reporting	CMRID.014, PRCID.035, PRCID.036, PRCID.038, PRCID.039 - Generate detailed production reports by branch and insurance company, including strategic reports.
Operations	Collection Of Commission Receivables (Direct Payment)	Risk Mitigation and Error Handling	CMRID.008 – Error handling and audit trail supported.
Reinsurance	Reinsurance	Placement request initiation	FRID-001 – Allows BDOI TSU to initiate a request for placement. FRID-002 – Enables creation of a placement request. FRID-003 – Allows saving the placement request for continuation. FRID-005 – Automatically sends the completed request to BDOI RI. FRID-006, FRID-007 – Covers receiving and validating placement requests. FRID-008 to FRID-010 – Supports adding reinsurers and auto-sending to designated parties.
Reinsurance	Reinsurance	Placement Slip Management	FRID-017 to FRID-021 – Enables access, review, editing, and revision of placement slips. FRID-022 – Logs revisions for audit and tracking. FRID-023 to FRID-027 – Manages sending revised slips, notifications, and sign-off processes. FRID-028 – Sends signed-off slips to Operations. FRID-031, FRID-032 – Generates accounting entries and logs booking.
Reinsurance	Reinsurance	Statement of Account (SOA) Generation	FRID-033 – Generates SOA based on booked accounts. FRID-034 – Provides customizable SOA templates. FRID-035 – Allows specifying recipients of SOA. FRID-036 – Sends SOA via automated email. FRID-037 – Supports scheduling and triggering SOA dispatch. FRID-038 – Logs sent SOAs for audit purposes. FRID-040, FRID-041 – Specifically for reinsurance premium SOAs.
Reinsurance	Reinsurance	Claims Reporting and Settlement	FRID-101 to FRID-105 – These cover loss reserve input, RCRF, FLA, and PLA generation.
Reinsurance	Reinsurance	Claims Payment Processing	FRID-058 to FRID-066 – These cover cash calls, debit notes, and accounting entries.
Reinsurance	Reinsurance	Direct Client Claims Payment	FRID-075 to FRID-082 – These cover cheque generation, tracking, and confirmation.
Customer Service Facility	Customer Service Facility	Search, retrieve and display client contact and insurance account details	BRID.002 - Access client and account information from data source systems so that agents can view and update customer details. BRID.003 - Search for client details using various identifiers (Name, Client ID, Account Number, Promissory/Application Number). BRID.008 - View current client information to provide accurate support.
Customer Service Facility	Customer Service Facility	View add, and update client contact information	BRID.004 – BR ID directly supports the functionality by enabling agents to: Access existing client contact details. Make updates or add new information. Ensure that changes are saved and reflected in the system.
Customer Service Facility	Customer Service Facility	View payment history and current status	BRID.005 – View payment history and status for customers.
Customer Service Facility	Customer Service Facility	View and resend RA	BRID.006 - View and download to resend Renewal Advise (RA) to clients. BRID.006.001 – Access renewal advise, select resend option, and confirm resend.

Business Requirements Document BDOI CORE REPLACEMENT

BRD	LEVEL 1	LEVEL 2	BRD IDs
Customer Service Facility	Customer Service Facility	Upload supporting documents	BRID.007 - Attach or upload documents so all relevant information is stored. BRID.007.001 – Select document upload, choose file, upload document, and confirm upload
Employee Benefits	Automated renewal notifications	The system must automatically send renewal advice notifications to clients with existing policies scheduled for renewal, at a defined period before expiration.	BRID-001
Employee Benefits	Manual and system-based proposal generation	The system must allow users to generate and send initial proposals based on incumbent rates for renewals, supporting both manual and automated proposal creation.	BRID-003
Employee Benefits	Document and Data Upload Management Capability	The system must enable users, clients, and insurers to upload documents (TOR, master list, proposals, feedback, BOR, billing, etc.) in supported formats, ensuring correct association and confirmation of uploads.	BRID-005, BRID-007, BRID-008, BRID-014, BRID-025
Employee Benefits	Broker on record management	The system must allow users to upload and manage signed Broker on Record (BOR) documents, ensuring proposals cannot be requested for new business without a valid BOR.	BRID-008
Employee Benefits	Terms Of Reference generation and distribution	The system must enable users to generate and distribute Terms of Reference (TOR) and master lists to selected insurers, with confirmation and notification features.	BRID-009, BRID-007
Employee Benefits	Comparative Report Management Capability	The system must generate comparative analysis reports of renewal proposals, highlighting differences in coverage, pricing, and terms, and present these to clients in a clear format.	BRID-010, BRID-011
Employee Benefits	Client feedback or changes / additional / amendment request capture and relay	The system must allow users to capture client feedback, changes, additional requests, or amendments, and relay these to insurers for proposal updates.	BRID-002, BRID-012, BRID-013, BRID-015
Employee Benefits	Automated and manual sending of proposals	The system must support both automated and manual sending of proposals to clients, ensuring correct timing and content.	BRID-003, BRID-009

Business Requirements Document BDOI CORE REPLACEMENT

BRD	LEVEL 1	LEVEL 2	BRD IDs
Employee Benefits	Approval workflow based on defined thresholds	The system must trigger approval workflows when transactions meet or exceed defined value thresholds (e.g., TSI or premium amount), notifying authorized approvers.	BRID-016
Employee Benefits	Placement and Booking Management	The system must provide users with the capability to trigger placement of insurance coverage after client confirmation and to submit booking requests for finalized policies, including validation against duplicates and tracking until completion.	BRID-017, BRID-019, BRID-020
Employee Benefits	Centralized reporting and analytics	The system must generate comprehensive, customizable reports (renewal, placement, production, etc.) automatically or manually, supporting management, compliance, and client transparency.	BRID-022, BRID-023, BRID-024
Employee Benefits	Manage franchise requests and approvals	The system must allow users to submit franchise requests with required documents, track insurer approvals/rejections, and advise clients of outcomes.	BRID-026, BRID-027, BRID-028, BRID-029
Product Maintenance	Automated request handling	Receive, view, track, and auto-sync requests	BRQID.012
Product Maintenance	Automatic reference numbers	System auto-generates reference numbers for each request	
Product Maintenance	Easier quotation/proposal management.	Prepare/send quotations, negotiate terms, document communications	BRQID.013, BRQID.011
Product Maintenance	Automatic comparison tables	Compile insurer feedback into consolidated tables	BRQID.014, BRQID.015
Product Maintenance	Real-time dashboard/reports	Dashboards and reports for real-time tracking and reporting	BRQID.019, BRQID.020
Product Maintenance	Built-in checks/approvals	Validation and multi-level approval workflows	BRQID.022, BRQID.004
Product Maintenance	Secure document sharing	Password protection/encryption, role-based access	BRQID.021, BRQID.017
Product Maintenance	Works with existing systems	Integration and notifications with BDOI systems	BRQID.024
Product Maintenance	Tracks all changes	Complete audit trail for all actions	BRQID.025

Business Requirements Document BDOI CORE REPLACEMENT

BRD	LEVEL 1	LEVEL 2	BRD IDs
Product Maintenance	Expiring packages monitoring	Archive expired products, monitor expiry dates, enable renewals	BRQID.006, BRQID.018
User & Data Management	Customer Service Facility	Case resolution, add / edit case details and status	BRID.004, BRID.010 – Updating client info and tracking changes support this.
User & Data Management	User & Data Management	User access and record	New Business Fire and Motor: BRD 1.1.1.1, BRD 1.2.1.1, BRD 2.1.1.1, BRD 3.3.4.1, BRD 3.4.2.1 - User can log in with correct profile, access module, receive inactivity/logout warnings, audit logs are viewable/downloadable/savable CMS: FRID-019, FRID-020, FRID-021, FRID-043, FRID-044; NFR 1, NFR 3, NFR 4 - User can log in, system tracks user actions, audit logs are viewable/exportable, only authorized users can access/modify data, password and access policies enforced. RMEL Phase 2 - Online Dispositioning: BRD 1.001.1, 2.001.1, 3.001.1, 4.001.1, 5.004.1, 6.001.1, 6.002.1 - Only authorized users can access modules and functions; user actions are tracked and auditable; user profiles/roles are assigned and maintained. Accounting, Disbursement and ACSL : BRD 1.1.0–1.1.3, BRD DIS 1.1.0–1.1.3, BRD MKT 1.1.0–1.1.3, BRD ACSL 1.1.0–1.1.3, BRD BASAU 1.1.0–1.1.3, BRD BASAU 2.3.0–2.3.3, BRD FRBS 3.1.0 - Device-based access, user profiles, audit trail, user management, inactivity/logout warnings Claims: FRID-002, FRID-003, FRID-005, FRID-006, FRID-011, FRID-012, FRID-013, FRID-015, FRID-018, FRID-019, FRID-021, FRID-024, NFR 1.01–1.04, NFR 2.01–2.10, NFR 4.01–4.05 - These requirements ensure that only authorized users can access, view, and update sensitive claim records and related fields, with robust authentication, audit logging, and role-based access controls. Operations: BRQID.001, BRQID.002, BRQID.003 - System must allow secure user access and login, restrict access to authorized users, and present operational functionalities based on user role. Audit trails must log user actions for traceability. Reinsurance: User Access & Record FRID-014, FRID-098, FRID-099, FRID-100, NFR 1.01–1.04, NFR 2.01–2.10, NFR 4.01–4.05 - SSO, authentication, audit logs, access control, record/log user actions CSF: BRID.001- Secure authentication and access control for authorized users.
User & Data Management	User & Data Management	Product Update	New Business Fire and Motor: BRD 1.1.6.1, BRD 1.1.8.1, BRD 2.1.7.1, BRD 2.1.10.1, BRD 3.3.5.1 - User can edit, save, cancel, and submit updates to client/account/profile details; system validates fields CMS: FRID-007, FRID-015, FRID-017, FRID-025, FRID-031, FRID-033 - Users can update product/account/disposition records, changes are logged, system validates updates, only authorized users can perform updates. RMEL Phase 2 - Online Dispositioning: BRD 2.004.5, 3.007.3, 4.005.3, 5.005.1 - Update necessary details on accounts; save updated details; update Renewal Advice template

Business Requirements Document BDOI CORE REPLACEMENT

BRD	LEVEL 1	LEVEL 2	BRD IDs
			Accounting, Disbursement and ACSL : BRD FRBS 2.3.0–2.3.5, BRD FRBS 2.10.0–2.10.2, BRD DIS 2.8.0–2.8.5, BRD DIS 2.11.0–2.11.2, BRD DIS 3.26.0–3.26.7, BRD FRBS 3.6.0 - Chart of accounts, file uploads, editing, service fee monitoring, status tagging Claims: FRID-004, FRID-007, FRID-008, FRID-009, FRID-010, FRID-014, FRID-017, FRID-020, FRID-022, FRID-023, FRID-035, FRID-036 - These requirements enable the system to update and maintain product-related data fields, such as claim status, settlement types, adjusters, and catastrophe codes, supporting accurate and up-to-date claims management. Operations: PRCID.015, PRCID.016 - Users can edit and add product-related fields (e.g., company concerned, instructions, notations) in production registers. System supports updates to product information and ensures changes are saved and reflected. Reinsurance: FRID-020, FRID-021, FRID-022, FRID-015, FRID-030, FRID-031 - Edit/revise placement slip, submit additional info, booking/accounting integration, audit logs CSF: BRID.002, BRID.004 - Access and update client/account records, synchronize changes.
User & Data Management	User & Data Management	Insurer record	New Business Fire and Motor: BRD 1.3.9.1, BRD 1.3.9.2, BRD 2.1.15.1, BRD 2.1.15.2, BRD 2.3.5.1, BRD 2.3.5.2 - System can send/receive files to/from insurer, generate/view insurance advice, handle returned requests, update account details. CMS: FRID-036, FRID-037, FRID-039 - Insurer records are viewable, updatable, and included in reports; only valid values selectable; changes are logged. RMEL Phase 2 - Online Dispositioning: BRD 1.003.4.1.15, 2.008.2.5, 3.009.1.2, 4.007.1.2, 4.007.1.4.1 - Insurance Company field in account lists and reports; select/search insurer from dropdown; send/receive files to/from insurer Accounting, Disbursement and ACSL : BRD ACSL 2.2.1, BRD ACSL 2.13.1–2.14.4, BRD ACSL 2.5.1, BRD ACSL 2.5.3, BRD ACSL 2.16.0–2.16.1 - Insurer data management, SOA reconciliation, reporting, audit/reference tracking Claims: FRID-007, FRID-008, FRID-010, FRID-017, FRID-023, FRID-024 - These requirements ensure the system can accurately record, display, and update insurer-related data, including policy numbers, claim statuses, adjusters, and reserves. Operations: PRCID.013, PRCID.021, PRCID.017 - System allows filtering and viewing accounts by insurer, uploading matched data from insurers, and generating production registers with insurer feedback. Insurer records are managed and updated for reconciliation and reporting. Reinsurance: FRID-008, FRID-009, FRID-010, FRID-064, FRID-061, FRID-093, FRID-094 - Add/associate reinsurers,

Business Requirements Document BDOI CORE REPLACEMENT

BRD	LEVEL 1	LEVEL 2	BRD IDs
			notifications, debit note, confirmation of receipt. CSF: BRID.002, BRID.008, BRID.009 - Access insurer account details and policy documents.
User & Data Management	User & Data Management	MIS field	New Business Fire and Motor: BRD 1.3.5.1, BRD 1.3.13.1.6, BRD 2.3.9.1.6 - System generates reports with required MIS fields; user can view production statistics and billing details. CMS: FRID-011, FRID-012, FRID-035, FRID-036 - Data can be filtered by MIS fields; reports include required MIS fields; filtering works as specified. RMEL Phase 2 - Online Dispositioning: BRD 1.003.3.1.8, 1.003.4.1.7-1.003.4.1.13, 2.008.2.11, 3.010.2.11, 4.008.2.11 - Market Segment, Department Code/Name, Unit Head, Account Officer, Region, Area, Branch, Business Origin, Customer Segment, etc. Accounting, Disbursement and ACSL : BRD MKT 1.18.0–1.18.1, BRD ACSL 2.5.1, BRD ACSL 2.5.3, BRD FRBS 3.2.0–3.6.0, BRD BASAU 2.3.2–2.3.3 - Data capture for market segment, account officer, unit head, risk code; reporting and customization Claims: FRID-016, FRID-020, FRID-026, FRID-028, FRID-029, FRID-030, FRID-031, FRID-032, FRID-033, FRID-034 - These requirements support management information system (MIS) needs, enabling reporting, analytics, and tracking of claims, settlements, loss experience, and operational metrics. Operations: PRCID.005, PRCID.021, ADJID.019 - System displays metadata (location, date, time of extract), allows filtering by MIS-related fields (e.g., market segment, booking date, AO/AB), and generates adjustment reports with key MIS information. Reinsurance: FRID-095, FRID-096, FRID-097, FRID-078, FRID-079, FRID-100 - Report generation, templates, filters, dashboard, audit trail search/filter. CSF: BRID.005, BRID.006, BRID.010, BRID.011 - Payment history, renewal advice, audit trails, reporting.
User & Data Management	User & Data Management	List Of Values (LOVs)	New Business Fire and Motor: BRD 3.3.3.1–3.3.3.5, BRD 1.1.6.1.1, BRD 1.1.8.1.1, BRD 2.1.5.1.1, BRD 2.1.8.1.1, BRD 3.3.3.2 - User can view/add/edit/deactivate LOVs; system validates LOVs and prompts for missing/invalid info. CMS: FRID-016, FRID-017, FRID-018, FRID-037, FRID-038, FRID-039 - LOVs are maintained, only active values selectable, updates are logged, only authorized users can modify LOVs. RMEL Phase 2 - Online Dispositioning: BRD 5.003.1-5.003.5, 6.002.2.23 - View, add, edit, delete LOVs; select effectivity date for LOV changes; assign maintain LOVs function to user profile/role Accounting, Disbursement and ACSL : BRD BASAU 2.2.0–2.2.5, BRD BASAU 2.4.0–2.6.3, BRD DIS 2.2.2, BRD DIS 2.2.5, BRD DIS 2.7.0, BRD DIS 2.7.5, BRD DIS 2.7.8 - Maintenance, approval workflow, usage in standardized fields, auditability.

Business Requirements Document BDOI CORE REPLACEMENT

Questions	Response
When is the highest system demand expected (e.g., year-end)?	Refer to BRD
When are peak times for usage (e.g., 12:00 - 14:00 daily)?	Refer to BRD
Do mobile and desktop end users expect different levels of speed and performance?	Refer to BRD

Availability	
<i>Refers to the uptime of system reliability, specifying how often the system/service should be operational and accessible for users.</i>	
Questions	Response
What is the acceptable system availability (e.g., 99.9%)?	Refer to BRD
When do people use the system (e.g., 9am-6pm daily, 24/7)?	Refer to BRD
How long can the system be down each month or year without causing issues?	Refer to BRD
What times are acceptable for system maintenance?	Refer to BRD
In the event of a major disaster, what is the threshold of your business continuity plan relevant to this requirement?	Refer to BRD

Data Retention and Archiving					
<i>Refer to how long data is stored, how it is managed overtime, and when it is moved to long-term storage or deleted, based on the business needs and legal/compliance requirements.</i>					
Data	Retention Period	Archival Period	Backup Frequency	Accessibility	Backup Retention Period
	(Data-In-Use / Online)	(Data-at-Rest / Offline)			
Application Logs	5 Years	15 years	Every 4 hours	Online (5 years) Offline (up to 15 years)	5 Years
Database Logs	5 Years	15 years	Every 4 hours	Online (5 years) Offline (up to 15 years)	5 Years
Audit Logs (System Level and Secure logs)	5 Years	15 years	Every 4 hours	Online (5 years) Offline (up to 15 years)	5 Years
Historical data within database	5 Years	15 years	Every 4 hours	Online (5 years)	5 Years

Business Requirements Document BDOI CORE REPLACEMENT

				Offline (up to 15 years)	
--	--	--	--	--------------------------	--

Questions	Response
Should certain data be anonymized over a particular period?	No

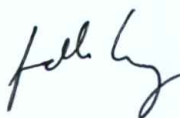

Approval

This document has been approved as the official Business Requirements Document for the BDOI E2E Process.

Upon approval of this document, changes will be permitted until the conclusion of the service definition phase. Any changes made during service definition must be accompanied by a Minutes of the Meeting (MoM) document, signifying the change. Once the service build commences, any further changes will be subject to the project's change management process.
